Downloading photos and videos has never been easier and faster, and text copies or hashtags have never been possible before. Now it's with a stop. What makes stopping better than other similar apps is: You can view downloaded media in your phone gallery. You can go to a stop in one click and return to Instagram in just one click. The first app to give you the ability to copy the description of posts. The first app that lets you copy hashtags only from descriptions of posts or descriptions without labels. Sometimes the pastry link comes on on its own (used to be automatic). Ads can be on their way if you save multiple images, but it's easy to ignore them most of the time. The app is great but I hope you have a button back to the same place in your photo collection as you have to start a new search every time. It only needs a sawn watermark option with the original label name (and black and white option or transparency. Middle. I love seeing me!) I would happily pay a small fee for the Pro version with this feature. Add another ☆ to Dave's quick reply to an earlier question.
