Merge dragons wonders sell

The main goal of most players is to get all the wonders of Dragon World. Due to the exponential nature of the merger, this achievement is extremely time-consuming. By reading this guide, you will learn the most effective and best ways to get all the miracles. 5-merge and Dimensional Jars will accelerate your progress for all wonders. Stonehenge is often considered one of the best miracles to get because you get a lot of Miracle chests #1: Remains of the Dragon God [Dragon Trees][edit editing source] Many think it's one of the hardest miracles to get. Get started[edit source] You'll need a lot of space because this insizing chain has 12 levels in it (including seeds, leaves and wonder). Once you have the right amount of space, you can get started! Strategy #1[edit | source edit] (if you have level 2 + glowing dragon tree, go to step 3. If you have a tree 5+ dragon level, go to step 2. Otherwise start from this step.) You will need prism flowers, preferably a lot of prism of flowers from level 3 + . Collect from them and get leaves, then merge the leaves until you get a dragon tree level 5. Harvest from your level 5 dragon tree until you have 5 small glowing dragon trees. (You can get those in a small chance when merging level 2 to level 5 dragon trees.) Pour these so you have 2 Vermillion glowing dragon trees. Harvest from your glowing dragon trees for more and more leaves. Note that you need to keep your glowing dragon trees on level 2 in order to make the chain quickly. You need to merge them (multiples of 5 only) if you don't have space. Strategy #2[edit |] Get tons of stone bricks. You're going to need millions... Buy tons of pearl breasts and merge them with 5s. Open 2 level chests, merging dragon trees with 5, rinse and repeat. Wonder #2: Rainbow [Life Flowers][edit | source edit] This is the miracle that takes the longest to get since it's level 18. That is, this miracle needs a little less than 2000 level 10 live trees to get! Strategy #1 [edit source edit] This is the most effective strategy, but usually it takes 4 to 8 months from finishing the chain. It's going to cost millions of bricks. Do "collect high-level stone bricks. Buy Moon chests (this is also a good way to get the 8th wonder), then merge to get Phobos Chests. Open the Phobos chests and pour all the life flowers. Repeat steps 1-3 until you get the arc! Strategy #2[edit | source editing] This strategy may be slower or less effective. Use a high level of fruit trees and unite these life flowers. You can also Ancient Dragon Skulls can be used to scratch for bones, then scatter the bones and merge them from 5s. They can be obtained by finding them in the camp or from the crates of Daily Treasure. I wonder #3: Ensnared Virtue [weed][edit | edit] Poor Booham was beaten by a sword that lies in the stone of this miracle. Wonder. Strategies will take time, but the first strategy does not require you to spend stone bricks. Strategy #1[edit | edit source] You will need water for this strategy, which can be obtained from misty mountains and cloud peaks, which in turn are derived from the fusion of high-mountain hills. Hold the water until you have a lot of water level 4. Arrange them in a checkered model to get the most effective results. The grass will disperse into the empty spots. Pour them with 5 before they turn into necromantic grass. Continue merging grasses of 5 until you have completed the miracle. Note: if you want to complete the Living Stones Miracle, Stonehenge, you can save a lot of grass from level 5. Once you get a miracle #5, you can resume make the grass a miracle. You can also merge level 4 or less grass on the side while completing Stonehenge. Strategy #2[edit | source editing] This is the less effective way. Buy dangerous crates. They merge them with 5s. Open them and merge the grasses. Repeat steps 1 to 3 until you get the miracle! A way to get your cheese to get the Ennared Virtue. [edit | edit source] The fact that Weed has only 9 levels, this is the lowest level you wonder to get (except for The Last Relic Artifact). To do this, make sure you have enough chalices (20 is good (it takes a lot of time to do it)). However, you need about
