Yes, it will cost you a little money, but there are plenty of benefits over traditional DVDs and illegal downloads. Streaming Services There is a litany of options for watching content online. One of the more popular methods is to use online streaming services such as Netflix, Hulu Plus, or Amazon's Prime Instant Video. Those services charge a monthly or yearly fee and give you access to a lot of content, although there is always a possibility that certain movies you are looking for won't be on any streaming service you have. The content of this service has access to constantly changing as it makes new deals, so you don't get stuck with the same option month after month. The aforementioned service is also great for watching TV and has started making their own original shows to compete on the TV market. Most of those shows, such as Netflix's House of Cards and Orange are The New Black, have got glowing reviews. There are several limited options for legitimate and free online streaming. Crackle is a website that offers movies and TV shows to stream for free, but it's supported for ads and you'll eventually see about as many ads as you'll be watching programming on the cable. The amount of content Crackle offers is also a slimer selection of subscription services, since the site doesn't have the financial muscle to make giant content purchases like bigger sites, so it may be harder to find your favorite movies. for online streaming services are you at the mercy of the content offered by the company; You can't just pick any movies in the sun and are guaranteed to be able to watch them. You also don't own a movie, so if Netflix gets rid of your favorite movies, you'll find yourself unable to watch it. Download one way to have a movie and watch watching online is to download it. Whether you're a Google or Apple fan, both iTunes and Google Play stores offer movies to buy through accounts that belong to you. The new release costs around \$20; approximately the same price the DVD will cost, even if a digital copy cannot be lost or damaged. Of course, buying individual titles to own is more expensive than paying a small fee for streaming services and gaining access to content oodles. Both iTunes and Google Play also offer movies for rent at lower prices. Renting gives you the chance to watch a movie once in 30 days and 24 hours to complete it after you click play. Those options are also great for switching between devices, because iTunes and Google Play will remember where you're in a movie if you're distracted and want to switch from your TV to your tablet or smartphone. Amazon offers movies to buy or rent at the same price point as Apple and Google, and you don't need a Prime membership to access the service. Whether you'd rather own or stream a movie, watching movies online is the way to go if you're sick of dealing with DVDs and Blu-ray discs. There are many safe and not too expensive legal options and allow you to watch all your devices at your convenience. Check out Cheat Sheet Entertainment on Facebook!
