KISS PR CEO, zamar zaman is going to a lot of goodies during this holiday season. Google Knowledge Group Using Press Release Distribution - SPECIAL OFFER from the book's author zamar zaman digital PR expert zamar zaman SEO expert explains how to tell his brand story through an online distribution press release from Dallas, Texas, December 25, 2020 (GLOBE NEWSWIRE) - Stories have always been around, not just in the form of movies and books. Day in and day out, everyone depends on the stories without even realizing it. Take a look back at the most interesting story you've recently heard - it was probably through a friend or online. Why did this story get your attention? Why is he sticking to you? It probably touched your emotions and made you think. Even years later, you will remember a good story. It shows how powerful the narrative can be. Many businesses realized the impact a good fairy tale can have, so they started incorporating storytelling to establish their brand image and other marketing tactics. Large companies have even created entire campaigns based on the concept of history successfully. A great example of this being Nike, which has been using the branding story since the 1999 Michael Jordan Retirement Campaign, and have continued to advertise its products through stories ever since. In order to increase customer engagement, ideal for creating an interesting brand history. It is also widely recognized that social media is the best platform for attracting your current customers and attracting new ones. Combining these two factors, sharing the history of your brand on social networks, is sure to give you positive results. When doing the right thing, storytelling will keep you on your client's mind. But how exactly do you create the history of your brand to attract customers? Here are some effective tips for storytelling that will help attract customers. Make MeaningfulThe story the most effective way to tell your brand's story by making it meaningful to your target audience. You can use all the targeted market research your business has conducted to understand their behavior. Highlight the key points that you can include in your story to make it relevant and meaningful to these specific customers. Understand what's important to your target audience and what makes your services and products meaningful to them. Consider their short-term goals and long-term goals related to your services and products. For example, if your target audience is travelers, it's not easy to emphasize how your service or product is more affordable than others. Instead, show them how it can help them during their travels. Once you've identified what it means most to your customers, you'll be able to create an appropriate story Accordingly. Think like your customers when you update your social media platforms regarding a new

product, product, information, or other informative content, it is usually simple and to the point. Why not make it more interesting to get customers' attention? Create a story about the new piece of information you share. It doesn't have to be complicated; just a few well thought out lines will do the trick. These updates will have higher engagement rates than previous simple ones. Try a few stories that highlight the common problems your target audience faces, and how the problem can be solved after using your brand. Be the inventors of how you want to be and you will notice participation in these posts growing. By looking at social media updates such as short blog posts, you'll keep things interesting for your target audience. Emotional storytelling has the greatest impact on the audience. That being said, not every post necessarily has to be a tear reflex. Focus on a light-hearted, fun storyline that inspires and empowers the target audience. Touching your customers' emotions will form stronger connections and accessories, as well as enhancing your brand's social media presence through greater participation. Creating such a narrative is not always easy; Here are some points to consider when choosing an emotional narrative: Keep things relatable - this method won't work if your target audience can't relate to content and post stories. Make sure you set up a storyline that makes them feel supported, understood, and noticed. Keep it relevant to your brand - creativity is undoubtedly important, but it matters. Even if your story is touching, if it is not related to your services or products, and your overall brand image, then it will not be effective. Remember that the purpose of history is to still build your brand image and sell your product. - Keep the content authentic - consumers today are smart and can detect cheap marketing tactics from a mile away. Make sure to keep things original and avoid copying content or concepts from other brands. Use custom contentY target audience has many stories; just ask them to share some with you. Make it even more interesting by giving them a concept or a hint and making it a competition. Social media users love a good contest. Be sure to give them a floor limit so you can easily share your stories on your social media platforms. Another effective way is to divide it into parts to add the suspense factor and keep the audience and participants interested. Your existing audience may already be some stories about your brand. Repost them. (Don't forget to get their permission first and pay tribute for their work.) For example, if you sell children's toys, encourage your customers to share videos and images of children playing with these toys, or children who are doing a short tutorial tutorial Toys. Such messages will certainly help to increase the level of interaction and help customers to connect more with your brand. Make using VisualsStrong Visuals best work on social media platforms, so when sharing your brand's story on social media, consider showing up rather than telling. How can you do that? There are many ways to do this, such as infographics, illustrations, relevant photos, or compelling videos. You'll notice higher participation in posts that include some form of visual aspect, compared to what all text posts are. You only have a few seconds to get the attention of your target audience on social networks and motivate them to stop and read your post. Simply incorporating a photo can make the story interesting and interesting because it encourages the audience to visualize the narrative. Try using a visual that conveys the history of the concept within seconds. Even if the audience doesn't read the text, the visual leaves an impact on them. In today's world, consumers have many options and better control their purchasing decisions. While it's great from a consumer perspective, it makes it much harder for businesses to encourage their target audience to try out their brand. That's why the storytelling method is important; setting your brand apart through creativity and emotional impact will keep you in mind of your audience and therefore increase engagement and transformation.
