Cut the rope games in order

I love this game more than the others I've played, but I think there are problems with levels of 7-23, when the sweets get to the top of the ant line, it falls into the mouth of the omnom rather than landing in the water where you can tap a green button that connects a string to the sweets (I don't know the term for this button, just that there is a crosshair like a symbol on it). I've played back the level a couple of times seeing if by chance it was a random fluke, but I've got the same results every time. I've got to finish level with one star, but two others are needed to access Chute Bamboo, which requires all 525 stars, which is three stars at each level until that point. Again, this is a wonderful app and I have downloaded other versions and really enjoyed them! :D I just don't want this to happen to anyone else haha. There are walks through the videos I've tried to use at this level before, and in that video they seem to have no problem, is it just my phone? Cut the Rope Series game - 5 in one connection!
