## Nascar speed week 2020

NASCAR officials invest a lot of time and energy inspecting each car to make sure it conforms to technical regulations. These inspections occur several times during the race weekend: before the first practice, before qualifying, after qualifying if a driver wins the pole position, just before the race and immediately after the race. What exactly are NASCAR officials looking for? In the NASCAR Nextel Cup Series, inspectors examine: Advertising The body of each car, using a number of templates. The insoles are aluminum shapes that fit and measure specific aspects of the car, including its length and width. The height of each car is also measured to make sure it is at least 51 inches off the ground. The weight of the vehicle full of fuel, oil and water (but without driver). Cars must weigh at least 3,400 pounds, with at least 1,600 of those pounds on the right side. Clearing the ground at various points along the length of the car, ensuring that a car does not sit too lowThe engine specifications of each car to ensure that the compression and displacement ratio adhere to the regulationsThe safety features of the car. In particular, inspectors look at seat belts and window networks to make sure they are securely connected and working properly. Interestingly, NASCAR has no rules governing how drivers compete on the track. However, there are un-spoken rules, known as gentlemen's agreements, that most drivers follow. Knights agreements are based on honoring all drivers to compete with a certain amount of respect and courtesy, but as you can imagine, some drivers fulfill these agreements more than others. NASCAR can penalize a driver for rough driving, so even bad guys have to be careful not to go too far. How drivers behave at pit stops is a different story. Pit stops are one of the most regulated aspects of a NASCAR race. It begins when a driver exits the race on pit road, which is a separate road parallel to the main track. Pit roads have set speed limits -- typically 35 to 55 miles per hour -- so a driver must brake or risk being penalized. You should also park your car completely inside the pit stop designated by the team, which is marked with yellow lines. If your car needs repairs or is leaking liquid, you must go behind the wall of the well that separates the pit stop from the equipment storage area. Otherwise, for tire changes and/or fuel spare parts, you can stay in front of the wall and let the the working well of its magic. Only seven crew members can pass through the wall to service a car. There are two tire changers, two tire carriers, a jackman, a gas man and a catch man, who collects any gas that spills while filling up the fuel cell. NASCAR rules state that a team can use only two air guns and one jack per stop. NASCAR officials cover rule changes and other important information in the two hours before each race. The chief crew and driver of each team are required to attend. If the meeting is lost, the driver automatically starts the race in last place, even if he qualified for pole position. Stocks opened lower Wednesday morning as traders awaited the final results of the Georgia Senate election, which will determine control of Congress and shape policy decisions for years to come. The Fluorine Elementary Report - Global Market Trajectory & Analytics has been added to the ResearchAndMarkets.com offer. Anzeige\*101 investLead yourself for your comments. The study learned all its end points with statistical significance. The European Union (EU) has carried out a months-long shopping campaign to secure vaccines to combat the COVID-19 pandemic. In June, the EU created a team of experts from the bloc's 27 member states to negotiate together with vaccine manufacturers the advance purchase of COVID-19 plans, with a budget of about 2 billion euros (2.4 billion euros). This followed criticism from member states in Germany, France, Italy and the Netherlands, which that month had reached an agreement with AstraZeneca on the supply of up to 400 million doses of its vaccine candidate. Mit diesem simplen Tipp können Sie beim Hörgeräte-Kauf 1,500 € sparenKim lauded party party to ensure stability during the pandemic (Bloomberg) -- The volatile South African currency caught Citigroup Inc. in a misguided bet in one day. The New York-based lender recommended a short dollar position against the rand on Monday, betting that the South African currency would strengthen alongside emerging market peers as uncertainty around fiscal stimulus in the US weighed on the dollar. Instead, the rand sank more than 2% this Tuesday as traders worried about a resurgence of coronavirus infections and the possibility of tighter lockout restrictions in South Africa, bringing it above the level at which it triggered a halt in the position. The odds were already stacked against trade, based on historical data. The rand has weakened against the dollar in January in seven of the last 10 years, according to data compiled by Bloomberg. It takes a brave analyst to bet against appreciation of the dollar against 'the rattler' in January, said Warrick Butler, the Johannesburg-based head of currency trading at Standard Bank in a note to clients. That's the nature of the beast, he said. Citigroup strategists, including London-based Luis Costa, entered trading at 14.52 rand, pointing to a move to 13.57. Instead, the currency weakened past the standoff level of 15.05 on Tuesday and extended the decline on Wednesday, sliding 0.9% to 15.1290 by 4:27 p.m.m. in Johannesburg.Costa did not immediately respond to Bloomberg's message seeking comment. The next levels to consider for the dollar-rand cross are 15.15 and 15.35, with a breach of the latter sign of further losses until 4.10pm, said Butler.READ: Cit Comes in short USDZAR Trade on Rand Outperformance hopes (Rand Move Updates in sixth paragraph)For more articles like this, please visit us at [bloomberg.com](http://bloomberg.com)Subscribe now to go ahead with the most reliable business news source.©2021.
