Android Auto does not start, or we connect the Lightning cable and CarPlay does not start or the AppRadio mode feature is not yet available. How to do it? Now I'm going to introduce you how to work according to the technology you want. The right door to use. 2. Mirror link. The 2016 range lacks it for all other 2DIN of Japanese manufacturers, but this is still available and therefore I include it. You need to use USB 2. To use AppRadio mode, you must use a different combination of ports. For this reason, you need to isolate the phone you want to use: iPhone.HDMI+USB 1 Android smartphone port. HDMI+USB 2 ports. Another important aspect to consider for correct wiring is the wiring used. On the other hand, while both Apple and Google are studying the most used systems, and it doesn't require accessories other than those already owned for app radio mode where speech doesn't apply. So here's what you need: carplay, Lightning Android Auto Cable/Mirror Link. MHL cable – USB 3.0 – app radio mode for other types. iPhone that are present in slim port or smartphone packages and are charged the same and the same. Light non-cable + digital AV adapter. App radio mode for android smartphones. MHL cable – USB 3.0 – slim port or other type + HDMI adapter specific to your phone. Pioneer 2DIN settings defined above can proceed to explain the true purpose of this guide and its very often pioneer 2DIN Connected model connection technology is the basis of errors and problems. It may seem trivial, but I get contacted by users who I can't find very often and make sure it was enough to check the options. Whatever the navigator or AV receiver, Pioneer places a dedicated menu in the same place and follows the same steps, so this guide applies mainly to each model of manufacturer with the ability to occur small variants when GUI changes, layouts or other settings have the same options. So let's go step by step: put 2DIN off. Home button, select AV and off from here. Models in the 2016 range have off-SRC buttons to turn off source and OFF. Select the first one. Tap the menu with the gear icon in the upper right corner. In the next menu, select the first option at the top left, the system menu represented by the screw drive icon, and the wrench. From here, select Imp. Input/Output Link/Tasto OFF At this point you will find yourself in front of a page with three different settings: and some different manageable options depending on the settings. For all models since 2014 at the bottom, you can have visual feedback of the results obtained thanks to the lighting of some icons. So let's see how to proceed based on the phone you own and the technology you want. iPhone car play car play settings. Device. iPhone connection. USB 1 CarPlay: SI app radio mode device. iPhone connection. Digital car play AV adapter. No Bluetooth audio does not allow the use of smartphone connection technology, but only allows the use of devices such as hands-free, streaming audio and music. Android smartphone settings mirror link Android auto device other (wording is other in old 2DIN) connection. USB 2 Android Auto. SI mirror link devices and other (in the old 2DIN, the wording is other) connection. USB 2 Android Auto. No app radio mode (Nei 2DIN Meno La Distura et Others) Connessione. HDMI Android Auto. There is no La MemoryZazione delle Impostazioni Avella Automatic Allsita del Menu. The Aviare La Hunzione vi Basteller il Tast Home e da Cui Locona Relative Rativase Liscontrathe Cualche problem in Alto a Sinistra dello Shermo made Vostra Disposizione a sono. Pandora Radio has been one of the few apps compatible with various platforms. Even before the presence of Apple CarPlay and Android Auto, Pandora was available on car dashboards through multiple aftermarket head unit interfaces and car infotainment systems. So I thought it would be interesting to see what Pandora looks like on three different platforms I have access to - Apple CarPlay, Android Auto and Pioneer NEX. Take a look below and see the difference. Pandora Radio - CarPlay vs. Android Auto vs. Pioneer NEX Device Use: To demonstrate the difference between Pandora radio interface, I used Pioneer AVH-4100NEX, Pioneer AppRadio 4 (SPH-DA120), iPhone 6 running iOS 9.0.2, and Google Nexus 5 running Android 6.0 Lollipop. 1. Station List 2. Play screen 3 now. Summing up Thumb Up/Thumbdown 1. Winner: The best interface among the three is a matter of opinion. I like the Android auto interface for looks, but for features pioneer NEX interface take the cake. The carplay interface is basic. 2. Pioneer NEX Features: Pioneer NEX Pandora gives you the best user experience. You can create and delete stations, browse by genre, and access system menus from the Play screen. 3. Pioneer AppRadio Mode: Pandora Radio is no longer compatible with Pioneer AppRadio mode. The app will be used in a compatible way some time ago. Well, when you launch Pandora on your smartphone in AppRadio mode, you will see this screen in the head unit. 4. Thumb up/thumb down: Call this knit picking, but it's easier to do it with Android Auto or Pioneer NEX to prefer songs with your thumbs up or down. In CarPlay, you need to tap the small menu/options icon to see the thumb up/down option. In addition, Android Auto has a bookmark option (see photo above) where you can bookmark songs, artists and stations at any time. 5. Phone screen lockout: While using Pandora on CarPlay and Android Auto, you are locked out from using your phone for other things. This may be for safety reasons. On Android Auto, your phone will show you a dark Android auto splash screen, while on CarPlay you will see this screen. Of course, you can press the home button to bring it to the springboard of your iPhone, but doing so will remove the Pandora interface from the head unit. However, if you want to use Pandora with Pioneer NEX, you are free to use other apps if you like. The Pandora interface remains visible in the head unit, but the phone may display something else. This is useful, for example, to get directions. Your phone is mounted on your phone and you can listen to Pandora on the head unit at the same time as using any navigation app on your phone. 6. Overall: Overall, Pandora Radio works the same way as long as streaming is going on all platforms. I didn't run into any specific problems. I have been using Pandora for over a week on all three platforms. Pioneer AVH-Z7100DAB Media Station 1 Din 7' Apple CarPlay, Android Auto, Dub+, Digital Radio, WAZE, Bluetooth, GEQL'AVH-Z7100DAB allows you to go from 1-DIN to 7 total of complete car entertainment in seconds. When a large touch screen opens, this media player can connect to compatible IPHONE or ANDROID phones using a single USB cable and thus control APPLE CARPLAY, ANDROID AUTO and WAZE (via ANDROID car or APPRADIO mode+) from your dashboard. Play DAB/DAB+ digital radio, audio/video content from CDS, DVD and USB devices. What's more, this car player comes with Bluetooth that allows you to stream your music or call hands-free through a wireless connection. Update your music with high-quality audio features: 13-band graphic EQ, automatic EQ, and time adjustment allow you to customize your audio settings to your liking. Among the features that distinguish it: - Apple CarPlay: Make calls, use maps, listen to music, access messages with a single word or touch, and try the best IPHONE experience in a car- ANDROID car: you can use GOOGLE Maps for real-time navigation and traffic information without having to take your eyes off the street, via the interface and simple and intuitive voice commands. BLUETOOTH: Hands-free calling and wireless audio streaming - Maximize connectivity for MIXTRAX EZ: Enjoy party effects with a continuous mix of your music library with DJ-inspired effects and a series of 13-band graphic EQ lighting: adjust audio output in detail for a personalized music experience based on your preferences - SIRI Eye Free Use: Siri on your IPHONE works through the unit's external microphone and your car's speaker display lighting: displays and key lighting adapt to the vehicle's interior lighting with a range of more than 210,000 colors and endless color combinations made for IPOD/IPHONE: Direct control for IPOD and IPHONE, can be managed. Enjoy excellent sound, straight from the car dashboard.- FLAC: Enjoy FLAC digital audio files in your car without losing quality as you were listening to CDS, High Definition.- SPOTIFY: Connect your smartphone via USB or Bluetooth to browse your favorite playlists, albums, tracks and artists conveniently using just the controls of your main unit. - DAB+: Enjoy the convenience of listening to your favorite radio stations in crystal clear digital quality - Checkmark authentication of digital radio: In order to be able to allow the use of marks, manufacturers must meet minimum specifications tested by independent agencies There are all pioneer products that use tick marks are independently tested and approved for increased reliability.- WAZE is a GPS navigation app that provides maps, real-time traffic, and other information about Pioneer's extensive multimedia device display.
