Question: Q: I'm looking to recreate a piece of dings that sounds like microwave buzzers going off. Can I insert a ding and assign it to the keyboard to play as different notes? Then I can influence each ding with some separate effects to make them sound different. Does anyone know of a built-in software instrument that has some sounds like this - bells, buzzers, dings, general fx sound? I haven't found anything yet. Thanks in advance.
