Gotomeeting view everyone

Since up to 25 different cameras can be shared during the session, the screen may start to look busy. You can change the camera filter and location to free up screen space and help you focus on your presentation. When multiple participants share their cameras, you can choose to see only presenter's camera, spoken person's camera, or no camera at all. Just click the Camera drop-down menu in Viewer or Control Panel. Note: Do you see something different? Click here for more information. Everyone – Show all meeting attendees (the initials of those who don't share a webcam are a box). Who's talking – just show me the current speaker. Active Cameras – Show only those who actively share a webcam. Hide Everything – Don't show web tiles. New GoToMeeting session experience If you're a new customer joining after October 1, 2019, you'll automatically get a new GoToMeeting experience. If you are an existing customer, you need to choose from your preferences. Give feedback on the new GoToMeeting experience here. Sign in to your account in the left manu and new experience Use the updated meeting planning box and click Save.The next time you host or join a meeting, you run New GoToMeeting.To return to the previous version of GoToMeeting, click here. You can control your voice at the bottom of the Viewer, in the Attendee list, or with the Grab Tab sound icon. The audio icon lights up green when you're undyed and red when you're muted. Learn more. To switch between computer and phone audio, click the Settings icon. The People pane displays all meeting participants and GoToMeeting controls. Click the Arrow icon next to the participant's name to see all options, including the following: To join, attendees need either a Join URL or a 9-digit meeting ID. You can easily find and copy this meeting information to send. Click the People icon. At the bottom of the People box, click Copy Meeting Link. This copies the paste URL to the clip table, making it easy for you to paste anywhere. At the bottom of the People box, click Invite People. This opens the Invite People window, where you can copy the URL or create an email invitation. Smile! You can start and stop sharing your camera using the Camera icon in Viewer or Control Panel. Learn more. Do you want to preview the camera first? Click the Settings icon. You will immediately see a preview of the camera feed. Show All | Hide everything You can save space on the screen or improve your Internet speed by hiding the cameras you want to share. Click the Camera Feed drop-down menu in Viewer or Control Panel, and then click Hide All. Adjust camera settings You can see advanced webcam settings (zoom, GoToMeeting Settings window. Use GoToMeeting settings and select Webcam from the left menu. Sometimes it is easier to focus if the webcams are on a separate screen. To remove camera inputs from the Viewer window and independently move them around the screen, click the Detach icon on the Viewer's side toolbar. Go back to the top You can share a screen or even a specific app with other meeting attendees. Use the Display button in Viewer or Control Panel to quickly start and stop sharing your screen. Learn more. Watch and Control Panel provides a chat room where you can exchange messages with other participants. You'll be notified if you get a conversation and your chat box is minimized. Select recipients from the Send drop-down menu:All - Send a message only to all meeting attendees Organizers - Send a message only to organizers and co-organizers. Specific Attendee - Send a private message to that specific person. You can save. A rich text file from the chat log by clicking GoToMeeting and Save Chat Log from the top menu. If prompted, select a location on your computer to save the file, and then click Save. With GoToMeeting, you can record meetings (including shared screens and audio) and convert them to a shared format. This allows you to easily share previous appointments with others. Learn more. Click the Save icon in viewer or Control Panel. Use your storage in the following locations:If you're saving to the cloud, find the recording in your online account. If you record locally, Recording Manager prompts you to automatically convert the recording. You can lock a meeting to prevent unexpected attendees from joining the current session. This means that you no longer have to worry about being distracted by extra attendees if the session goes over scheduled time and you have back meetings. Change the Meeting Is Locked switch to On. The Lock icon closes, and you receive a notification when a participant tries to join a session. To unlock and allow all meeting waiters, change the Meeting Locked switch to Off. The Lock icon moves to the open lock. The GoToMeeting menu includes additional features and tools that you can use during a session, including checking audio, editing your name and email, and editing app settings. To access the drop-down menu, click Go at the top of the Viewer or Control Panel. If you want to go back to the old interface, you can do so on the Settings page. See here for more information. Sign in to your account with the left manu and use the updated meeting planning box, and then click Save. Your feedback will help us GoToMeeting's experience and allows us to understand how we can make GoToMeeting more user-centric. Give feedback here. Thank you! Here are a few things you need to know before you join the first GoToMeeting online meeting. You can join a meeting from your Mac or Windows desktop, or from any smartphone or tablet. In this guide, you can guide you to join and participate. MobileGet started with GoToMeeting on your mobile device by downloading the GoToMeeting app from the App Store, Google Play, or Windows Phone Store. Then join the meeting by opening the app and typing the meeting ID that you received by email from the meeting organizer. Learn more about free GoToMeeting mobile apps gotomeeting.com. 1. You will be invited in an invitation email or message with a link to the meeting The invitation also includes instructions on how to use the microphone and speakers (VoIP) on your phone or computer for audio 2. Be ready Join the meeting a few minutes early to make sure you have everything you need If you don't already have the software, it will load automatically and you'll be placed in meeting 3. Join the meeting Click your online meeting link or go to gotomeeting.com and enter your meeting ID If your host needs it, make sure the meeting password is convenient 4. Talk and listen Check the online meeting invitation or Control Panel for available audio options If the dialing option is offered and you want to use it, call with a phone number and address code. Enter an audio PIN if it's enabled You can also use your computer's microphone and speakers (VoIP). For the best user experience, we recommend using USB headphones with this option 5. Know who's talking at the bottom of the Meeting window and Control Panel both indicate who's talking When you speak, meeting participants can see your name if you're connected to a microphone and speakers, or if you called and entered an audio PIN 6. Interact You can mute yourself when you're not talking. The host can also mute you or all participants. If you called on your phone, you need to use an audio PIN to mute the line with GoToMeeting controls The easiest way to share a webcam is to click the button on the grab tab. You can also click the Share My WebCam button on the Control Panel pause and continue your webcam by using the icon in the upper-right corner of the webcam feed If you are muted or don't want to pause the speaker, you can use the chat feature to communicate with the group, host, and/or other individual participants The host can make you a presenter or give you shared control. When you are a presenter, additional controls appear on grab tab 7. Leave the meeting When you are ready to leave the meeting, click the icon at the top of the meeting window (You will be prompted to confirm you want to leave) 8. Try out for yourself See how productive and collaborative online meetings can be. When the meeting ends, GoToMeeting offers you the option to sign up for a free trial to organize your own GoToMeeting sessions You can also visit gotomeeting.com and sign up for a free trial version 9. Need more help? Our support center is available 24/7 to help you troubleshoot and answer questions. What's the difference between GoToMeeting and GoToWebinar? Both products are excellent, but they have different purposes. There are three aspects that determine what you should use: 1. How many people attend a meeting? GoToMeeting only supports 26 people (including you). If you think you have more than 26 people, you need to use GoToWebnar, which supports up to 1,000 participants. (No, it's not a typo.) :) 2. How easy does scheduling have to be? GoToMeeting supports a Quick Meeting (Meet Now). Even if you schedule a meeting later, all you need to do is enter a date and time, and it's ready. GoToWebinar requires pre-planning and scheduling takes about 3 minutes online. Participants must also register (enter their names and email addresses, as well as others in the field you need/want) before they can participate. In GoToMeeting, they just click on the link or enter the meeting number to participate. 3. Need extensive reporting or survey capabilities? GoToWebinar has excellent reporting capabilities. You can see analyses of who signed up, who participated, how interested they were, who took the surveys, survey and survey results and other factors. GoToMeeting provides only limited reports on what meetings and turnouts. GoToMeeting also enables document sharing, remote management of other computers, and conversation. It doesn't support queries, queries, and quick queries where people can easily answer yes or no questions by changing the color of an emoticon. If you need these features, you will use GoToWebnar. Highlights of Citrix GoToMeeting: Very easy to download and use (and faster) Very easy to use (easy to share screen) Can start a meeting from the desktop or Outlook quickly Up to 26 meeting participants can chat, change presenters, and give keyboard control to others (You have to give participants this permission, but it's very easy to do.) You can draw, highlight, or add annotations to a document (you must give participants this permission). No File Transfer feature Record as wmv file or Citrix software file Integrated total sound, including audio over IP Citrix GoToWebnar highlights Requires scheduling (cannot make an instant webinar) The webinar training registration system is Excellent reporting of attendance, participation and interest based on who actually viewed your shared screen during the session Excellent survey features (must be done before, before, They have a QuickPoll feature (using three emoticons). Participants who are assigned as participants cannot chat with each other at the webinar. They can ask questions and answers to organizers and panelists. (Work around: promote participants to the role of panelists. All panellists can talk to each other.) Participants can ask questions of panelists, presenters, or organizers, and the respondent can share the answer with all participants. (Panellists cannot ask for Q from other panellists, but can discuss instead.) Note tools allow you to draw, highlight, point, and laser pointer. A large survey feature that allows you to rate your webinar Up to 1,000 participants No extra phone costs if you use citrix phone service (everyone pays for their own long distance) Can't mute on computer. You can use the phone book to mute all participants or let them mute themselves. Integrated total sound, including audio via IP IP
