The music is unique, beautiful, fits the level perfectly and is often close to tears. The visuals are beautiful, lively, attractive, and in my opinion, the best I've seen in many games. All in all, the music and visuals are masterful. If I hadn't broken up I'd happily give developers my money and pay for the jewels, and probably even an extra free thing, not because I ran into any extras (I haven't seen the supplement yet, except for the store, if it counts as an add-on), but because they deserve it. If they've spent so much time and effort with this masterpiece, they can have my money. But, I'm broke, so of course, I'd be totally fine with funding them by watching adds. Only add-ons are never loaded. They just say preparation and I haven't been able to move on because I don't have the money, jewels and accessories that would allow me to temporarily 'own' the level. I really love this and I want to keep playing, so if developers can fix that add/video problem that would be great. Maybe it's just a problem for me/ my phone. Either way, I recommend getting this game, it's nice and in every way amazing, you won't be disappointed.
