Open the Mac App Store to buy and download apps. Create your own custom FUT card and share it with your friends! You can customize a number of features including: choosing the name, all statistics, and also using the front camera to get your face on the map! Features-213 Nations-Full customization of the map-More than twenty cards to choose from-Add your personal photo using your front camera or camera roll* - Share it on Facebook, Twitter, Flickr, Mail and more!* Camera and camera roll permissions are required to add your own photos to the maps. Dec 21, 2020 Version 6.1.0 This card creator is one of the best of its kind. Some problems may be that you can't trim your faces. This app is great, but it can improve. You can also add a feature where you can use different versions of fifa. There was to be fifa 20 beta, fifa 19, fifa 18, all the way down to Fifa 12. In this way people from the past would be happy. Just for fun, it's just a joke. Anyway you should add different features that allow you to customize your card to your extremes and generally allow different people to make different maps and add features to their scope. Generally this app is awesome. But the only thing that's wrong with it is when you take a picture for your card, you need to center you face perfectly to have something in the background. The only reason my photo looks perfect is because I have Adobe Photoshop so I can take a picture in the camera then photoshop the image and add the image to my camera roll and then add my image to my card. Other than this question, the app is great! There is no problem with the app only that when taking pictures the small pieces of background pop into the picture or face does not fit perfectly to the image. That's the only problem. This app is a great way to spend some free time enjoying the Developer, Keith Galdies, stated that the app's privacy practices may include handling data as described below.
