Summary: In the early 1990s Princess Diana wanted a chance to tell her own story and she secretly began to do so. A friend of Andrew Morton in common, James Colthurst, secretly questioned and interviewed Diana with a tape with him at Kensington Palace. Colthurst was going to record Diana's answers and give them back to Morton. In addition to the recordings, Diana also allowed her friends and family to speak openly with Morton. The resulting book was a groundbreaking biography and dealt with a huge bombshell for the Palace. Review: It is a 25th anniversary edition and has been edited a bit over the decades to bring it present. It was difficult to know exactly what was added to the original print and what was added. I very much appreciated the section with direct transcripts from Diana's recordings. I'm having a hard time studying this book. It took months to read - both its size and content are heavy. I knew Diana's story would be heartbreaking, but as far as I know, there were so many things I didn't know. His story is a difficult one to read and even sadder knowing that his life was cut too short. Especially when you finally find some freedom and happiness. I'm glad to read it, because it gave me an interesting idea of diana's life and the life of the modern British Royal Family. I would recommend it for more hardcore fans, probably not much for those with a causal interest. Details... Diana: Andrew Morton Book Review by His Own Words Every True Story. The relevant year was 1992. The biggest movie at the box office was 'Batman Returns', and the world was trying to sing 'I Will Always Love You' like Whitney Huston. Everyone was talking about Diana: Every True Story.The book exploded on stage, blowing the façade of a fairytale marriage between the Prince and the Princess of Wales. Overnight it was bestseller and writer Andrew Morton - who had been reporting royals for a decade at this point - became a household name for years to come. [- Content warning: This article contains information about poor mental health, self-harm and eating disorders-] The Princess of Wales collaborated with a biography about him by recording secret tapes of Andrew Morton. (Nick Parfonov) Most people couldn't believe much of what the book said, and they didn't. Stories about The relationship with Charles, his relationship with a woman named Camilla Parker Bowles, suicide attempts and an eating disorder (among countless other stories about his time in the Royal Family); It just couldn't be true! Andrew Morton can't know all these intimate details and strange stories; Diana was the only one who really knew the real story. Unwittingly, until 1997, Diana was a major participant in the writing of the book, sharing her information through secret tape records. This was the so-called True Story ... It was 1991, and Yorkshire-born journalist Andrew Morton began writing a biography about the Princess of Wales. After all, it was a big year for the Princess, Diana 30. Two happy events, but behind the scenes, things weren't as happy as they seemed. No one knew that, but the couple and those they kept close to them, and Morton knew absolutely nothing about events that would eventually end up in his book and the public brand would have made him the biggest liar in the world for years. Morton, like the overwhelming majority of the public, believed the Princess was a happy woman, and marriage to be pleased. After all, they had two teenage sons, and photos showed the royal engagement smiling around the world. Andrew had met and spoken to Prince Charles and Diana many times, but the conversation never ran deep. It's an interesting lie for the Royals' conversations with reporters about their relationship with the public, and how are you today? he read things like that. Embed Morton from Getty ImagesDiana knew that he was doing research into writing a book about him - the Royals tend to know what a journalist is writing, or plan to write, about them - but not always so far in advance. Normally royals don't get involved, they let journalists write books and the subject probably never reads. Indeed, the author usually swat away from his wishes to talk to the author, authorized royal biographies published only after his death, and even then, usually only Monarch and his wife. But that was different. Something got Diana to get to Morton, something asked for her story to be told to everyone from her own part, and even Morton wasn't sure what that thing was. Morton says he wants to escape the life of the Princess of Wales, but thinks he can't physically get up and go halfway around the world. The public carefully examines everything it does, and leaving Britain will be seen as a dereliction of duty contrary to what the Royal Family is about. They realized the only way they could understand was if they knew the reasons behind what they were doing. But how did Diana first contact Morton? It was through a common friend, Dr. James Colthurst. Dr Colthurst had known Diana since she was 17, while Morton met during the princess's opening of a new CT scanner at St Thomas' Hospital in London in 1986. Diana, Princess of Wales, during a visit to Canada in 1983. (Russ Quinlan) It began when Diana tested Morton through Colthurst by giving him small particles of information. After a while, pleased with the result, he asked Colthurst if Andrew wanted an interview. Morton refused to accept the offer because he was eager to talk to her. But the interview wasn't normal. Morton's presence at Kensington Palace would raise suspicions, so they could never sit and chat together, and the shrinking circle of people Diana could trust mean she thought it was not possible to meet her in secret. So the interview was made by the deputy. Morton would go to Kensington Palace and give his questions to Colthurst, an inconfidant friend who asked Diana. The Q&A was done and taped in the living room. There will be a total of six of these interviews. In interviews, Colthurst later said: Before we started, he took the phone off the hook and closed the door. Every time someone knocked on the door, he'd take off his body microphone and hide it on his couch on cushions. In addition to the six tapes, Diana sent letters to Morton via Colthurst to back up her claims. The letters belong to Prince Charles from Camilla. Because of libel laws in Britain, Morton could never write that Charles and Camilla had a close relationship; he could not prove the scandal without giving Diana's access to the book. It was the only thing he could give to kina... Morton claims that his office was broken into during the negotiations, but nothing significant was taken, which shows that someone knew about the tapes, or at least Diana, of his cooperation. After that, Diana swept the living room for listening devices, but none were found. But Diana wanted to keep her own secret while she wanted to expose Charles and Camilla's extranulns. Captain James Hewitt of Morton hid his love affairs with James Gilbey and Oliver Hoare. So in reality, 'Every True Story' wasn't really the whole picture - it just bits he wanted to share.June 7, 1992 saw the first extract from the book printed in a national newspaper. The Sunday Times was the only newspaper to serial the book, and it only did so when editor Andrew Neil was warned by a friend of Diana's how accurate the book was. The headline read: Diana dragged Charles 'recklessly' into five suicide proposals, and that's when the backs began. The public was in a state of shock and a state of reass or desi venking. This Canterbury condemned the book and suggested that an MP, Andrew Morton, should be imprisoned in the Tower of London. Even the head of the Press Complaints Commission accused the media of pointing fingers at the belongings of others' souls. The book will be banned by numerous bookstores and supermarkets. Ironically, the book was being boycotted on suspicion of being a bunch of lies, a shock that those allegations and stories brought. But soon people began to realize that the book was indeed Diana's experience, and it became almost overwhelming, spreading public support for the 'People's Princess'. But what did the public not want to believe, except for the end of the Welsh marriage? They didn't want to believe that the beautiful fairytale princess they admired was a deeply depressed woman who lacked stability and dealt with bulimia. One of the most shocking claims in the book was where Morton claimed the Princess of Wales had climbed the stairs at Sandringham while pregnant with William. Speaking about it on tape, Diana said: When I was four months pregnant with William, I threw myself down, tried to get my husband's attention, to listen to me. I told Charles I felt so helpless and I cried. She said I was crying. He said, I'm not going to listen. You do this to me all the time. I'm going to ride now. So I threw myself down the stairs. The Queen comes out, absolutely terrified, trembling — terrified. In 2017, on the 20th anniversary of his death, Another shocking claim made by the book was that Diana self-harmed, used sharp tools to cut herself, and even threw herself into a glass closet. During the book's republishing in 2017, it was reported that Diana tried to slit her wrists during her honeymoon at Balmoral. He said Bulimia left him very weak and he was so depressed that he tried to snoring my wrists with a razor blade. Diana reportedly left Balmoral early to get help from London. All the analysts and psychiatrists you could imagine tried to take care of me. Put me on a high dose of Valium and everything else. Said. The princess explained to Morton that she was suffering from postpartum depression after giving birth to William in June 1982, and if Charles didn't come home when he said he was coming home, I thought something terrible had happened to him. Said. No one wanted to believe it. No one wanted to believe this beautiful woman who seemed to have it all. Princesses weren't like that. Palace, the book is ugly. Something had to be done. It was clear that Diana and Charles would not have been together if they had shot at each other and the institution in this way. On 9 December 1992, Prime Minister John Major announced the departure of the Prince and Princess of Wales. The couple are officially dived in 1996 and Diana became 'Diana, Princess of Wales' after losing her HRH style. For five years until 1997, he took on a more humane role and became one of the world's most famous humanitarian aides. Unfortunately, he died in a car accident in Paris on August 31, 1997. Diana never regretted her role in the book (as different from the Panorama interview in 1995), and after her death Andrew Morton would go public with Diana's involvement. He was going to republish the book under the title 'Every True Story – In Her Words'. But the book is one of prejudice. From Diana's point of view, she tells one side of a story when there are other sides to tell. No one in this story was a true saint. Is the book really 'Every True Story'? I'd say no because the details of your own mistakes in marriage have been left out, it's not. Prince Charles used to tell the story from his own end in 1994 with the help of Johnathan Dimbleby. But you know what they say - there are three sides to every story. Andrew MortonbiographybookdianaHer True Storyprincess wales
