Corona Virus and HWA – Although the restrictions are being relaxed following reduced rates of infection, encounters, would be ours with 50 plus people in a closed space are not yet allowed. In addition, HWA membership is made up of many who are particularly at risk by virtue of age and medical conditions. Therefore, the suspension of meetings will continue until further notice and, until the AGM can be rescheduled (or an EGM (Extraordinary General Assembly)), the existing committee will remain in office and the number of current members will be extended. Although we are not able to meet, gallery photos working members are displayed every month on the site and periodically members are able to vote for Challenge. Your turn is still being produced quarterly, as well as interim monthly reports. We have successfully tested online meetings through Zoom and will seek to organize a series of new demonstrators that are now open to us, because geography is not a barrier. ANDY BROWNE WOOD sells and designs individual creations ideal for the selected wood. He specializes in different forests and finishes using Pyrography and paints to enhance what would possibly be a bit of boring wood! Special forests do not need supplements, they shine in their right without any treatment, just subtle finishes to enhance their individual beauty. Here I am in my workshop well equipped with a VB36 lathe, one of the two that I use for lessons/schooling, my other two lathes are Union Graduates that I have updated myself with variable speed. Due to a change in the circumstances of the career arose the opportunity to finally do something That I am passionate about. Woodturning tuition in the form of individual lessons, and day courses are available using these lathes. All my lathes are made British! My first lathe was a long bed VB36 Hegner Strung which I have now had for over 10 years since us. I recently bought a VB36 short bed display model to use for lessons. My other two lathes are Union Graduate - a short bed and a long one, which, although old, both have been renovated with new engines and variable speed control. All my lathes are suitable for beginners and have been equipped with foot safety switches and bang off buttons just in case you need to stop the lathe in case of emergency. Short bed lathes are ideal for bare shapes and turning bowl while long base ones are good for bowl and turning shaft. With 3CP updated engine on the specially made turntable. Updated with variable speed and specially adapted turntable. Renovated and updated with the latest variable speed. My Get around to it projectThis fantastic burr Padauk Burr has been in the wood shed for a good number of years of waiting patiently for the moment when I had the time and inclination to do it right. This piece has quite an emotional attachment to me personally because it used to belong to a very good friend of mine, Steve Gibson, who started turning me wood in his workshop a few years ago. I had it for at least 10 years and Steve had it for a considerable period of time before that, so in theory it's been drying out for the last 25 years! Unfortunately, Steve is no longer with us who died August 12, 2013 - far too young. Another my get around to it Projects! Another fantastic little bit of wood waiting for the right right place treatment! Located in a wonderfully quiet rural location you can relax and return to your delight watching woodpeckers and bullfinches on the feeder outside the workshop window! Red Zmee have been spotted over the past two years, with frequent calls of Buzzards overhead throughout the day. In the summer months lunch takes place outside on deck next to the pond, in winter it is in our lounge overlooking the pond.
