## Dual app samsung snapchat

Samsung is one of the few Android OEMs to allow its users to run multiple instances of the selected number of messaging apps. Here's how to enable it on the Galaxy S9 and S9+... Steps to using multiple instances of messaging apps on Samsung Galaxy S9 & S9+ Enable Dual Messenger

Enjoy 1. Turn on Dual Messenger Launch the Galaxy S9 settings menu by pulling down on the notification tray and clicking on the gear icon. From there, find the more features option, and then locate Dual Messenger. In this submenu you will see a list of applications that work with this feature. You'll need to turn on the switch next to each item so that the second instance of the app is added to your Samsung smartphone. 2. Enjoy, you can use Samsung's Dual Messenger feature with Facebook, Facebook Messenger, WhatsApp, Snapchat, Skype, Viber and Telegram. The second instance can be identified by the orange shape placed on top of the original app icon. Let's hope this list continues to grow, and perhaps one day include several Google messaging apps. If you have any questions, make sure to leave them in the comments section below or hit me on Twitter. In today's article, I'll show you how to use dual apps on the Galaxy S10 and S10 Plus. Now let's talk about the Android Pie/One UI dual messenger feature. Dual Messenger allows you to use two separate accounts for one app. When you turn on the home screen, a second app icon will appear. From there, you'll be able to send and receive messages to your second account. Make sure you're using separate credentials in the second version of the app you're duplicated. Whether it's his for home or work; you can run the same app for two different accounts quickly and easily. HOW TO USE DUAL APPS ON GALAXY S10 AND S10 PLUS Only specific models and apps are supported with Dual Messenger. To configure Dual Messenger, please see the step-by-step guide below. Go to settings menu Then advanced features Scroll down and then click on Dual Messenger List of applications compatible with Dual Messenger will be displayed. Switch the switcher of the program from which you want to use a separate account. Read the Disclaimer. After you have read the disclaimer, click Confirm to continue. Click Install. The second icon of the selected app appears on the home screen. You'll be able to use an alternate account in the second copy of the app. Turn on Select a contact to select specific contacts for the second apps. To use the same contacts between the main and second apps, turn off Select a contact. Now you have successfully installed the second application. Please note: Second icon icon have the Dual Messenger symbol at the bottom right of the icon. Images: SamsungApps like Twitter and Instagram allow two accounts to be logged in at the same time, but if you want to use two different messaging customers on the same device, you're often out of luck. In the case of things like Facebook Messenger, Skype and WhatsApp, you have to sign out of one account to use another. This means that whenever you need to use this working Skype account to call or let your child sign in to Facebook Messenger so they can chat with their pals, you click on an annoying roadblock. If you accidentally purchased the Galaxy S9, Samsung has added a new feature that makes it all a little easier: Dual Messenger, which allows you to install two versions of exactly the same app on your phone. This means that you can stay logged in to both accounts and use each version of the app just as you normally would. It's obviously not something everyone will need or want to use, but if you're having trouble signing in and signing out of a particular messaging app sooner, it could be a welcome feature addition. When you turn on S9 for the first time and start installing the app, you'll be prompted to add multiple instances of messaging apps. You can also access this yourself by moving into Settings, then Advanced Features, then Dual Messenger.Screenshot: E.PriceTeplok works for Facebook, Facebook Messenger, Skype, Snapchat, WhatsApp, Viber and Telegram. In the menu, you just need to rewrite the feature for the apps you want, and an additional instance of the app will be added to the home screen. The second instance of your app will have an orange triangle in the lower right corner with two circles. I highly recommend keeping them quite far apart, so you don't end up accidentally running wrong and for example accidentally posting personal status on a company Facebook page you also manage from your phone. For me, that means saving my personal accounts to the Edge menu of my phone and my work accounts captured in the Home Screen Work folder. Go with any work for you, but make sure you keep them organized to avoid any random snafus. And here's hoping samsung actually lets you rename them in the future. If you have two social media accounts and want to use each one as a separate account, you can use the Galaxy Note10+ Dual Messenger feature. In order to use this feature, you need to make sure Dual Messenger is enabled. You can then add a second account so you can send and receive messages. Necessarily another set of credentials for the second account. This is useful functionality, whether you want to use personal, business or both accounts simultaneously quickly and easily. Only certain programs are supported Dual messenger function. Some of the popular apps we know support this feature include Snapchat, Facebook, Viber, Facebook Messenger. It's easy to set up the Galaxy Note10+ Dual Messenger feature. Follow these steps to do this:Open the Settings app. Tap More features. Scroll down, then tap Dual Messenger.A-compatible dual messenger apps. Switch the switcher of the program from which you want to use a separate account. Read the Disclaimer. After you have read the disclaimer, click Confirm to continue. Click on Install. The second icon of the selected app appears on the home screen. You'll be able to use an alternate account in the second copy of the app. Turn on Select a contact to select specific contacts for the second apps. To use the same contacts between the main and second apps, turn off Select a contact. Now you have successfully installed the second application. The second icon will have the Dual Messenger symbol at the bottom right of the icon. Dual Messenger is part of the settings, so it can't be uninstalled or disabled. It won't use any storage space unless you use it. If you're one of the users who's encountered a problem with your device, let us know. We offer solutions for Android-related problems for free, so if you have a problem with your Android device, just fill out a short questionnaire in this link and we'll try to post our responses in subsequent messages. We can't guarantee a quick response, so if your problem is time sensitive, find another way to fix your problem. If you find this post helpful, please help us by spreading the word to your friends. TheDroidGuy has a social media presence, so you can interact with our community on our Facebook page. Using multiple shitodobi files for a single app is a feature many people require, often to switch between work and personal accounts. Apps like Instagram make it easy to switch between accounts, but functionality isn't uniform across all platforms. Facebook, WhatsApp and Snapchat allow you to sign in to one account at a time, so switching between identities involves edging around and re-entering your credentials over and over again, which can become cumbersome if you need to switch frequently. As a workaround, some manufacturers allow you to run two independent instances of the same program at the same time. The feature has been around for a while on Huawei and Xiaomi devices. Stock Android is devoid of such a feature, forcing people to rely on third-party solutions like Parallel Space. Samsung has introduced its Dual Messenger feature in Oreo that may seem a little late, but we'll take what we can get. Previously, it was necessary to install a separate instance of the program in a safe Samsung folder to achieve a similar effect, but now it is much easier. On the Galaxy S9 and S9+, you can even limit the limit contacts that are shared with a duplicate version of the app, something that should make its way to the Galaxy S8 with a software update eventually. For unknown reasons, dual messenger support does not apply to apps that initially support multiple accounts. It would be nice because launching a new instance of the app is much easier than switching accounts in the app. Some apps that work with Dual Messenger include Facebook Messenger, WhatsApp, Facebook and Snapchat, with support for additional apps coming soon. The Dual Messenger option is hidden deep in settings. Here's how you turn it on. Go to >Positive settings>>Dual messenger. You will be presented with a list of compatible applications. Just switch the app you want to clone and you're all set up. The app will appear on the home screen with a chain icon in the bottom right corner so you can differentiate between the two. Dual Messenger allows you to use two separate accounts for one app. When you turn on the home screen, a second app icon will appear. From there, you'll be able to send and receive messages to your second account. Make sure you're using separate credentials in the second version of the app you're duplicated. Whether it's his for home or work; you can run the same app for two different accounts quickly and easily. Dual Messenger supports only certain models and applications. To configure Dual Messenger, please see the step-by-step guide below. Below.
