VIP II® is a fixed resilient floor system with a unique design featuring two-stage resiliency with desired reaction when impacted by light single player contact or when heavier multi player impacts are created. VIP II also includes an unmatched dual dampening design that addresses vibration below the subfloor and in compression directly below the flooring surface

where it provides the greatest benefit. In addition, pre-manufactured subfloor panels provide a special blocking feature to protect flooring and subfloor components when exposed to heavy non-athletic loads. Beyond all these described benefits, VIP II® also meets or exceeds all known athletic floor standards worldwide.

### VIP II® FIXED RESILIENT SYSTEM

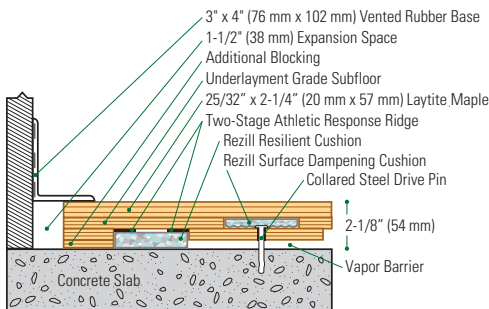

**Performance Status:**  
Meets or exceeds all requirements of DIN 18032 part 2, 2001 / MFMA-PUR

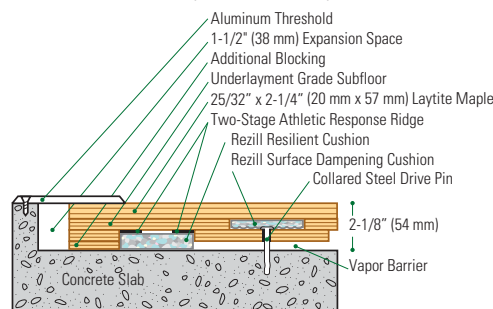

**Slab Depression:** 25/32" (20mm) flooring – 2-1/8" (54mm) • 33/32" (26mm) flooring – 2-3/8" (60mm)
