Mailing Address: P.O. Box 519 Heber City, UT. 84032

Your public drinking water supply is safe. The continued delivery of drinking water that meets or exceeds all local, state and federal standards is the top priority of the District. Covid 19 is not a waterborne illness, and the District has state of the art disinfection systems on all water sources. Jordanelle SSD has initiated various preventative measures to ensure the health, safety and wellbeing of the public and its employees. Please call if you have any questions or concerns and thank you for support.

Drinking Water Protections Against COVID-19

State officials say there is no need to stock up on surplus bottled water due to Coronavirus

SALT LAKE CITY – The Utah Department of Environmental Quality (DEQ) wants residents to know that their public water supply is safe. In the case of quarantine or outbreak related to the coronavirus, public drinking water systems are designed to continuously deliver safe drinking water to your tap.

“Drinking water treatment and disinfection has effectively protected Utah’s population for many decades. These protections will safeguard residents against drinking-water-borne viral infections—including coronavirus,” says Marie Owens, Director of DEQ’s Division of Drinking Water. “There is no need for residents to stock up on surplus bottled water in preparation for a potential outbreak of coronavirus.”
