There's a sword and a bow and it's about it, really. Players can hit each other and block with their knives... Mine & Blade: Battlegear 2 will probably make your Minecraft world more interesting as it is a recreation of the popular combat mod for minecraft that is currently being developed. Its main functions are: Providing players with interesting and balanced combat features, including: New Weapons Dual welding weapon Mechanics shield Very high adjustment levels for a certain number of opensource items, which means anyone is free to add a code base mod mechanics: Weapon System / Dual Wielding Mine and Blade 2 introduces a new weapon system to minecraft. This system will allow players to have up to 3 sets of weapons available for those who can be switched to use ? R' key. The system allows players to specify mainhand and offhand weapons (so allow select dual wielding). By default any weapon can be placed into any weapon system and any weapon without a special right-click function can be used double. The mod will also scan even though items for weapons are added by the mod. For further mod support there is an API (check github repository) Items placed in the weapon system in the new GUI are bound to ? When using double, the left mouse button will attack with the mainhand weapon (right) and the right mouse button will attack with an offhand weapon (left) or block with shield Shields Mine and Blade 2 introduces different shield mechanics with normal sword blocks. Shield blocking will reduce all blocked damage taken from the front 120-degree arc. However a player cannot block indefinitely because there is a stamina bar that appears above the normal minecraft health/shield icon. The shield is created as follows When struck by an arrow, an arrow will appear on the shield. Arrows can be retrieved by placing the shield by itself in the manufacturing matrix (arrows will be added to your inventory when you take the shield) Bash shield can beformed by pressing ? Key Z. This will cause any mass in front of you to be repulsed. Using a shield bash will cause you to lose a third of your stamina bar and make you unable to attack for 1/2 second. Weapons & Armour Mine & Blade: Battlegear 2 introduces a new way to get chainmail shields. 3 chain links can be obtained by placing 2 iron ingots in a vertical setting in the craft lattice. Chain links can then be used to create Quiver chainmail shields and Quiver Quiver arrows Are small items that have the ability to stack four times more arrows than a common stack of arrows. It can be made with skins and arrows. You can empty it with a right click. Once you have a quiver filled in your inventory, the bow will drain this item instead of using the free arrows. With the bow equipped, a special bar will appear showing the slot of the quiver. You can switch between slots (and thus, between arrows) with special action buttons. Quiver will also appear on the player's back. There are APIs that allow modders to create their own containers for their own custom arrows, with hooks to customize charm, bow damage, etc. Arrows Mine & Blade Battlegear 2 adds six types of arrows that can only be fired from the quiver. Bows are also rendered differently to indicate different arrows when used. Fire arrows?burn everything. Explosive arrows? Arrow ender?teleportation of things around. Poison arrows?give a wither effect on the hit. Arrows pierced through armor and glass beams. The mystery arrow?has a strange effect. It is said that the skeleton may have gained the knowledge to use the arrow. Mod Update Detector (M.U.D) Mine & Blade Battlegear 2 contains an advanced new mod update detector known as M.U.D. Mod will check to see if you are running the latest version (for the version of minecraft you are using) and let you know if you are using an older version. Pressing the Mod Update Detector button on the pause or pumped screen? Mods? screen or typing the ?/mud' command will take you to the download screen. This will allow you to view the changelog and download then the latest version of the mod (restart will be required) Mod Review. How to install Mine & Blade: Battlegear 2 Mod: Download and install Minecraft Forge Download mod Go to %appdata% Go to .minecraft/mods folder Drag and drop the downloaded jar (zip) file into it If someone is not there you can make one Enjoy mod Changelog : v1.0.5.6 Update to 1.7.10 Fixed invalid attribute when using weapon in left hand Arrow still does not comply with GameRule Add DynamicLight support for light source in left hand Reduced M.U.D chat (with verbose option to configure) Fixed flagpole crash server special Fixed iron for some systems Remapped registry name items for consistency . save the world must be converted without losing arrow quiver to be selected from infinity bow Mod Download Links: To 1.5.2 1.5.2 For 1.6.2 To 1.6.4 To 1.7.2 To 1.7.10 Homepage » Minecraft Mods » Mine & Blade: Battlegear 2 Mod 1.8.9/1.7.10 (Dual Wield, Shield Blocking) Author: nerd-boy, GotoLink | December 25, 2017 | 941,385 see Mine & Blade: Battlegear 2 Mod 1.8.9/1.7.10 adds a lot of new weapons and defense items to Minecraft. This gives you a new armor slot to complement this new weapon giving you the ability to use doubles as well as utilizing shields. This mod allows you to use dual. You can hold two weapons at the same time as you fight or hold the weapon with a shield. There is also a unique blocking mechanics that makes it possible to negate a lot of damage. Not only that, but many new weapons are separate from this mod. Features: Weapon System / Dual Wielding Mine and Blade 2 introduce a new weapon system to Minecraft. The system will allow players to have up to 3 sets of weapons available to those who can be switched using the 'R' key. The system allows players to specify mainhand and offhand weapons (so allow select dual wielding). By default any weapon can be placed into any weapon system and any weapon without a special right-click function can be used double. The mod will also scan even though items for weapons are added by the mod. Items are placed in weapon systems in a new GUI that can be accessed from the main inventory with the top left BG button. When using dual wielding, the left mouse button will attack with the mainhand weapon (right) and the right mouse button will attack with an offhand weapon (left) or block with the shield. Shields Mine and Blade 2 introduce different shield mechanics with normal sword blocks. Shield blocking will reduce all blocked damage taken from the front 120-degree arc. However a player cannot block indefinitely because there is a stamina bar that appears above the normal minecraft health/shield icon. When struck by an arrow, an arrow will appear on the shield. Arrows can be retrieved by placing the shield by itself in the creation matrix (arrows will be added to your inventory when you take the shield) Bash shields can be formulated by pressing the special action button ('Z' by default). This will cause every mass in front of you to be repulsed. Using a shield bash will cause you to lose a third of your stamina bar and make you unable to attack for 1/2 second. Charm can help improve those characteristics. Shields can also be colored similarly to leather armor. The dye is removed by placing a bucket of water in the craft network with a shield. (This can be removed when heraldry heraldry done) Weapons & Armour Waraxe: Although the waraxe does not reduce damage to unearthed enemies than swords, it is better able to cut down armored enemies. Mace: The blunt surface of the mace is perfect for dazing spear enemies: Spears are weapons for those who prefer to poke their enemies from a distance Dagger: Daggers are fast weapons with less damage than Chainmail Armour Mine swords & Blade: Battlegear 2 introduces a new way to get chainmail shields. 3 chain links can be obtained by placing 2 iron ingots in a vertical setting in the craft lattice. Chain links can then be used to create quiver chainmail shields and Quiver Quiver Arrows Are small items that have the ability to stack four times more arrows than a common stack of arrows. It can be made with skins and arrows. You can empty it with a right click. Quivers can also be colored similarly to leather armor. The dye is removed by placing a bucket of water in the craft grid with a quiver. Once you have a quiver filled in your inventory, the bow will drain this item instead of using the free arrows. The bow can be dualwield with quiver directly. With the bow equipped, a special bar will appear showing the slot of the quiver. You can switch between slots (and thus, between arrows) with a special action button ('Z' by default). Quiver will also appear on the player's back. There are APIs that allow modders to create their own containers for their own custom arrows, with hooks to customize charm, bow damage, etc. Arrows Mine & Blade Battlegear 2 adds seven types of arrows that can only be fired from the quiver. Bows are also rendered differently to indicate different arrows when used. Fire arrows... Burn things. Explosive arrows... Blow something up. Ender arrow... teleporting things around. Poison arrow... give a wither effect on the hit. Arrows pierced through armor and glass beams. Mystery arrow... has a strange effect. Leech arrows bring the life force of your enemies to heal you. It is said that the skeleton may have gained the knowledge to use the arrow. Fortunately, they're not smart enough to hide it in their lightness or switch between them. Update Notifier Mine & Blade Battlegear 2 contains an advanced new mod update detector known as M.U.D. Mod will check to see if you are running the latest version (for the version of minecraft you are using) and let you know if you are using an older version. Pressing the Mod Update Detector button on the pause screen or on the Forges Mods screen or typing the '/mud' command will take you to the download screen. This will allow you to see and download the latest version of the mod (restart will be required). This section is really client-side, which means you can disable it on your clients without worrying about server conflicts. It also means that, because on the server, the server owner must update manually. It is designed in this way to prevent server overload. Screenshot: Craft Recipes: Requires: Minecraft Forge How to install: Make sure you have Minecraft Forge installed. Find the minecraft app folder. In the Open Run window from the start menu, type %appdata% and click Run. In the mac open finder, hold down ALT and click Open then Library in the top menu bar. Open the App Support folder and search for Minecraft. Place the mod you just downloaded (jar file) into the Mods folder. When you launch Minecraft and click the mods button you should now see the mod installed.
