Two MLS clubs won the continental title in three years around the beginning of the century. Are we supposed to believe the league got "worse" during that time? Or is there no more important probe? Inmark, a leading distributor of container packaging and rigid life sciences, today announced that funds allying with private equity firm Kelso & Company (Kelso) have acquired the majority of the interests in the company. Quad-C Management, the current majority owner of Inmark, will exit its investment as part of the transaction, and Inmark management and employees will retain significant ownership of the company. The financial terms of the private transaction were not disclosed. The unified end-point management market in North America is expected to rise from \$1,097. 6 million in 2019 to \$7,410. 8 million by 2027; it is estimated to grow at a CAGR of 25. 7% from 2020 to 2027. New York, December 23, 2020 (GLOBE NEWSWIRE) - Reportlinker.com releases its North American Unified End-to-End Management Market Forecast to 2027 - Regional Impact and Analysis of COVID-19 by Component, platform, organizational size, and end users - Significant growth in the number of end points among organizations is expected to grow the unified end-to-end management market in North America. In today's era of digital workplaces and connectivity, the flow of consumer electronics, such as smartphones, tablets, laptops, and wearables, is growing at an unprecedented rate across all major industries. In addition, more and more cases of successful Internet of things (IoT) use in the workplace in industries are further promoting the application of IoT-connected devices in the enterprise. In addition, the increasing application of technology, in various industries throughout North America is increasing operational complexity and driving demand for advanced end-to-end management solutions in industries. As a result, companies are facing a huge challenge in managing and controlling the growing number of end-to-end points within the organization. The number of devices per employee and the total number of employees in an organization determines the number of IT resources and solutions required by that organization. Therefore, in large organizations, the task of managing all desktops, smartphones, tablets, laptops and carrying your own device (BYOD) is complex and expensive. The integrated end-to-end management solution provides a single point control for the different types of devices used on any business. It helps reduce the number of systems that need to be licensed or searched annually. It also replaces many end-point management solutions, resulting in high security and advanced controls. Therefore, the increase in the number and variety of end points among businesses is driving the unified end-to-end management market in the U.s.a. The growing demand for single end-point management solutions across industries is one of the other factors expected to drive the North American unified end-to-end management market. North America, especially the United States, was severely affected by the COVID-19 outbreak. The North American region is an important region for various technology solutions & services thanks to the presence of developed countries, such as the US and Canada, and the huge presence of companies from different industries. Currently, the United States is one of the countries most severely affected by the COVID-19 epidemic. As a result, the region's economy has seen a decline over the past few months that is negatively impacting the growth of different industries. The large increase in the number of confirmed cases and the number of reported deaths in the region is affecting the need for unified end-to-end management due to operational disruptions in small and medium-sized enterprises in the region. However, due to the increasing locking and working trends of BYOD and working from home, the demand for unified end-to-end management solutions is predicted to increase. In order to continue the day-to-day operations and important business activities, remote work and the availability of advanced communication/working infrastructure are important factors that are predicted to drive the North American unified end-to-end management market. Based on the component, the solution segment has led the North American unified end-point management market in 2019. Unified end-point management solutions support end users in protecting data from security breaches. Due to the appearance of various data protection laws, the scope of unified end-to-end management is expanding. The solution facilitates organizations to manage, organize, and control their performance. These help secure the data while complying with all necessary regulations. The component solution finds its application in healthcare, banking, government, oil and gas, manufacturing, and automotive, among others. The advantages of solutions, such as data protection, performance control, and multiple applications, are expected to increase demand for this segment in the coming years, thereby driving the North American unified end-point management market. Overall North America's unified market size of end-point management has been derived using both primary and secondary sources. To begin the research process, full-level research was conducted using internal and external sources to get quantised and quantised information regarding the North American unified end-point management market. This process also serves the purpose to get an overview and forecast for the North American unified end-point management market for all regionally related segments. In addition, many major interviews were conducted with industry participants and commentators to validate the data, as well as to get a deeper understanding of Participants who are often involved in such a process include industry experts, such as VPs, business development managers, unified end-point management market managers, and national sales managers, along with external consultants, such as rated professionals, research analysts, and critical opinion leaders specializing in the North American Unified End point management market. 42Gears Mobility Systems Pvt Ltd., BlackBerry Limited; Citrix Systems, Inc.; IBM Corporation; Ivanti; Matrix42 AG; Microsoft Corporation; Mobile Iron; VMware, Inc.; and Zoho Corporation is one of the few active players in the North American unified end-point management market. securities trading announcement on December 23.m, 2020, at 8:00am on December 23, 2019 (EET) Change of board of directors/management/auditor INCAP JAMIE MAUGHAN WAS APPOINTED AS A MEMBER OF INCAP Group'S BOARD OF DIRECTORS.Jamie Maughan (born 1972, HND Manufacturing and Mechanical Engineering) joined incap Group's Board of Directors on December 22, 2020. Jamie has been appointed managing director of the UK & Slovakia at The Incap Group and will continue as Managing Director of Incap Electronics UK Limited. Jamie joined Incap in January 2020 through the acquisition of AWS Electronics Group.As on December 22, 2020, with members of the Incap Group's Management Team being Otto Pukk, President and CEO; Greg Grace, Managing Director of Estonia; Murthy Munipalli, Managing Director of India and Asia Sales; Jamie Maughan, UK Managing Director & Antti Pynnönen, Chief Financial Officer. INCAP CORPORATION More information: Otto Pukk, President and CEO of Incap Group, tel. +372 508 0798 NASDAQ Distribution Helsinki Ltd. Main Media INCAP IN BRIEF Incap Corporation is a reliable partner and full service provider in electronic manufacturing services. As a global EMS company Incap supports clients from large multinationals and medium-sized companies to small startups in their complete production value chain. Incap provides advanced technology supported by a highly experienced business culture and personnel. The company has operations in Finland, Estonia, India, Slovakia, the UK and Hong Kong and has about 1,300 employees. Incap's shares have been listed on the Nasdaq Helsinki Ltd since 1997.Back in June, I compared Veeva Systems (NYSE: VEEV) and Zendesk (NYSE: ZEN). Both cloud services companies remained resilient throughout the COVID-19 crisis, but I believe Veeva's broader trenches, better profits and lower prices make it better to buy Zendesk. Veeva's shares have risen about 40% since then, but Zendesk's shares have risen more than 70%. President Donald Trump's threat late Tuesday to veto an \$892 billion relief bill passed by Congress this week could delay aid to millions of families on the cusp of deportation and the impending loss of unemployment assistance. Trump's apparent refusal to immediately sign the bill has injected uncertainty or worse into efforts to protect millions of Americans from falling over a financial cliff, said Mark Hamrick of Bankrate Wednesday. Trump said the bill, which passed Congress Monday night, did not provide enough support for small businesses, and he asked Congress to increase stimulus checks for individuals to \$2,000, instead ridiculously low \$600 in the bill. (Bloomberg) - Oil gathered alongside the stock market as a decline in U.S. crude inventories injected optimism into a market that is reeling from the revival of the epidemic. Futures in New York rose as much as 3.2% on Wednesday. Stocks rose as investors shrugged off the latest tensions over the US relief package, while Britain and the European Union reached the outline of a post-Brexit trade deal. The dollar also weakened, fueling the attractiveness of currency-priced goods. Meanwhile, a government report showed U.S. crude stockpiles fell to their lowest level since late November and exports rose for the second week in a row. The psychology in the crude oil market has shifted from selling all strength to buying dips, said Rebecca Babin, a senior equity analyst at CIBC Private Wealth Management. The dollar and the change in the direction of bidding for risky assets such as those on the stock market continue to be the main drivers of trading action. Crude's rally follows a difficult start to the week. Futures fell Monday and Tuesday because of fears that a new coronavirus mutation - which may have been in the United States, Germany, France and Sy - will cause widespread travel restrictions that will weigh on energy South Korea and the Philippines have moved to temporarily suspend British flights, while Japan is strengthening immigration rules for those travelling from the UK.Brexit negotiators are now working to final up the wording of their deal with the EU after nearly ten months of regular discussions. The Energy Information Administration report found that the drop in U.S. crude oil inventories was largely due to falling supply in the West Bank, limiting the impact on prices. The area is sometimes ignored by traders because its distribution system is isolated from the rest of the country. The lure of crude oil was small, but traders and producers were more likely. That would explain the increase in exports, said Quinn Kiley, a portfolio manager at Tortoise, a company that manages about \$8 billion in energy-related assets. Investors are also focusing on the possibility that President Donald Trump will sign a relief package into law by December 28. House Speaker Nancy Pelosi said the House plans to proceed Thursday with a bill to replace the \$600 stimulus test in the proposal this week with the \$2,000 payments Trump requested. KENNETT SQUARE, Pa., Dec 23, 2020 (GLOBE NEWSWIRE) - Franklin Woods Center, a Genesis HealthCare- (NYSE:GEN) (Genesis or Company) nursing home affiliate, has become one of the first long-term care facilities in Maryland to administer COVID-19 vaccination today for both residents and employees. Genesis HealthCare is one of the nation's largest providers of after-acute care. Franklin Woods Center, located in Baltimore, Maryland, hosted representatives from across the state at its center on Wednesday to witness this exciting milestone, including Maryland Gov. Larry Hogan and President and CEO of the Maryland Medical Facilities Association, Joseph DeMattos, Jr. Today, I am proud to stand with my colleagues at the Franklin Woods Center, our partners in the state of Maryland and at CVS Health for some of the first vaccinations at a nursing home in Maryland Nursing Director of Genesis HealthCare, Dr. JoAnne Reifsnnyder Vaccines are now our most important tool in combating this epidemic – along with personal protective equipment, regular inspections and our strict standards and infection protocols. This is another historic moment when the COVID-19 vaccine reached more residents and staff in one of our 24 active states. Those who are strained today includes CEO of Franklin Woods Center, Brian Klausmeyer, Registered Nurse and Executive Nurse Center, Donna Jones, Geriatric Nurse Davenia Kemp, and residents Samuel Cushing (70) and Kareleen Diggs (95). Genesis is working closely with state governments to determine when the vaccine will be available to all employees and residents at its facilities nationwide. As part of the Pharmaceutical Partner program for Long-Term Care announced in October by the U.S. Department of Health and Human Services and the Department of Defense, Genesis selected CVS Health Corp. as a pharmaceutical partner to provide and administer vaccines in all states working with CVS or Walgreens Boots Alliance Inc. to administer vaccines. Assets obtained at today's event will be provided to the media. If you are interested in receiving these, please contact genesis@webershandwick.com.About Genesis HealthCare Genesis HealthCare as a joint stock company with its subsidiaries, on a combined basis, including one of the nation's largest post-acute care companies, providing services to more than 325 skilled nursing facilities and support/senior living communities in 24 states nationwide. Genesis subsidiaries also provide rehabilitation therapy to approximately 1,200 healthcare providers in 44 states, the District of Columbia and China. References made in this release to Genesis, the Company, us, us and ours refer to Genesis Healthcare, Inc. and each company who is whos who is who whos whos it is. The ability of the PBX cloud to provide users with seamless connections across the globe with minimal disruption allows organizations to enhance their performance and enhance their profits. NEW YORK, Dec 23, 2020 (GLOBE NEWSWIRE) - Reportlinker.com Announces U.S. Cloud PBX Market Forecasts to 2027 – Impact and Regional Analysis of Businesses and End users - Because of an effective communication like audio/video conferences and web conferences considered an important asset in business, implementing phone system operating on the internet, not only facilitating and better but also reduces the cost of ownership, adding to factors that have affected demand growth and are expected to continue during the forecast period. In terms of enterprise size, the enterprise segment has just led the U.S. cloud PBX market in 2019.Small and medium enterprises are considered the ideal customers of cloud PBX systems for many reasons. One of the main reasons is the implementation of enterprise-class phone system features at a lower cost. Cloud PBX is budget-friendly for medium-sized businesses as companies pay only monthly fees, including phone service, phone system apps, as well as devices, instead of owning and maintaining their own PBX systems. Moreover, cloud PBX provides online PBX management tools that allow companies to make changes to the phone system without having to call the provider. The overall U.S. cloud PBX market size has been derived using both primary and sub-sources. To begin the research process, full-level research was conducted using internal and external sources to get market-related meatholy and quansy information. This process also serves the purpose of collecting overview and forecasts for the market for all segments related to the region. In addition, many major interviews were conducted with industry participants and commentators to validate the data, as well as to get a deeper understanding of the topic. Participants who are often involved in such a process include industry experts, such as VPs, business development managers, market information managers, and national sales managers, along with outside consultants, such as rated professionals, research analysts, and key opinion leaders specializing in the U.S. cloud PBX market. Comcast Corporation, Microsoft Corporation and Avaya Inc. are among the key companies operating in the U.S. cloud PBX market.
