Free diy wood craft projects

Home Skills WoodworkingWant to Build Something New? Check out these attractive, useful projects you can build! The best part is that they do not require a complete workshop and years of woodworking experience, just a few common tools and some old-fashioned elbow fat. 1/20 Family HandymanSlice, dice and serve in style on this lightweight, attractive board. We'll show you an easy way to dry the pieces, write the bow and then paste everything together. I used a 4-foot steel ruler to scribble the springs, but a yardstick or any thin plate would work as well. Find full instructions about this woodworking craft project here. Be sure to use waterproof wood glue, and keep the board out of the dishwasher or it might fall apart. And one more thing: Keep the boards as evenly as possible during glue-up to minimize sanding later. For great tips on wood bonding, see this collection. 2/20 Family HandymanBuild this handy chair in an hour and park it in the closet. You can also use as a step to get to the high shelf. To make storage shelves, all you need is a sheet of 4 ft. x 4 ft. of 3/4-in plywood, wooden glue and a handful of nails finish 8d. Cut the plywood pieces according to the illustration. Spread the wooden glue on the joints, then nail them together with 8d nails. First, cui through the back parts. Then nail through the top to the sides and back. Finally, mark the location of the two shelves and nails through the sides in the shelves. Don't have backup space? Build these super simple wall-mounted organizers shoes instead! 4/20 Family Handyman Store shoes on the floor in clean, natural wood shelves. This simple storage system can handle everything from winter boots to summer sandals without mud accumulation or scuff marks on the wall. Build one to share or one for each family member! Find full instructions for use here. For wet shoes and boots, we recommend this attractive, simple-to-do tray. 5/20 Family HandymanNeed extra places in a hurry? This simple bench, based on the classic design of author and ecologist Aldo Leopold, can be built in a few hours, even if you are a novice wood worker. All it takes is two boards and 18 screws, for a cost of less than \$25. You will find the simple instructions to guide here. Have you ever wondered if you can stain treated wood under pressure? The answer is, yes. Here's how! 6/20 Family HandymanDive back and knees a break with this portable, easy-to-build chair/step chair/toolbox/work surface. It only takes a few hours to build you'll find dozens of uses for it. See the easy-to-follow instructions here. If you're looking for a small bench/step chair, which is a little more attractive than this, here's one for you to consider. 7/20 Family HandymanNeed a good way to archive magazines and other important works? Build these simple storage bins and have all the favorites at your fingertips instead of lost in a towering pile. You can build four bins from a 2 ft x 4 ft sheet of 1/4-in. plywood and two 6-ft long 1x4s. And cutting wood is easy with a puzzle or saw strip. 8/20 Family HandymanClear up entryway clutter with a simple coat and hat rack that you can build in about an hour from a 6 ft. 1x4 and coat hooks. Cut the tiles to suit your space, paint them, outfit them with different types of hooks to suit your needs and then screw them to the wall. Check out the detailed instructions to-to-to here. You'll find hooks in a great range of styles, colors and prices at hardware stores and online retailers. For inspiration, check out these smart and unusual coat hooks. 9/20 Family HandymanThis spice rack will keep your favorite 18 spices on alert ready. It's quick and fun to make and fits into a standard kitchen cabinet. You will need: An 11-1/2 inch for glass indentations. Center and track the smaller disk above the larger disk. Then, with a drilling press, 3/8-in drilling holes deep on the 12 central lines with 1-7/8-in. Forstner bit, spacing them between the outer edge of the disk and the circle drawn. Then divide the smaller disc into 60-degree feathers and drill six more 3/8-in deep holes with the Forstner bit. Drill four deep holes of 5/8 in., 1/2-in. on the large disc, inside the drawn circle. Then use 5/8-in dowel centers to transfer the hole locations to the bottom of the small disk. 1/2 in. deep holes on the bottom of the small disc and a 1/2 in. deep hole in the center of the tip for the handle of the dowel. Glue in dowels to join the discs, then glue into the handle. I drilled a wooden for a handle button, but a ceramic screw button also provides a comfortable, attractive grip. Apply a finish to fit the cabinets, then the center and screw the lazy sesame wearing under the large disc and play the bottle spin. 10/20 Handyman FamilyIf the spices are stuck in a drawer with only visible tops, this nifty rack that glides neatly into the drawer will solve the problem of pantry storage. And it only takes an hour to build. Make it with 1/4-in scraps and 1/2-in plywood. Or build a rack of drawer spices on two levels. 11/20 Family a bit of nature inside with this simple branch-supported shelf. Find two forked branches about an inch in diameter, with a relatively straight side that will stay in color to the wall. Find all the simple instructions for using this shelf And for a lot of suggestions and tips on hanging shelves, check out our guide. 12/20 This nice knife block is quick, easy, fun to build and includes a 6-in. wide storage box for a sharp knife. To build one, you only need a 3/4-in. x 8-in. x 4-ft. hardwood plate and a 6-in. x 6-1/2-in. 1/4-in piece. hardwood plywood to fit. Start by cutting a 10-inch board length and putting aside. Rip the remaining 38-in. board to 6 inches wide and cut five evenly spaced saw 5/8 inch deep kerfs along a side. Crosscut board slotted in four 9-in. pieces and glue them into a block, taking care not to slop glue in saw kerfs (you can clean them with a knife before the glue dries). I saw a 15-degree angle at one end and I screwed the piece of plywood under the sloping end of the block. Cut 6-1/2 inch x 3-in. cover the scrap on board, and slice the remaining piece into 1/4-in. thick pieces for the sides and end of the box. Paste them around the plywood floor. Cut a rabble on three sides of the lid so that it fits perfectly on the box and drill a 5/8-in hole. for a finger pull. Then just add a finish and you've got a nice, useful gift. If you don't have time to make a gift this year, consider offering to do something for the person. You could offer to scut their knives! 13/20 The HandymanHere's family a great gift idea that will attract the rages. The joints for this step chair are made with precision in seconds with a joiner plate, but don't tell your admirers. You will also need a power saw to cut the plates and a puzzle to reduce semi-circles in the risers. Get the full project instructions here. 14/20 Family HandymanThe space behind a door is a storage place that is often overlooked. Build a set of superficial shelves and mount it on the wall. Materials cost around \$40. Take the designs of the project here. Locate the studs. Drilling holes clearance and screw shelves to studs with 2-1/2-in. wooden screws. Put a rubber bumper on the frame to protect the door. Don't have an electronic stud finder handy? Learn to locate studs without a stud finder here. 15/20 To keep the ironing tools handy, but under your feet, make this ironing center simple in a few hours for some small room organization. All you need is a 10-ft 1x8, a 2-ft. 1x6 piece for shelves, and a pair of hooks to hang the ironing board. Cut the back, sides, shelves and top. Align the sides and measure from the bottom 2 inches, 14-3/4 inches and 27-1/2 inches to mark the bottom of Before assembling the unit, use a puzzle to cut a dog's ear 1 inch. x 1 in. at the bottom of the sides for a decorative touch. Working on the side at a time, glue and nail the back. Apply glue and drive three nails 1-5/8-in. in each shelf, attach the other side and nail these shelves instead to secure them. The clamps are useful to keep the unit together while driving nails. Center the top piece, leaving a two-inch overhang on both sides, and glue and nail it in place. Paint or color the unit and then drill pilot holes in the upper front of each part of the unit and screw into the hooks to hold the ironing board. Mount the shelf on drywall with screwed wall anchors. 16/20 Family HandymanThere's a lot of space above the shelf in most cabinets. Even though it's a little hard to reach, it's a great place to store rarely used objects. Use this wasted space by adding a second shelf above the existing one. Buy enough closet rack material to match the existing shelf length, plus enough for two end holders and middle supports over each bracket. Shelves 12 inch wide is available in different lengths and finishes at home centers and lumber. We cut the supports 16 inches long, but you can place the second shelf at any height you want. Screw the end supports to the walls at each end. Use drywall anchors if you can't hit a stallion. Then mark the position of the middle supports on the top and bottom shelves with a square and drill 5/32-in. clearance holes through the shelves. Drive the screws 1-5/8-in. through the shelf into the supports. You can apply the same concept to the storage garage. Learn to build double-decker garage storage shelves here. 17/20 Five plastic containers, six 2x2s and screws, and one hour of work are all it takes to put together this space saving storage recycling rack. Our frame fits containers that have a top that measures 14-1/2 inch x 10 inches and are 15 inches tall. Our containers were made by Rubberimage.If you use containers of different sizes, adjust the distance between the vertical, so that 2x2s will catch the lip of the container. Then adjust the spacing of the horizontal steps for a comfortable fit when the container is tilted so it looks. Start by cutting 2x2s at length depending on the illustration. Then mark the position of the steps vertically. Drill two 5/32-in holes through the vertical position in each transverse position. Drill from the outside to the inside and angle the holes inwards gently to prevent the screws from breaking on the side of the steps. Drive 2-1/2 inch screws through increments. Assemble the front and rear frames. Then connect them with the side transverse pieces. Want even more space in the garage? Check out these DIY garage storage tips. 18/20 Family HandymanHere is a traditional Swedish farm accessory for gunk-laden soles. The dimensions are not critical, but make sure that the edges of the slats are quite sharp - these are what makes the boot grater work. Cut slats at length, cut triangular openings on the side of a pair of 2x2s. A partialradial arm works well for this, but a table saw or saw tape will also make it cut. Cut 2x2s to length, pre-drill, and use galvanized screws to attach the slats underneath. If prefer a boot vacuum cleaner that has brushes, check out this smart project. 19/20 Books and binders tend to take up a lot of space in an office and are not always in an easy place to get. Solve that by creating a sliding bookend. To corral shelf-dwelling books or DVDs that they like to wander, cut 3/4-in. thick pieces of hardwood into 6-in. x 6-in. squares. Use a tape saw or jigsaw to reduce a slot along an edge (with grain), which is a smidgen wider than shelf thickness. Turn off the notch 3/4 inch from the other edge. Finish the bookend and slide it on the shelf. Do you want to build the shelves? We have complete plans for great-looking shelves here. 20/20 Turn a single 3-ft long, 1x12 hardwood board in some small shelves to organize a desktop or counter. Cut a 21-inch long plate for shelves, break it in the middle to make two shelves and cut 45-degree strips on the two long front edges with a router or table saw. Beve the ends of the other plate, cut dadoes - the canes cut into wood with a router or a table saw with a dado blade - cross-wise (cut a dado on the scraps and test-fit shelves first!). Then cut into four narrower tiles, two to 1-3/8 inches wide and two to 4 inches. Finish, then assemble with brass screws and finish washers for one of these lightwood projects. For expert advice on how to finish wood, check out this collection of tips. Be sure to check out our Saturday Morning Projects for more inspiration, would be coasters in the video below: Originally Published: March 18, 2020 2020
