Lucky block spiral mod is a mod for mcpe that adds the ability to create spiral lucky blocks to be able to interrupt and get first-class rewards available for craft. Some of the blocks are: this software is a manual and automatic installation of mods in sports, you will need to have the game set for mod to picture. As soon as the steps are observed, can you experience the lucky block spiral mod mcpe WHAT IS LUCKY BLOCK SPIRAL MOD? Luckily the spiral block is the only block from the mod by name. Exploiting it reasons for a random event to appear, is either an awesome or the worst. The lucky mod blocks basically offered in a new block, when tapped, will give birth to any block, object, shape or crowd or anything else in the game. It is even possible to lay eggs in the sitting dragon or ender. HOW TO USE LUCKY BLOCK MOD? As soon as you've had crafted your lucky block(s) all you want to do is zone it in the ground then I'm usually it. If you're lucky, you'll get a great prize (e.g. Budder, diamonds, bottles o' charm, eyes of ender, and many others) or you'll probably get a terrible prize (e.g. hostile mobs, explosions, debuffs, unfortunate squid, etc.). Usually you will receive a relatively outstanding award such as hay or wool or gun. Jackpot is an opaque sandstone structure with four extra lucky blocks and 4 rainbow blocks. One of the worst structures is an iron rod cage that traps you and an anom that falls on top of you.....:D ISCLAIMER:..... This app is not linked in any way to Mojang AB. Make @UTKio Tweet Hi Everyone! I really like lucky block mods, and I've created some custom drops for 1.8 (and since new drops are always awesome, I decided to share it. =) There are about 200 or so new drops and about 50 modified default drops... a lot of new things. =) I also added some worldgen (also through Loot ++ ) so you can find some random spiral luck blocks in your world.... I tried to make them lay eggs at the same rate as regular lucky blocks by default. Spoiler (click to hide) There are normal spiral blocks, as well as lucky and unlucky structures. If you want to exit or modify the world generation, go into addon compression and look at the configuration/world\_gen/surface.txt file. To see what all of those options mean, look at the Loot++ configuration, in your configuration item at Loot ++/world\_gen.cfg. You can delete files .txt you don't want any world genes at all. And here's the recipe: make: A few screenshots of the drops: Beware King Slime in his castle! Open some giant spiral lucky blocks! Gingerbread House Red Dragon Dungeon (This dragon is kinda evil!) Ice Jar spiral dungeon. Complete with a boss and a hidden room ... Mod Block Luck is an interesting but potentially devastating minecraft gadget. It adds a question mark printed blocks into the game and once broken there is a chance of reproduction of something good or something terrible. Blocks have the opportunity to give birth to something as great as a bevy of food and sweets or even a fully domesticated horse and armor: Or something as devastating as a block of lava and fire: Or an armored zombie named Bob with an enchanting sword: You can luck out with a super lucky block that spits out lucky potions that can also differ in good or bad luck when breaking them. The point of this mod is to give new use to gold ingots. If you find yourself always stocked with gold but never use it, this mod is for you. Now you can turn that weak metal into Lucky Blocks and let fate decide what appears. It's a neat mod for player servers or to create game maps but with randomly active blocks, it can be a dangerous mod for your usual map. It's a good way to back up your map or create a map dedicated to this mod for the reason you risk devastating your favorite world.
