You can help by expanding the Battle Bay Wiki. -The item is a tool used for combat equipped on battle bay ships. Similar items tend to share benefits, create this item classification, other items are standalone, and there are no similar corresponding items. As a rule of thumb, red slots are for damage and can occur as point damage, area damage, or a combination of the two. Yellow slot items are used to buff yourself and debuff enemies. Buffs can be in the form of temporary speed boosts and temporary shields, and debuffs come in the form of stuns and slowing downs. Blue slot items are passive boosters that can increase many of the ship's stats, from hitpoints to speed to turret rotation, while blue slot items can even give hitpoint playback. Green slot items are used to heal allies and remove debuffs. Teal slot items are used to protect allies and reduce allies' debuff duration.
