Content [ShowHide]Grow Idle Archer is a role-playing game with a game that is not used. It was released by BigInt Games not so long ago, but soon had hundreds of thousands of players to experience and love. You can also be addictive and will take place in this game for a long time. Looking forward to interesting things in this article! PlotGrow Idle Archer tells the story of a young hero fighting monsters. Apparently, someone opened the gates of hell, so monsters and demons are overflowing into the human world. And now they are everywhere. They destroy and bring death to places where they pass. With the responsibility of the hero, with a bow and arrow in your hand, you need to stop those bad things and bring a peaceful life to the people. GameplayGrow Idle Archer with idle game. It's so simple that you don't need to touch the screen, but the symbol will automatically fight, defeat the opponent and go to the next level. But the game does not last forever, because the enemies you face will become stronger and harder to defeat. During the first 3 levels, my character passed the blink of an eye. But up to level 4 there were three new types of enemies. They have more health points, so I get to shoot a lot of arrows to get through the level. Over time, the higher the level you are fighting, the more opponents there will be and the more health they have. But that's not all. Worse still, your time attack is diminishing. Usually below level 20 time attack is 12 – 15 seconds. They are like a countdown timer. When time is up, the enemy counterattacks and your character do not have much chance of survival. So you need to overcome them before the time run out of attack. Update Your Hero Can See Grow Idle also focuses on the speed of the fight. To have good speed, you need to go through the

upgrade process. For the weapon aspect, there are two types of upgrades, including arrow updates and bow upgrades. With arrows, when they are at a higher level, the damage becomes greater, and the number of arcs and arrows in one turn also increases. Initially 2, then 3, 4 and more. As for the arc and arrow, you can resume the speed attack. The time it takes to play the next frame will decrease depending on the level. Maybe 300%, 500%, 1000% attack speed and gradually move to a permanent state. Of course, thrust also improves, which helps to contribute to increased damage. Learn new skills Along with weapons, skills are what your hero needs to defeat the enemy. Skill will buff more power and add attack effect so that enemies die faster. Grow Idle Archer has many skills, including some active and passive skills. You should learn them as soon as possible. With active skills, you need to touch the screen before you can use it. For example, the Magic Steel Arrow creates an iron arrow with 125% damage, an energy wave with 350% power. Or the mandatory trap makes enemies immobilized for 3 seconds. But skills have a coolness. You'll need to wait a few seconds to use it again. With passive skills, you also have to wait. However, the advantage is that these skills are automatically activated when ready. Modes There are three game modes, including storyline, tower defense and city reincarnation. There the plot has a game, as I just mentioned above. Tower Defense is displayed in the same way as Plants vs Zombies 2. However, you can not add more defensive force, but you can only strengthen yourself to fight the enemy. As for the regime of reincarnation of the city, you need to spend souls unlock. I'll leave this chapter blank for you to explore yourself! Characters Grow Idle Archer gives you the default character, the hero who comes with the above storyline. However, if you want something new, you can change the character at any time. They have a more eye-catching look, with an epic and antique style outfit. Some of your reference characters, such as Elf, Shadow Archer, Light Wiper, Frost Knight and Lord of the Earthfire.
