Review Breakdown Fully Version Mod Version RAID Shadow Legends Mod Apk V3.10.0 For those who are fans of fighting games, NEKKI's Shadow Fight series has become an iconic hit on mobile. Shadow Fight 3 will give you the most intense arena with beautiful 3d animations. Speaking of the fight genre on mobile, we can think of a lot of different names. But for long-term players, they always have a good memory with Shadow Fight. This is a game that comes from a version produced to be played as a flash game on a website platform. At this point it has had its own successes but has yet to create a style and resonance. It wasn't until the second was released as a separate game as it was successful. It wasn't until a few years ago that this product was so popular that NEKKI released its third installment. Improvements in graphics, characters and game playback; make Shadow Fight 3 a completely separate part. It's not due to the old gameplay in Part 2 but gives a whole new feel. But you still feel that it has some kind of intimate effect that you can instantly recognize. In fact, NEKKI continues to succeed with part 3 of this mobile fighting game. The fighting style is completely different from old versions of Shadow Fight 3, players will be allowed to choose a character and fight with their strength. That means that for this part, your character has characteristics already. Your mission is to continue to develop these strengths and make them able to fight harder. For some part, players will play the role of a heroic character whose mission to save the world from danger. Players are no longer the same shadow they have taken on their own form. Shadow will be a special kind of power that you can call when needed. This fighting style retains what is special about part 2 but applies a completely new mechanism to it. Players who come to this part also do not need to experience the previous part but can still play it separately. Miscellaneous weapons arsenal with a lot of choices that make up the fighting style One of the elements that make the franchise of this series is the weapon. Each character has its own strength characteristics, but their fighting style is adapted according to the weapon they use. Each weapon has a different way of using its power. You can wield a large and heavy sword with attacks that do a lot of damage, can strike safely from long distance, but strike quite slowly. You can also use sticks with max attack range but small damage. The downside is that your opponent just needs to get close enough that you will be at a disadvantage. Chains also have the advantage of long range but contain movements that are difficult to use to the fullest extent. In general, the arsenal contains hundreds of things with powers that you can use depending on your fighting style. Choose yourself a suitable weapon and use it many times to become familiar. How weapons work In this arsenal system, there is a pretty special feature is the repetition of fighting style. This means that some weapons will have the same characteristics when used in real combat. You can use staff and halberd in the same way, but with a slight difference in skill and injury, it does. You can imagine that halberd is an upgraded personnel weapon that you would have to buy at a higher price than in the store. It will immediately give you stronger statistics, but harder to use. When you play this game instantly, you can feel the difference in fighting style. This variety makes the antagonistic nature of the game special. For those who are just to use staff, they can still use the money they earn to upgrade their stats so that it is as strong as a halberd. This is quite possible so you can be sure. However, the upgrade process will take time to prepare. If you still insist on using that weapon, you'll have to wait a while. The higher the state level up, the longer it takes to wait. Other equipment also affects the way to fight In addition to weapons, other equipment also makes this game different. You can buy them armor to increase your Defense power. The fact of this game shows that you can only protect the body in armor, but not increase the general statistics. You need to buy additional helmets to protect the

head. Vambraces, Cuisses are used to reduce the opponent's injuries to the arms and legs. In general, if you want to protect certain parts, you need to buy equipment to protect that body part. Since these items also increase attack power, you can be sure that there will never be a lack of damage. These items usually have no side effects. But some special equipment has been added to the effects. For example, the bleeding effect if you hit a critical hit, the stun effect when you hit the head, the effect increases the injury after you take a critical hit, ... Generally, this app will give you some advantages in battle. Combat.
