Singing River Electric Cooperative Lucedale, MS 108 Apprentice Lineman-MGCCC Career Day jobs 171 28 jobs Singing River Electric Cooperative Job Description Skills * Live or move to the relevant Service Area Assist crews with activities such as setting up trucks, loading the necessary equipment. Perform pole work that is limited to new construction and completely de-energizing poles. Frame and erect single-phase structures including, but not limited to, A1, A2, A3, A4, A5, guys, anchors, basics, secondary poles, secondary parking poles, safety lights, transformers and fused c/o locations. Makes connections meter loops, transformers, and other equipment to de-energizing poles. It must be possible to demonstrate the duties of work in a safe manner. Skills and/or experience required: Must have a marketing driver's license Must be a graduate of the current 2020 MGCCC Apprentice Lineman program. The application, which is currently closed Register new jobs posted daily This work was posted on Ot November 24 2020 and ended Nov 30, 2020. Tasks Adhered safety practices and procedures, such as regularly inspecting equipment and installing obstacles around work areas. Test wires according to electrical diagrams and specifications to identify the relevant wires and to prevent incorrect connections. Open switches or attach grounding devices to prevent electrical hazards from interference or fallen lines or ease of repair. Climb poles or use cargo assembly buckets to access the equipment. Drive vehicles equipped with tools and materials on the workplace. Identify defective section shortening devices, switches, fuses, voltage regulators, transformers, switches, relays or wires using wiring circuits and electrical testing tools. Install, maintain and repair electrical distribution and transmission systems, including piping, cables, wires and associated equipment such as transformers, switches and switches. Dig holes using drills, and fix poles using cranes and power supply. Place insulating or fireproof materials over the wires and joints. Install watt-hour meters and connect service droplets between power lines and consumer equipment. Travel trucks, helicopters and planes to check lines that do not have interference and fitness for isolation. Splice or solder cables together or overhead transmission lines, customer service lines or street lighting lines using hand tools, epoxies or specialized equipment. String wire heads and cables between poles, towers, trenches, pylons and buildings, setting the lines in place and using winches to adjust the tension. Check and check power lines and auxiliary equipment to find and identify using reading and testing tools. Before installation, attach cross-veneers, insulators and accessories to the poles. Coordinate the preparation and completion of work tasks with other employees. Replace Replace straighten the damaged poles. Trim trees that could be dangerous for the operation of cables or wires. Lay the underground cable directly into the trenches, or string it through the wire running through the trenches. Clean, tin and glue the appropriate conductors by cutting the ends together or connecting the ends with metal clamps and soldering joints. Pull the cable on the trucks with your hands. Before cutting and peeling and insulating the pipes from damaged or newly installed cables and pipelines. Cut trenches by laying underground cables using trenchers and cable plows. Skills Active Listening – Giving full attention to what other people are saying, taking the time to understand the points that are, asking questions as needed, and without interrupting unsuitable times. Talking – Talking to others to provide information effectively. Critical thinking – Using logic and reasoning to identify strengths and weaknesses in alternative solutions, conclusions or approaches to problems. Monitoring – Performance monitoring/evaluation for yourself, other people or organizations to make improvements or take corrective action. Coordination - adaptation of actions related to other activities. Complex problem solving - Identification of complex problems and review of related information to develop and evaluate options and implement solutions. Performance monitoring - Viewing, dialing or other indicators for measuring instruments to ensure that the machine is working properly. Operation and control - Equipment or system control activities. Troubleshooting - Identifying and deciding on the causes of operational errors. Repair - Repair of machines or systems using the necessary tools. Quality control analysis - carrying out tests and tests on products, services or processes to assess quality or performance. Judgment and decision-making - Taking into account the relative costs and benefits of possible actions to choose

the most appropriate one. Time Management – Managing your time and time for others. KnowledgeCustomer and Personal Service - Knowledge of customer and personal service delivery principles and processes. This includes assessing customer needs, meeting quality of service standards and assessing customer satisfaction. Mechanical - Knowledge of machines and tools, including their design, use, repair and maintenance.
