## Mobile phone sim cards australia

Ashley Mackenzie When all your contacts and text messages are stored on the SIM card of your old phone, you may not want to transfer everything to your new phone. Fortunately, SIM cards make the process easy. SIM cards are designed so that users can transfer data from the old phone to the new phone with minimal effort. As long as it fits your new phone, at AT&T says you can use your old SIM card on your new phone. To insert the old SIM card into the new phone, remove the battery from the phone, slide the SIM card into place and insert the battery. If your new phone doesn't have a SIM card, you won't be able to use your old SIM card with it. You can transfer contacts and other data from your old SIM card to your new phone by placing the data on a USB drive - or for a phone shop professional to do it for you, according to CNET. Greyson Ferguson Prepaid mobile phones are phones that can be purchased from most wireless providers. These phones allow you to buy a certain number of minutes that can be used over a long period of time. In addition, the minutes will not expire at the end of the month and you can buy more if necessary. However, you may need to use a SIM card on a prepaid phone. This will take not minutes from the prepaid phone, but from the SIM card account. A SIM card is a small memory device (similar to memory cards used for digital cameras, only smaller) that stores relevant information about your account. If you have a phone with a SIM card, a phone number and user information will be stored on the card. Thus, you can buy a new phone and insert a SIM card that activates most phones into your account. For the SIM card to work on a prepaid mobile phone, the phone and SIM card must be from the same company (like both from AT&T). Companies use different technologies on their devices, and using a foreign company's SIM card may not work on a prepaid phone. Some prepaid mobile phones do not use a SIM card at all. In this case, there is probably no place on the phone for a SIM card. If your prepaid mobile phone doesn't have a SIM card slot, you won't be able to use a SIM card with your phone. Remove the SIM card from the phone where it is currently being used. It is typically found near the phone battery (although some factories and models are different). Remove the clip that keeps the battery in place and safe from debris. Take the battery off. You will probably see a small place with the sim card inside. Pull out the SIM card and replace the battery and holder. Once the SIM card is gone, you will not be able to use the phone. As long as the prepaid mobile phone is the same wireless service provider as the SIM card, and as long as the phone SIM port, you can use the SIM card on your phone. Open the holder on the back of the phone and remove the battery. Insert the SIM card into the port and replace the battery and holder. Charge the phone back on (it will turn off when the battery was removed). The phone will soon scan and detect the new SIM card. When calls are made, they are now via the sim card phone number, and minutes are not removed from the prepaid phone account. By Shea Laverty Many users of T-Mobile's wireless GSM phone network have phones that are open so they can add a personal identification number (PIN) to their device to keep it secure. This code usually consists of four to eight digits. When the PIN is locked, your phone retains emergency call capabilities, but that's all. However, when the wrong dot is entered three or more times, the phone, SIM card inside or both lock. When this happens, the user can get the message SIM card is PUK locked or PUK is required to unlock. A personal blocking key, or PUK, is the code associated with SIM cards on mobile phones. This code is designed to unlock a SIM card that is locked due to the wrong PIN code entry. Without the correct code, there is no way to unlock the card and enable the functions of the phone. When you enter a PIN incorrectly three or more times on your phone, the SIM card automatically locks and configures the PUK. This also happens when your phone or SIM card is reported lost or stolen, and the network operator decides to lock the SIM card for security reasons. Once your SIM card is locked and requires PUK, there's only one option: Call T-Mobile Customer Service. Only they can legally give you a PUK code to unlock your phone, and they are most effective in ensuring that your device returns to the order of operation. After contacting them, you will provide the PUK code and instructions on how to enter it into your phone to unlock the SIM card. It is very important that you do not try to unlock your SIM card yourself. PUK is a security system that protects the security of your SIM card and does so at any time. If you enter the PUK incorrectly 10 times, the SIM card will be void. There is no code, procedure, or tool to re-validate the SIM card. Once the card has been cancelled, it will be permanently locked and replaced at the consumer's expense. If you are planning a trip to Australia, contacting family and friends abroad can be expensive. The best tip for keeping costs down is to switch to a local SIM card. Australia has great audio, SMS and data plans available, with offers that can reduce your phone bills. You can get 1GB of data from Australia's top telco providers for as little as \$10 (10.20 CAD). So, whether you're planning a quick vacation or longer trips, you can save money by comparing finder.com/ca.Prices last updated on April 28, 2017 By mobile phone operators in Australia There are three main telco providers in Australia: Telstra, Optus and Vodafone. Locals and tourists have tried and tested SIM cards from all three networks, so they can be trusted. While the likes of ALDImobile, amaysim, Boost Mobile, Coles Prepaid, Dodo, Gotalk, Hello Mobile, Lebara, Lycamobile, Virgin Mobile, Woolworths Mobile and Yomojo offer many other SIM card options, they are all used as a mobile virtual network operator (MVNO) through the three main operators mentioned above. About Australian mobile operatorsAustralia operators offer amazing technology, competitive prices and sell prepaid credits, allowing users to take advantage of cheap deals and promotions. All networks offer customers 3G and 4G/LTE. 2G will be discontinued nationwide in October 2017, so make sure your phone is 3G or 4G compatible. Aussies invite their SIM cards to their SIM cards and there are no real rules and regulations when it passes to buy them. Just make sure you show your passport and register your SIM card online after you buy it, and that you have the address of your place of stay. It would be easier to ask a shop assistant to do this to save time. SIM cards and credits can be purchased at supermarkets, shops, kiosks and the main airports of Sydney, Melbourne, Canberra, Brisbane and Perth. TelstraTelstra is australia's largest operator with the best coverage and the

highest prices. While this may be the most expensive network, it's usually the only one available in back or far-off areas. So, if you are going on a trip, this is a SIM card for you. Telstra no longer offers 2G services, so make sure your phone is 3G or 4G compatible. SIM cards and credits can be purchased at Telstra T-Life stores, supermarkets, kiosks and airports. Don't forget to register your SIM card online. Prepaid SIM cards are available in three different starter packs and are offered as nano, mini or micro SIM cards:Free SIM card – available for cells or tablets, credit must be added for use. AUD\$10 SIM card - 100 carrier minutes, unlimited SMS and 1GB of data – valid for 2 weeksAUD \$30 SIM card - includes AUD\$30 credit, 1.5GB (+1.5GB night bonus) - valid for 30 days. Unused data crashes. Credit can be replenished online with your Telstra account or by buying top-up coupons from most supermarkets and stores. Choose #100# to check your balance. Telstra offers two very good prepaid SIM card options:Simplicity:The standard default price is 10 cents per megabyte. AUD \$20 top-up is valid for 30 days, AUD \$30 for 60 days, AUD \$50 for 90 days and AUD \$100 for 180 days. Prepaid Plus:Data text message and calls to Telstra customers for 28 days. Overuse is charged a very high AUD\$2/00 if you go through something about the amount of information highlighted below. Nniiden Nniiden currently available and unused credit is used for the following plan it buys: AUD \$30 to 1.5GB - Plus, 1.5GB bonus between 8pm and 8amAUD \$40 to 3GB - Plus, The 3GB bonus between 8pm and 8amAUD \$50 to 4GB - Plus, 4GB bonus between 8pm and 8amExtra data can also be added to the following prices: 1GB AUD \$10, or 2.5GB AUD \$20.Telstra's Long Life isn't really for travellers, the focus is more on the longevity of the plan. Beyond Talk focuses on calls and SMS, but has very expensive data prices. Data Plans:Telstra Browse Plus Packages Can Be Added: AUD \$5 through 30MB - BROWSEPLUS5 to Activate 10 through 200MB - BROWSEPLUS10 to Activate 20 to 700MB - BROWSEPLUS20 activateAUD\$39 – 1GB - BROWSEPLUS39 to activate 49- 3GB - BROWSEPLUS49 to activate 59- 4GB - BROWSEPLUS59 to activate All of the above plans are valid for 30 days. Text code 125 to 7587 to activate. Data-only SIM cards:A special data-only SIM card has been produced for modems or tablets that offers good data roaming prices. The standard default speed is very high at AUD 2 per megabyte, so make sure you choose the data package that suits your needs. Unused data rolls into the following data offers:2GBValid for 7 daysAUD \$203GBValid for 30 daysAUD \$306GBValid 90-day AJANAUD \$6010GBValid 180-day AJANAUD\$9020GBValid 365 daysAUD \$150OptusOptus is the second largest telco provider in Australia, owned by Singtel. Their coverage is high in large cities, but can be a bit problematic on land. SIM cards and credits can be purchased at Yes Optus stores, supermarkets, kiosks, airports and post offices. Don't forget to register your SIM card online. They offer the following prepaid SIM cards: AUD\$2 SIM - credit must be added to \$10 SIM - includes AUD\$10 creditAUD \$30 SIM - includes AUD\$30 creditAUD \$40 SIM - includes AUD\$40 creditTop-ups can be made online, buying coupons in stores or through an Optus account. Text 1-9999 to check the balance. Prepaid SIM Card:The following prepaid SIM card packages are currently available:Prepaid daily plus: \$2 per day - 500 TB of data, unlimited AUS audio and text. If you exceed the 500MB data fee, you will automatically be charged an extra AUD 2 to increase to 1GB. To add more information, do so yourself by adding 500 PP data blocks for AUD\$2 each. All amounts expire at 11:59 p.m. All credits are valid for six months. Prepaid Long Expiration Period: Information will be charged at 5c/MB. AUD\$5 offers 500MB and AUD\$10 offers 1.5GB of data, both valid for 14 days. The additional credit lasts 186 days, the only exception is AUD 60, which is Year. Prepaid ultimate:AUD \$107 days300MB100 minutes calls in AustraliaunlimitedAUS SMSAUD \$2014 days800MB200 AUS minsAUD\$3028 days3GBunlimitedAUS minsAUD\$5 creditAUD\$406GBAUD\$10 creditAUD\$406GBAUD\$106GBAUD\$10 creditAUD\$6011GBAUD\$20 creditData-only SIM:Optus offers data-only plans called Prepaid Mobile Broadband. The following data packets are available:AUD\$ 2 SIM - 50MB data – valid for 7 daysAUD \$10 SIM - 1GB data - valid for 7 daysAUD \$30 SIM - 4GB data – valid for 30 daysAd the following information as well:30 days1GBValid 7 daysAUD \$104GBValid 30 dayAUD \$307GBValid 1 yearAUD \$5022GBValid 2 year AJANAUD \$130Top-ups can be made online with a credit card. Unused data is enabled. VodafoneVodafone is the third provider in Australia, but is reliable and offers the best prices. SIM cards and credits can be purchased at Vodafone stores, supermarkets, post offices, airports or online. Don't forget to register your SIM card online. The following starter packages are available: AUD \$1 - credit must be added \$30 to \$30 with a \$30 credit valid for 30 days with a loan of \$50 to \$50, valid for 30 daysAbout: You can add information to Vodafone prepaid SIM cards for \$30, AUD \$40 or AUD \$50 face value. The standard default speed is AUD 2 per megabyte. The following data packages can also be added: AUD \$3 to 2GB, valid for 1 day AUD \$7 to 2GB, valid for 7 daysAUD \$5 to 500MB, valid for 28 daysAUD \$10 to 1GB, valid for 28 days AUD \$15 to 2GB, valid for 28 daysVodafone MyMix offer allows prepaid users to create their own plans. The MyVodafone app allows customers to create voice, data, and international call options and how long they are valid. MyMix offers the following combinations: AUD \$10 to 500MB, unlimited AUS calls, unlimited AUS SMS, 50 international text messages – valid for 7 daysAUD \$20 to 2GB, unlimited AUS calls, unlimited AUS SMS, 50 International Text Messages - Valid for 10 DaysAUD \$30 to 2GB, Unlimited AUS Calls, Unlimited AUS SMS, 50 International Text Messages - Valid for 28 Days AUD\$40 to 5GB, Unlimited AUS Calls, Unlimited AUS SMS, 50 International Text Messages - Valid for 28 Days AUD\$40 to 5GB, Unlimited AUS Calls , unlimited AUS SMS, 50 international SMS , 90 international minimums – valid for 28 daysAUD \$50 to 7.5GB, Unlimited AUS calls, unlimited AUS SMS, 50 international text messages, 90 international minutes – valid for 28 daysAUD \$60 to 10GB, unlimited AUS calls, unlimited AUS SMS, 50 international sms, 120 international minutes – valid for 28 daysAbout SIM cards only:Vodafone data SIM cards were created on tablets or modems only. Mobile broadband SIM also enables the use of text messages. The following SIM device manufacturers are available:AUD\$2 SIM - standard SIM card without set orderAUD\$30 SIM to 4GB valid for 30 daysAUD \$40 SIM to 6GB valid for 40 \$50 SIM to 8GB valid for 180 daysTa the following information packets can also be added: 1GB30 daysAUD \$10100MB bonus2GB30 daysAUD\$20200MB bonus4GB30 daysAUD\$30400MB bonus6GB40 daysAUD\$40600MB bonus8GB180 daysAUD\$50800MB bonus10GB365 daysAUD\$601GB bonus25GB365 daysAUD\$1252.5GB bonusif the best tips from finder.com staff :Australians speak English and love tourists, so you shouldn't have a problem. Their accent can sometimes be a little. Slightly. Understand, but once you get used to it, you won't think about it anymore. Ask the Store Assistant to insert a SIM card for you. If not, follow the above instructions or consult the official carrier site. Most stores close at 5 p.m., and Thursday night is called a late-night shopping night when stores close around 9 p.m. What is the state of Australia's mobile networks? According to OpenSignal Australia, Australia is the world's leading mobile phone network. 3G and 4G technologies were launched almost immediately after creation and 5G plans are already planned. OpenSignal tested Australia's three major cell operators and found networks that are not only fast but also constantly accessible to Australia's distant population. Telstra had the fastest speed with a 4G charging average of 23.6 Mbps. Telstra also offered the best overall speeds, averaging 17.1 Mbps on its 3G and 4G networks. Vodafone kept pace with Telstra when it came to providing a consistent LTE connectionAustralia consumers have a world that wins access to high-speed LTE networks. It ranks in the top 10 in 4G speeds and the top 20 in 4G availability. Telstra and Optus have built LTE-Advanced networks that can speed up faster than its subscribers can. Smartphone technology is still catching up! TripAdvisor tips for the best SIM cards and how to buy themTripAdvisor has many user comments that can help you through what SIM cards have been tried and tested in Australia.Here are some of the best tips for TripAdvisor users: All the big ones are good: Telstra, Vodafone, Optus. Telstra has more coverage nationwide, but if you stay in Melbourne, you won't have a problem. SIM cards can be purchased for about \$2, but they do not include credit. If you are looking for a simple, non-cap plan, you can check the Optus plan, which is only 10c/30 seconds for calls and 10c per SMS. It's good for basic use. Buy a SIM card at the airport or any melbourne convenience store and let the staff help you set it up and put credit out of it. You need id to get a Sim card, so get your passport ready when you buy it. You can pick up SIMI from department stores, electronics stores and, of course, also from the phone company's outlets. Pros and cons of australia's top providers All networks require you to have a SIM card unlocked GSM-enabled mobile phone. If you want to check that you have this phone, contact your service provider before you leave on your travels. Pros:Good value for moneyPrepaid credit if needed Store deal not neededYable to be compatible with your current mobile phoneAustralia offers the best technology in the worldCons:Some remote areas may suffer from poor coverageN't offered with SIM card packages Can only be used on SIM card unlocked GSM phonesEn't 2G 2G more questions about finding the best SIM card? Q: What about other SIM card providers in Australia? A: Australia has many operators offering smaller SIM cards, including ALDImobile, amaysim, Boost Mobile, Coles Prepaid, Dodo, gotalk, Hello Mobile, Lebara, Lycamobile, Virgin Mobile, Woolworths Mobile and Yomojo. These are carried out through the three main operators mentioned above. If you use a lot of data while in Australia, the aforementioned providers can offer better value. Not all MVNERS offer the full online experience of the main providers, so it's a good idea to check the coverage before buying a SIM card. Sim.
