You can also click here to see our latest lists of Android apps and games. YouTube link for mobile viewingsBuy many games. Some are just a dollar, some are a couple bucks, but sometimes I'm just itching to find a really sweet free game to try and mess with. I came across a space shooter for free today, which takes the old retro shooter genre and adds some top characters to produce a pretty fine little game. You take the helm of the USS Eradicator as Commander P. Jefferson, a tough-spoken, alien pilot who wants nothing more than to take out as many foreigners as he can, anywhere. The Commander (and all the other characters you know) are all the characters you've acted with voice, which is quite unique to an Android game, and its voice actors demolish it in the park. Gameplay is just what is expected of a retro space shooter. You control a lonely, small ship against hordes of other alien ships that want nothing more than to get you off the map. Fortunately, most aliens of the grunting variety end up coming out with just one shot of their boat, so you have that advantage. As for graphics, this game is tops. The models of boats are quite detailed considering their size and there is a lot of variety on the screen. From the piles of weapons you'll pick up to the piles of weapons you'll try to avoid, there are plenty of eye candy to keep you engaged. Add in a variety of different environments, some giant space rocks packing (meteors? asteroids?) and other environmental problems, and you'll start noticing how much detail was put into the game. The controls are made through the touchscreen without virtual joysticks. Move your finger along the screen and the boat will follow suit, shooting along the way. Being right-handed. I usually ended up exploding when I had to turn on my left thumb, but with a little more practice, I'm sure I'll be fine. A space shooter for free is quite a rad game, especially considering it's Free. You can unlock more bosses, difficulty levels and weapons for \$1.01 (what about the penny?) by using an in-app purchase you'll see on the main screen. A space shooter for free is also enabled OpenFeint, so for the in the crowd, there is more for you to do. In any case, get the free version cause is awesome. We have to download links after the break. Break.
