Terms of Service: Policy: any questions and opinions, please contact us at help@zuuks.com__ MB Travego X. - New bus terminals added. - New radio channels added. - Important changes have been made to ultimate league bug fixes. We need longer routes, scenarios like fare diverters and catching broken bus passengers, as well as the crashing bus and the ability to get off the bus and walk around. I don't think you should have to go out to the main menu when you finish a route, it would be more fun to be able to enter the terminal and create a new route on a computer. I have no problem paying for multiplayer, but multiplayer should not be limited to one route at a time, you should be able to see other players who are on different routes. The ability to travel internationally and cross borders would also be fun. In addition, passengers should not complain about needing the bathroom if there is a toilet on the bus. And the traffic lights need to be fixed, they change very fast and you still get a fine even if you're already going through the lights, but still at the junction. Finally, roads, gas stations and terminals are repeated too much on different routes, it would be more realistic to see different roads for different routes. I also think there is a lack of junctions in the cities and entrances / exits to the highways. Overall, this is by far the best public transport simulator available on mobile, but I'd love to see things of these things (or at least some of them) implemented in the game. This game is very good! I've been with him for a few years and I'm still in it! I'm just an attractive game and as soon as you get the game you fall in love with the game! But if I could improve the game I would improve that the game is so demanding about being within the green line and that customers are so bad! And there are 3 more things that there could be smaller buses more pick up seats and finally the control panel and the brakes could be sharper because now they are taking too long to really work! I also like the fact that radio is real life streaming radio! I like to listen to the radio and enjoy playing this game so having this feature is the whole world for me! So I How to multitask! Thank you so much for so much xxx I recently just bought the ultimate bus pass which is very good value: costing £5. It includes a fun multiplayer that you can play with friends (only who bought it), but overall it's a decent addition. Also, I can say that the graphics are impeccable, with many different options to choose between maps that look very realistic, in fact these maps are probably the best maps I have ever seen in the App Store. Although some people might say that buses are boring or why you play this game, they are completely wrong... Not only can you have fun, but also you can be a suitable bus driver with the ability to reiterate many different indoor and outdoor options. The reason I rate this as a 4 star is because there is some room for improvement: how to add more details tourists or people boarding your bus, and they could do with correcting some problems with traffic. But, I think overall this game is a good start for someone who would like bus careers. @ Developer, Zuuks Games, indicated that the app's privacy practices may include data handling as described below. Route[edit] [edit font] At the beginning, the player will create a Route. It must select departure location (FROM), destination (TO) and arrival time (TIME). After selecting this basic route setting, it will automatically count travel time, tour distance, and fuel charges. In addition, the price of tickets sets, but the player can change it. Then the player can also set the buffet (food on the bus). Finally, when players tap Accept, a player can choose, who will go on a route as a driver (player or NPCs). Tickets on sale[edit] [edit source] After the route is being set, the player will need to wait 15 seconds (first 3 routes) up to 1 minute and 3 seconds (others). A player can skip this for 1 Gold or by watching a video. When the time drops, the game will wait 5 seconds and then the player can press the Start button Go. So he's going to start driving. All current routes[edit] [edit source] This list contains all routes, which go out. Community content is available in CC-BY-SA unless noted otherwise.
