A few years ago, this audience had hardly any titles to choose from, but now there is a wide range of games of this genre. Choose your favorite bowling ball and shoot down all the pins at the end of the alley. 3D Bowling is yet another game that gives us exactly what it promises: the game is as simple as choosing the color of the bowling ball and the field to take a turn. From there, it depends on us to succeed or not. These may not be very difficult titles, but for now we are happy that there are still a few games out there that only require relatively fantastic games not anything else. Simple games to satisfy the 3D bowling title game are all about gestures. The first thing you need to do is place a bowling ball in an area from where you want to roll the ball, then draw the trajectory it needs to follow and finally lift the finger off the screen. The ball will do exactly what you tell him. It should be noted that the controls are отзывчивы, таким образом, скорость и силу мяч будет зависеть как быстро мы движемся нашего пальца по экрану при рисовании его траектории. Для случайных игроков это определено возможность принимать во внимание. Ниже приведены его Основные характеристики: Выбор между 6 различных цветов для вашего боулинг мяч.
