After releasing Love You To Death, one of the smartest pop albums of 2016, Tegan and Sara were ready to change things once again. For Hey, I'm Just Like You from 2019, they took your sound in a different direction (or went back to your original, depending on how you look at it). The single I'll Be Back Someday set the mood perfectly, as the Quins brought back the electric guitars along with a healthy amount of teenage angst, all while telling all the lies they told back then (if I could fake it, if I could lie/ But I can't stay). Of course, there were some 90s staples in the music video, colorful clothes, daring boots, to complete the vibe. - G.G.6. Higher Power, Seamless The UK hardcore quintet landed a deal with Roadrunner Records with the strength of its 2017 debut Soul Structure and came out swinging on their first major label single. Seamless hooks, havoc, and little else, blistering verses punctuated by a hilly and clean choir that is pure White Pony-era Deftones. Have the guy who produced Doolittle and The Color and the Shape of the boards might have been scary for a band in their early 20s but alt-rock Gil Norton's presence has the leeds band on their way to something special. C.P. 5. Slipknot, Nero Forte The words watch this are spat on top of Nero Forte, and if they didn't catch your eye before that, Slipknot goes on to do it with one of the most intense songs in its entire catalog. Nero Forte is mesmerizing in its relentlessness: the first half of the song yields nothing, and when Corey Taylor suggests a lower gear, he quickly dials a bridge that would make the veins burst from anyone who dares to try to sing along with it. Nero Forte, who dives into the inescapable of the depressive state, not only finds Slipknot at the top of the game, but adds to a metal legacy that was already well protected. - J.L. The following list, sorted alphabetically, includes rock albums found in Pitchfork's main year-end count, as well as 14 additional LPs who did not make that list but are so worthy of their time. With each record, Angel Olsen's music gets bigger and darker, and in All Mirrors, she spreads her leather wings and almost erases the sky. His most dramatic release to date, All Mirrors telegraphs us in gestures the size of Andrew Lloyd Webber: When Olsen's voice rises an octave in Lark, the accompanying drum resonates like a cannon pointed at a fortress, and the orchestra's diving bombing glissandos mimic debris circulating around it. Throughout the album's inky expansion, Olsen experiences an all-new gothic corner of his record collection: The Cure's Disintegration, Cocteau Twins' Heaven or Las Vegas, Siouxsie and the Banshees. Even at its most gauziest, however, Olsen's music is still fraught with anxiety: his version of dream-pop is unstable by existential terror, which splashes to the surface of Too Easy and What It Is like fever sweat. Jayson GreeneListen/Buy: Rough Trade | Apple Music | TidalBy the time Big Thief released U.F.O.F. last May, you may have thought they deserved some time off: it was their third album in four years. But not five months later came Two Hands, which is as much an exorcism as its predecessor. Violence ripples through these songs like a quartz vein—Rock and Sing can be a childish lullaby about lost souls, The Toy an insinuation of great evil. Heated by humming amps and the presence of four closely pressed bodies, the album unfolds as easily as a bonfire session—lost counterpoints, offhand vocals, small details dancing like shadows on the tree line. At a time it seems no piece of land is immune to floods or fire, Two Hands draws a circle and creates a refuge there. -Philip SherburneListen/Buy: Rough Trade | Apple Music | The tidallike white light refracted through a prism to reveal a variety of common colors, words and phrases - wrinkled hands, silverhair, clear water - take on new meanings when sung by Big Thief's Adrienne Lenker. U.F.O.F., the first of two stellar albums the band released this year, both so exploratory and wise, as if they were both seeing the world with a new wonder while explaining how things have always been. In mass folk rock songs like Jenni and Betsy, Lenker's meandered voice spins through a dense weaving of vine-shaped guitars and brittle drums, acting as a sonic anchor as the rhythm spins around him. The lyrics are elliptical but striking, so successful in filling it with what seems to be an old wish that sometimes it seems like you are discovering a new language entirely. -Vrinda JagotaListen/Buy: Rough Trade | Apple Music | TidalKatherine Paul, also known as the Portland Black Belt Scout, creates rock in delicate soft focus. Their second album, At the Party With My Brown Friends, offers a quiet glimpse into their world—or at least a serene. Led by a majestic vocal melody, the opening track At the Party celebrates the inherent strength of indigenous peoples while still lamenting the marginalization that does so. You're Me and I'm You honors your mother's open heart and Alaskanative heritage, with nearby vocals and brushed drums adding to the intimate feeling. Not all of the songs on the album are so clear in their intent—Paul's semi-finished thoughts provide a dreamy sense of shesis everywhere—but all are deeply felt. -Eric Torres
