

Construction Notice

Construction of upgrades and improvements to the Kearns Improvement District's 6200 South Booster Pump Station located on 5200 West and 6200 South, is financed by the Drinking Water State Revolving Fund. The DWSRF program is administered by Utah Department of Environmental Quality, Division of Drinking Water with joint funding from the U.S. Environmental Protection Agency and Utah. This project will construct a new multi pressure zone water booster pump station that will provide water service to the developing area within the KID Zone C, D, and E pressure zones. It will serve citizens within Kearns, Salt Lake County, and West Valley City and West Jordan City. DWSRF programs operate around the country to provide states and communities the resources necessary to maintain and improve the infrastructure that protects our valuable water resources nationwide.
