Hip2Sail readers love adventure academy... My old son loves him for 12 years. He hasn't asked to play Fortnite or Minecraft since we got the Adventure Academy. I honestly thought he wouldn't be interested as he was older, but I was wrong. – My 7 y/o daughter has been using it since April and she loves it! She learned a lot of interesting, mostly scientific and social research type things. We just got it yesterday and my 7/almost 8yo loves it! The youngest of 4 so unfortunately he likes things that are a bit mature for him, so I wasn't sure he would think about it. He just kept telling me how much he loved him. Today Today did not even ask to play PS4, he went around this for the Adventure Academy. I turned off the chat feature for him and he doesn't even mind. It's really educational and he's loved all the games he's played so far. Today he made a play on the keyboard. It was cool. Are there younger children? Try ReadingIQ! This post may contain affiliate links. Read my disclosure policy here. Do you have an elementary or high school aged children who love online gaming? This purchase group has expired. We appreciate you in the Co-op! Homeschool Buyers Co-op Always Learn March 21, 2020 Schools are closing, jobs are sending employees to work from home, and everyone is trying to figure out what their new norm will be. With schools sending children home, that means parents are left trying to figure out how to keep their learning, but fortunately there are some great resources out there with free trials. For younger children, ABCmouse is one of the best options, but if you have older kids at home, you'll want to check out the adventure academy's free trial. It targets children between the ages of 8 and 13, and mixes a little more fun with the learning process to keep them focused. Right now you can get a free trial in one month and if you prefer to subscribe to year you can save 49% on a subscription, making it for just \$59.99 for the year. Aimed at slightly older children, the Adventure Academy makes learning fun by keeping it a little more interactive. Adventure Academy can be accessed and used from a variety of devices, including your phone, tablet and computer. It has a video and game focus on learning, and it covers topics in reading, math, science and many others. Kids know how to create their own adventures, and even play with friends. Adventure Academy is more interactive than some others, and kids can even unlock items in the digital marketplace to customize their home and many others. Each topic is covered deeply, with scientific classes covering power, movement and atoms, the focus of linguistic art is based on language development, comprehension and spelling. For maths, children learn division, multiplication, word problems and geometry, and there's a lot more that kids will learn along the way. Don't forget to check roundup all the best online learning websites you can use for your kids now. Ngo.
