## Google camera with night sight for s8

Hi, I've tested the Gcam 6.2 for the S8. We now have Night Mode and Portrait mode fully functional. 1. Download Gcam from the following site and also apply the settings given on the Web. 2. Now apply this setting. • Night View Correction : 1.5 • Exposure Compensation: -2.2 3. Now test, it'll work. Note: I tested it in pixel experience rom for S8. It would be appreciated if someone tried it on OneUi. (I tried to post but failed at any time.) Hi, I've tested the Gcam 6.2 for the S8. We now have Night Mode and Portrait mode fully functional. 1. Download Gcam from the following site and also apply the settings given on the Web. 2. Now apply this setting. • Night View Correction : 1.5 • Exposure Compensation: -2.2 3. Now test, it'll work. Note: I tested it in pixel experience rom for S8. It would be appreciated if someone tried it on OneUi. (I tried to post but failed at any time.) Night Mode is organized and Portrait mode. Hi no work there, I have tested Gcam 6.2 for S8. We now have Night Mode and Portrait mode fully functional. 1. Download Gcam from the following site and also apply the settings given on the Web. 2. Now apply this setting. • Night View Correction : 1.5 • Exposure Compensation: -2.2 3. Now test, it'll work. Note: I tested it in pixel experience rom for S8. It would be appreciated if someone tried it on OneUi. (I tried to post but failed at any time.) I tried OneUI but Nightsight didn't work. It keeps crashing all the time. Tried all the settings mentioned in the reddit thread. Table of Contents Google Pixel 3 and 3 XL comes with a new stock camera app with many interesting features. One of the best features we highly anticipated was the Night Sight mode. The Google Camera app has been updated to version 6.1 and we have the Night Sight feature. Soon, developers had started mopping and moving Gcam to various Android devices. Google Camera 6.1 is available for download for smartphones running Android 9.0 Pie. Here, we have the same for most Samsung Galaxy devices running the new One UI firmware variant Snapdragon or Exynos. Thanks to developers like Arnova8G2, who have been actively transferring the new Gcam mod to Exynos and Snapdragon Samsung Galaxy phones for Android 8.0 Oreo or later. The Google Camera APK listed in the download has been tested working on the Galaxy S9, S9 Plus, Note 9, Galaxy S8, S8 Plus, and Note 8. You can also try this on other phones. Here in this tutorial, download and install Gcam Mod 6.1 from Pixel 3 (XL) for Samsung as a normal APK. See how to set up the latest Google camera to your phone or Exynos Galaxy running Android 9.0 Pie or 8.0 Oreo. Get features like Night Sight, slow motion, motion picture, portrait mode, HDR+ Enhanced, Lens Blur, AR Core, AR Stickers, etc. Here we have the latest Google latest 6.1 mod ported for Snapdragon Samsung Galaxy series device variants. Now many flagships from Samsung including note 9, Galaxy S9/S9+, Note 8, Galaxy S8/S8+ have received One UI based on Android 9 Pie, either officially or unofficially, you can now test the latest Gcam mod for them. If you are looking for an environment to install the same on previous devices or mid range devices such as Samsung Galaxy S7, S7 Edge, Galaxy A series devices, Galaxy J series, S6, S6 Edge, Note 5, Note 4 devices, then you may also want to try the previous Google Camera 5.1 available in our previous post here. Front/rear portrait mode HDR+ cam front/rear cam Photo Sphere Panorama Lens Blur HDR+ Enhanced Portrait and HDR NightSight Photobot Portrait Front and rear camera on all Download modes: The working Gcam 6.1 has been created by recognized developers BSG, Arnova, TinNeun, and many others who have contributed to the development. The new Google Camera port comes with a file named: MGC\_6.1.021\_BSG\_Arnova\_TinNeun\_1.2\_Final.apk You may also like: Fix or recommend settings: If the camera is lagging or crashing, go to settings &gt; format &gt; FIX &gt; viewfinder &gt; change to YUV\_420\_888. viewfinder : YUV\_420\_888, JPEG Image processing : RAW\_SENSOR, RAW10 HDR+ enhanced works for Samsung snapdragon: samsung SM-G9650, samsung, star2qltechn [RAW\_SENSOR, JPEG, PRIVATE, YUV\_420\_888, RAW\_PRIVATE, RAW10] samsung SM-G965W, samsung, star2qltecs [RAW\_SENSOR, JPEG, PRIVATE, YUV\_420\_888, RAW\_PRIVATE, RAW10] Samsung Exynos and Huawei, raw10 format disabled, choose the right format for viewfinder samsung SM-G960F, samsung, starte [RAW\_SENSOR, JPEG, PRIVATE, YUV\_420\_888] HUAWEI MHA-L29, HUAWEI MHA-L29, HUAWEI, HWMHA [RAW\_SENSOR, JPEG, PRIVATE, YUV\_420\_888, DEPTH16] HTC HTC U12+, HTC, htc\_imedugl [RAW\_SENSOR, JPEG, PRIVATE, YUV\_420\_888, RAW\_PRIVATE YUV\_420\_888 <7> , RAW10] HTC U11, HTC, htc\_ocndugl [RAW\_SENSOR, JPEG, PERSONAL, YUV\_420\_888, RAW\_PRIVATE, RAW10] Xiaomi riva [RAW\_SENSOR, JPEG, PERSONAL, YUV\_420\_888, RAW\_PRIVATE, RAW10] OnePlus 6/6T: Everything works OnePlus 5/5t: Choose for YUV\_420\_888 viewfinder and Alternate Configuration no less left in the viewfinder for night mode. For google drive links, download it using a PC or desktop browser. Fix: If the camera lags or crashes, go to settings &gt; &gt; format &gt; viewfinder &gt; turn it into YUV\_420\_888. Note: Samsung Galaxy Exynos variant, the best is the Google Camera 5.1 which is available in our previous post here. Download AR AR How do I install Google Camera to a Samsung device? Since this Google Camera app has been configured for the Samsung Galaxy S7, all you need to do is install the app and use it directly without any settings. However, do the following first. Uninstall a previously installed version of the Google Camera app. Uninstall or erase data when you launch the app for the first time. If the settings don't apply correctly, force close and run the application again. If an application crashes during HDR+ processing or portrait shots, it can be caused by a memory leak. You may need to restart the phone. In addition, use the Smart Manager app and clear all cache, RAM, memory, etc. AndroidSage Home » Download Google Camera 6.1 for Samsung Galaxy Devices with Night Sight for Exynos and Snapdragon Table of Contents Google has just launched their latest flagship phone. While the Pixel 4 may have been criticized by the tech community for its lack of features, it may not hold back when it comes to cameras. The stunning Google Camera 7 from Pixel 4 and 4 XL is available for download. Developers around the world have developed many Gcam mods for various Android phones. However, we are now here for the latest Gcam 7.0/7.2 mod; but for Gcam 6.2 from Pixel 3 and 3 XL with Nigh Sight feature. This is because the latest Google Camera 7.0 or later requires Android 10; and also that it works best on Snapdragon processors. Here is the latest Google Camera 6.2 that works for all Samsung Galaxy devices with Exynos and Snapdragon processors. One of the best features that comes with The Google Camera 6.2 version is the amazing Night Sight mode. Thanks to developer Arnova8G2, we now have the latest Gcam 6.2 mod with many features. The Google Camera 6.2 APK listed in the download section below should work on exynos and Snapdragon variants of Samsung Galaxy phones running Android 8.0 Oreo, 9 Pie, or even Android 10. It has been tested to work on Galaxy S10e, S10, S10+, Note 10/10+, Galaxy S9, S9 Plus, Note 9, Galaxy S8, S8 Plus, and Note 8. You can also try Gcam 6.2 on other Samsung phones such as Galaxy M20, M30, M30s, M40, A20, A30, A40, A50, A50s, A70, and A80. Some of the best features of Google Camera 6.2 are Dark Mode - which respects Samsung's Night Mode settings, Measure Mode for measuring object length using your mobile camera, selfie flash feature, option to mute camera shutter in camera settings, and most importantly Night Sight mode. In addition, you also get all the previous features of Google Camera 6.1 such as a new user interface, night view, top shots, slow motion, photo-booth, motion autofocus, RAW, a new panorama UI, portrait mode, AR stickers, and more. In this tutorial see how to download and install Gcam Mod 6.2 from Pixel 3 (XL) for Samsung as a normal APK. See how to set up the latest Google camera for Snapdragon or variants of our detailed tutorial Gcam 6.1 are listed below. In addition, download the latest XML files for your Samsung phone to make Gcam work perfectly. Gcam 6.2's work has been created by acclaimed developer Arnova. Download: Stable Google Camera 6.1: If Gcam 6.2 above does not work with your Samsung Galaxy device, then it is better to stick with the more stable Gcam 6.1 APK listed above. Stable Gcam 6.1 for Exynos and Snapdragon Samsung Stable Google Camera 5.1 phones: If you're looking for a more stable version of Google Camera, try installing Gcam 5.1 from below. Since exynos processors may not support Gcam, you should be satisfied with Google Camera 5.1 by idan developers on Samsung Galaxy M20, M30, M30s, M40, A20, A30, A40, A50, A50s, A70, and A80. Also for old devices such as Samsung Galaxy S7, S7 Edge, Galaxy A series devices, Galaxy J series devices, S6, S6 Edge, Note 5, Note 4, then you may also want to try the previous Google Camera 5.1 available in our previous post here. Google Camera 5.1 is available in our previous post here Google Camera Latest 7.2: Samsung's One UI 2.0 beta program has already started showing Android 10 for the Samsung Galaxy S10e, S10, and S10 Plus. So, you can try the latest Google Camera 7.2 or Gcam 7.0 firmware update in One UI 2.0 from the following post. How do I install Google Camera for Samsung devices? Since this Google Camera app has been configured for the Samsung Galaxy S7, all you need to do is install the app and use it directly without any settings. However, do the following first. Uninstall any version of the Google Camera app if it was previously installed. Uninstall the app. You can also delete data when launching an app for the first time if the settings aren't applied correctly, force close and run the app again if the application crashes during HDR+ processing or portrait shots, it could be caused by a memory leak. You may need to restart the phone. You can use the Smart Manager app and clear cache, RAM, memory, etc. Note: For settings and configuration, visit Google Camera 6.1 post from above.
