Canvas Prints Nature Landscapes & Scenic Landscapes Landscapes are a particularly useful decoration feature. They can seem a small room larger, expanding the space simply by existing. They can brighten up an overly clinical space more, making them ideal for offices, and decorating, while still being essentially neutral, making them ideal for hotels. The right landscape in the right place can make a room from just good to fantastic in a simple step. Make a change; decorate your home with canvas prints from our Landscapes collection. Bring peace to any room with a canvas print from our Landscapes collection with a forest. Let your imagination take the path that has traveled less, along the worn paths between trees that were old when our race was young. When it comes to forest scenes, there is no end to diversity - from the cool almost orderly forests of the northern hemisphere to the rank, rainy jungles of Africa and South America. Each forest evokes different feelings - while a country road through an autumn yellow forest can be welcoming and homely, the same country road through a dense, dark green jungle can evoke thoughts to go where no man has been before, bring the forest home with canvas prints. Real flowers are as poignant as they are beautiful, a bright but all too temporary example of the beauty of the world. But with canvas prints you have a whole field of flowers, stretching to the horizon, in every room in your home. Whether your taste is for a field of poppies, a meadow filled with wildflowers, or the lavender fields of Provence, you take those flowers home and keep them forever, just as beautiful as the day the photo was taken. The sky always seems bigger in an open field, with the grass reaching for the horizon and the smooth ripple of the hills laid out in front of you. A large field is a great place to think; the tranquil susurur of the fields reminds you of the waves of the ocean that rippling on the beach, while the nodding of the grass in the wind has a hypnotic quality. While a painting can never really replicate the sound and smell of an open field of grass, it can certainly show how it looks, and an open field will make even the smallest room immediately look bigger, brighter, and more lived-in. Sometimes you look at pictures of mountains, or pictures taken from the top of them, and you have to take a moment to marvel at the tenacity of people, who will be these stone behemoths because of a picture. It gets even more impressive when you put a castle on of a mountain - your mind immediately turns to the amount of work that must have gone into building that tower, or that wall - how many people and how many years did it take to build it? The castles, like the mountains, seem like they have been there forever, and will be there forever, and it's easy to miss the way they constantly change. Whether it's a snowy mountain that turns green with spring, or whether it's the slow decay process that turns castles into ruins, the forces of time work on all things, even mountains. Despite their immutable appearance on a human scale, on a geological scale mountains are incredibly energetic, zipping up and down like toddlers on a sugar high. Take paintings into your décor for a useful meditation on the dangers of judging by appearances alone. Artists around the world have been inspired, though over the years, to try to portray the living landscape in their art. While some of them are better than others, there is no doubt that landscape painting is a demanding discipline whether you portray a wooded hill, a stormy sea, or a mountain stream. Everything has to be like this, because it's one of the few things that people can actually go and check later - no one knows what the Mona Lisa really looked like, after all this time, but anyone can go to England and see if Thomas Smith or Richard Wilson knew what they were about. Bring an example of this demanding art form into your home with a canvas print from our Landscape collection.
