Mod pac man in minecraft

Homepage » Minecraft Mode » Horror Pacman Mode 1.7.10 Author: Void │ September 29, 2016 │ 75,940 View Horror Pacman Mode 1.7.10 Mafia going around endlessly trying to destroy everything in its path! Pacman has tons of custom AI and a lot of future planned AI! His main purpose is to stay away from CrazyCraft 3.0 but we wanted to offer it in a separate mode because it offers some really fun moments combined with all the mods! There is 1 mob in the current mode and it's Pac-Man! Pacman has tons of custom AI and I destroy everything for you and I will also include future additions! Pac-Man Boss Attack: Crisis and Spit: This attack is where Pac-Man will grab the player, eat and start crunching him and spit him out. He can throw you in the air causing some serious fall damage when he pits you out! Chomp Chomp: This is where Pac-Man can choke you away and play with his food! Toxic Spit (Future Ability): He will collect his saliva and slow them down and spit on addicted players! Elastic Tongue (Future Ability): Pacman can create a chomp chief by stretching out his long gun tongue and wrapping it around the player's body and pulling it closer! Pac-Man Unique Features: Kia System: Pac-Man is hungry, but not always! Pacman has a hunger system that fills himself and once he's full, he sleeps! Different blocks, mobs and players all have different values that will fill Pac-Man. When Pac-Man is full, he will sleep and not be aggressive. Be careful because it won't be long before he's hungry again! How pacman decides what to eat in order if all of the following are around (Player>Mob>Wood>Waves). This means that the player is nearby and the mob backs themselves for Pac-Man to follow the player instead of the mafia! Sedate System: If no one is around, Pac-Man goes into hibernation. This means he will be reduced to a small little ball. This is a useful thing to pull a sneak attack on people if he wakes up from his hibernation and can't see him! Unique Boss Drop System: When you defeat a pacman he will drop 6 random items even if they are motorcycles or not so you can get a big buta! Mount System: Pac-Man can't be tamed, but it can be equipped! That means he can saddle Faa'man and go for a ride while he chokes away. You can't control where he goes and you can enjoy the ride! Custom Size and Difficulty System (Future System): This Pacman will have a different size and the bigger he is, the more damage he will deal with and the more health he'll have and the more drops he'll have!
