Download the MOD APK version of this game and save the world for the brink of extinction! Table of Contents [ShowHide]Stickman games are becoming increasingly popular. They are action-packed, easy to approach and have addictive gameplay. Maybe you're also a fan of some famous products like League of Stickman, Stickman Legends or recently Stickman The Flash.GameplayOne of the factors that hold millions of players in the Stickman series is the simple, addictive gameplay. In Stickman The Flash, you will take control of the green Stickman hero, trying to fight against the Ninja, Warriors and White Stickman. It seems that the world is in a state of riot in the opening scene, the strangers constantly attack you. You have to move, dodge and attack them. This is done by swiping on the screen or touching a location. Accordingly, the character will go to that position, if that position appears to be an enemy, he will automatically launch a punch or kick to cause damage. In general, the gameplay will take place that way. You start from level one, with a goal of 7200 points. By defeating the opponent, you will pass and step to the next level, with a higher required score. Of course, the white Stickmans are easy to beat to score, but eventually the boss will appear. They can be Ninja, super warrior or something. You're going to have a little trouble standing up to Boss. They have high damage, fast speed of movement during the launch of unpredictable movements. But fortunately, on the first levels, it's not too hard to beat them, if you have good control. Dodge, then attack from behind to win! When you defeat the boss, you can pick up his weapon to continue the fight. The Flash's gameplay focuses on accuracy and agility. This means that you will have a direct attack or on the weaknesses of the opponent will cause more damage. Meanwhile, you to avoid the attack of enemies. But, whatever happens, when the green Stickman is having empty hand battles with bosses or champions fully equipped with weapons and armor, probably suffer defeat. Equip your hero with the best weapons. Stickman The Flash has a fairly detailed item system. You equip stickman warriors with weapons, armor, gloves, boots and protective hats. They offer a number of benefits, such as weapons that increase damage, attack speed and skill effect. Armor increases your stamina, while shoes help you move faster. All are sold in stores, you use the gems collected while fighting to unlock them. However, if not enough, you also pick up this kind of equipment from bosses or defeated generals. They will fall, you just need to touch the item to retrieve and use. GraphicsStickman The Flash or any other Stickman game is designed on 2D graphics. Some are mystical, must be carefully designed and the colors carefully selected. Others are so simple that there are only a few characteristic colors, while the characters are only monochromatic blocks. Stickman The Flash is the second case and maybe you have also realized this from the beginning of the game. But not because of that simplicity, but it becomes lack of vitality and attractiveness in the eyes of players. Motion effects, lighting effects and sound are really the highlights, allowing people to pay more attention to the fight. You'll quickly get excited when the Stickman characters scream in battle, or the light and thunder every time they launch an attack! About Stickman The Flash MOD APK latest versionMOD featureGod Mode: Your warrior is immune to damage from enemies. Note: You still die if the bomb explodes. Why use the MOD version?
