Rolling Sky 3.4.5 Update: Let's travel to Kepler! New level: Listen to music and walk around the planet! More Hub Video Download Video 2.0.5 Video Downloader Pro Designer Hub Video Loader-Private download video 2.0.5 Video Downloader Pro Designer I love this game. I would say that in this category of games: sensory sensuality, memorization, and complex complex you are the second most geometry dash, but it's only because of two things. First of all, it's not that important. Robtop took time to make their game much more gameplay. You do new levels all the time, which is great, but you have to watch videos, or use the keys to constantly unlock the level, which becomes really annoying because once you beat all the levels you can, there are so many more to play with, but you can't play them from watching the video. In the set of 3.99, I would replace that with unlimited ball lift. Which brings me to the second problem. One of the if not the main reason geometry dash is better than rolling the sky because you don't have to wait, or watch the video after you run out of balls. In the geometry dash, you get to play until you're bored, without having to wait like three or four minutes to play again after losing 10 times. Those are my two requests. 1) Remove unlimited balls like add to the purchase, so that people who want to get really good at the game, but don't mind adds can just keep practicing. Second, replace the unlimited balls add to the purchase with full access to each level. That's all you have to do to get this game better than the geometry dash. Aside from these two challenges, it's a big game. Oh, and do something about the lag. See how good your reflexes are with this high tempo game! Rolling Sky is here and ready to test your speed skills by giving you fast and challenging levels that will keep you entertained for hours. Named the best game of 2016 on Google Play, this game will push your reaction time and make you exceed and improve your current reflexes and skills. The goal is to control the ball and surpass each level. As you progress in the game, the levels you increase its complexity and become faster, so be prepared to move! With amazing 3D effects, you'll experience numerous challenges and barriers before you conquer the world! The gameplay of Rolling Sky is very intuitive and easy to master. Designed specifically for mobile devices, you have to drag the ball left or right and avoid all the obstacles that come your way without even falling off the track. Each level comes paired with a song and you have to maintain a rhythm while you check your speed and try to pass each level. There are several features that improve your experience. With one touch control, you only need to do simple operations and that really matters how fast you make them. There are also rich scenes such as Cosmos, Inferno and Forest, among many others for you to try, all designed in 3D and with 3D effects. Download Rolling Sky now and check out the reflexes of your and your friends! Skate at full speed and avoid Several online mini-games with voxel watch Enjoy Gamecube and Wii games on your Android Select your favorite song and play it on your Android Mission device and events filled with mini-games and vehicles Official Official Indian blockbuster Climbing the Hill at full speed where the Angry Birds saga started Snow Bros 2 Get down and dirty as you cover your opponent with snow to win! Win!
