Images: skynesher/E+/Getty Images Cats vs. dogs are considered one of the world's biggest competitors, right there with the Yankees vs. Red Sox, soda vs. pop, and Yanny vs. Laurel. But do they really dislike each other a lot? In fact, research on the relationship between cats and dogs suggests that many of them live amicably together. The main variables are the ages in which they are introduced to each other—cats and dogs growing up together from birth usually form a close relationship. Even in households where dogs and cats are introduced to each other later in life, there is still a chance they can mingle. As you might expect, both species have a separate approach to relationships: cats are usually more aggressive and threatening against their canine partners. On the other hand, dogs tend to be more obedient and out of affection. They are better suited for heavy physical activity such as climbing hills or running long distances.
