Ustream broadcast videos to youtube from iphone

If you've ever wanted to download YouTube videos directly to your iOS device and haven't found a good solution, we may also have an answer. Moreover, this tip does not require a jailbroken device. Read on and we'll show you how soon after the break! [Thanks to Colin for sending us this great tip, we'll send something special your way!] Download TagDisk from the App Store. To test the app, the free Lite version will be fine but it is limited to four video downloads, if you find this app useful, you may want to upgrade to the full version. iPhone Lite Version [iTunes Link] iPad Lite Version [iTunes Link] After installation, start TagDisk. You'll be greeted with the Disk screen, click on the browser on the toolbar below, and youtube.com the address bar. This will take you to the YouTube homepage, where you can search and find videos as usual. Once you've found the video you want to download, hold your finger on the link, and the options menu appears. Select Download link and the video will start downloading to your device. Now you can start queuing up a few videos and they'll download each other to your device. Download speeds are not the fastest here. I was on an 8 Meg ADSL connection but only managed to download at 130KB/Sec. When all the downloads are complete, click the Disk icon in the toolbar below and go to Document. Here you will find your download video. A simple click on one of the videos and it will start playing. No network connection is required to watch downloaded videos! That's all you need to do. I even tested this with Vimeo as well as YouTube and again it works perfectly. This little tip is awesome for me personally as I have terrible broadband speeds at home. Now I can download a variety of YouTube videos while I'm at the office and enjoy them at my leisure without dealing with stuttering and waiting and skipping school! The day's tips will range from beginner level 101 to high level ninja. If you already know this tip, keep the link handy as a quick way to help a friend. If you have your own tips, you want to suggest them, add them to comments or submit them news@tipb.com. (If it's particularly great and previously didn't know us, we'll even give you a reward...) We can earn a commission for the purchase using our links. Learn more.
