It is a co-production between US Sesame Workshop and Pepper's Ghost Productions. The television series consists of 65 dialogue-free episodes of 65 five minutes featuring two furry extraterrestrials who travel through their universe and solve certain problems each episode. [4] The plot of Deep in the heart of the Tiny Universe lies Home Planet where the main characters, Bing and Bong, make their home. The two explorers catapulted into the surrounding world in their solar system on flying white sofas where they explored, learned about the population, developed friendships and had fun. Bing characters - Bing is older and much bigger than Bong. His enormous appetite for browsing is only dwarfed by the endless supply of useful gadgets in his ever-existing pockets. Wise and determined, he often leads in adventure. Patient and thoughtful, she loves nothing more than problems to be solved or work to be done. She likes to help others and has an optimistic approach to life and her problems. She does not speak, but communicates with body language, expressive eyebrows, and a humming voice. He's voiced by Dashiell Tate. Bong - Bong, which is smaller, attractive, timid, impulsive, and lovers of bundle energy. Impish, cheerful, friendly and very compassionate, she is very miserable when it comes to bing. He likes to join the game and be the center of attention. He does not speak but has an expressive face and body, a high-pitched voice (which crosses between grunting and squeaking), and cries of multi-decibel joy. She was voiced by Kim Goody, the singer of the theme song. Halley - Halley is a small, wide-eyed alien named after a comet that gives a running commentary from a flying saucer and an action movie with a remote camera to provide a summary at the end of the episode. She was also voiced by Kim Goody, the singer's theme song and only featured in the US version of the series which aired on Nickelodeon's Noggin digital channel between 2002 and 2006. Flockers – Flockers live on Small planets, each with its own distinctive population. More often than not, it's it social beings that Bing & Bong help get out of traffic. Whether it's cleaning windows out of reach or fortifying homes to withstand the wind, Flockers is a source of perennial problems that beg to be solved. They do not speak, but communicate with body language and call out voices. Their design varies depending on the planet; They have one or two heads and one or two legs. Only a few have arms. Locals - Locals are smaller inhabitants of the planet and can appear in larger numbers than Flockers but equally dim. They are mostly globular in shape with blinking eyes and small antennae above their heads. They don't talk, but they communicate by bouncing, blinking and squeaking. On certain planets, the locals are geometric shapes: squares, circles and triangles. The locals are always colorful, attractive and friendly. Robots - Robots are segmented round creatures with mechanical arms and helicopter wheels or rotors. Found mostly in Small Planet Technology, like all robots, they are linear thinkers who try to multitask. They were there to help but didn't always take instructions well. Thus they are challenged and Bing and Bong learn to work with them to get the best out of them. Arrangement There are six Small Planets that Bing and Bong travel to, in addition to their Home Planet. Home Planet - Bing and Bong live inside Planet House. From here they set off every morning on a new adventure. It's an icy world, covered with snow-covered ice floes. Inside the giant crystal is Bing and Bong's house, decorated with steampunk idioms, with plenty of brass work. The main and most prominent features are fluffy white sofas that double as their beds and means of their intergalactic travel. Tethered to the Home Planet by a bungee rope it was launched into space by a terrible catapult. Small Planets of Nature – Bing and Bong discover the weather, plants and animals, the power of the wind and the way the rain turns to snow. It's a green and lush world, with trees, lakes, mountains and flowers. The seasons there are like temperate parts of the Earth, with snow in winter, hot sun in summer and leaves falling in autumn. Planetary Small Technology – Gadget designs Bing and Bong to discover the properties of springs, wheels, levers, pulleys, balance, strength, gears and structures. The planet consists of a large detailed brass ball, with four satellites moored: two cubes and two balls. Action occurs within the planet, with an emphasis on the structure and principles of physics. Tiny Planet of Self – Bing and Bong face fitness, cleanliness and healthy eating and learn more about themselves and others. It's a loose bunch of rocky outcrops floating in a sunny atmosphere, connected by rows of stepping stones. There are pavilions such as pagodas and sports arenas here, and local transportation by sky boat. Lessons from from feelings, and manners learned here. Tiny Planet of Sound – Bing and Bong join the band, playing tubas, beating drums and experimenting with rhythm, harmony, pitch, and acoustics. It's a rocky desert, with strange flora such as Pitch-Plants (blown extendable flutes), maraca leaves and tomtom trees playing alone. Flockers and Locals often hold concerts here. The planet is blue from orbit, and is surrounded by a swarm of small asteroids that spiral from pole to pole. Small Planets of Light and Color - Bing and Bong discover rainbows, shadows, animations, and color mixing. This is the environment where Bing and Bong explore optical phenomena. Around the planet there is a wide, circular, semi-transparent band lined with parallel strips of ever-changing colors. The landscape is similar to the desert, and the most famous feature is a bullet-shaped stone pillar with paint-colored spots on it. Tiny Planet of Stuff – Bing and Bong explore groups of things and what they are made of. They play with patterns and numbers and sort things by color, shape, and sound. The planet is shaped like a giant Möbius strip and patterned like pink-and-blue graph paper; therefore, this is where Bing and Bong solve problems involving arithmetic, logic and geometry. Nature Episode: Seasons Machine Snow Problem Gone With the Wind It's Raining Bongs Winter Warm-Ups On the Right Track Blown Away Egg-stra Large Body Talk Big and Small Technology: Tip the Scales Spring Cleaning Tools, Noble Tools Free Wheeling Slippery Slope Pedal Meddle Pivotal Points The Right Angle The Bing Fisher Strength in Girders Self: Tuba Trouble Night Light, Sleep Tight Shower Power That's What Friends For Flockercise Sweet Temptations Odd Bing Out of Box Rider Moving and Grooving Birthday Build-Up Be a Sport Love is All You Need Pooling Resources Everyone's a Winner Sound: Highs and Lows Flower Power Jammin' Session A Chorus Line Desperate Seeking Silence Hear My Song Bing Bong Bell Found Sounds Orchestra Rhythm and Moods Light and Colour: Shadow Showdown True Colours Making Rainbows Flocker Contrasting Views The Light Fantastic 3D or Not 3D? Colour Clues Slim Up Broadcast Tiny Planets is shown on ITV in its home country, UK. On April 1, 2002, the original English graphic version premiered on Noggin in the United States as a 5-minute segment between shows; it expanded to a half-hour show in early June 2004, and was performed on Noggin until April 9, 2006. The drama also aired on the ABC in Australia, World in South Africa, BFBS in Germany as well as Belize, Falkland Islands, Gibraltar and Bosnia and Herzegovina, TV3 in New Zealand, Children Children in Singapore, JimJam in Malta, e-Junior at Emirates, TVB Pearl in Hong Kong and Macau, Disney Channel in Asia and CBC in Canada. Local versions aired on Super RTL in Germany, NRK in Norway, HRT in Croatia, NHK in Japan, UBC Kids in Thailand, SBS in Korea, Astro Ria in Malaysia, Italy 1 in Italy, Discovery Kids in Latin America, and Televisa in Mexico. [6] The program's awards and nominations were nominated for several BAFTA awards. It won the BAFTA Interactive Children's Entertainment Award 2002[7] and was nominated for the BAFTA Interactive Award for Online Learning 2001[8] and the BAFTA Pre-school Animation Award 2003. [9] In addition, a website based on the series was awarded the BAFTA Interactive Entertainment Website Award 2001. [10] References ^ Small Planets worldwide.
