## Smart charger for airsoft gun

If you have browsed through our above group and have not found the charger you are looking for, or if you have any questions for us, please email us, we will do our very best to help you get the best airsoft battery charger for your needs. We offer a fast and economical delivery service for all our chargers across the country and beyond, as we offer a 4less matching warranty on each battery charger to ensure the cheapest price. Finally we have free shipping on orders over £50 on the UK mainland, you can't go wrong! If you need an Airsoft battery to go with your charger click this link. An essential element of every AEG (airsoft electric gun) is the battery. It provides the power to power the engine and make the gun do its job. Having a good battery can make a really big difference. Anyone considering upgrading their AEG to take the battery into account and almost all power upgrades include an upgraded battery. On the other hand, having a low quality battery at the top of the AEG line will significantly reduce its performance. When choosing a battery and charger, the following information is useful to know: voltage - this figure indicates the power output of the battery. Higher voltage means more power. High voltage turns the engine faster giving you the highest shooting rate (ROF). The AEGs with high voltage battery upgrade springs is almost always necessary. This is because more power is needed to operate the piston. Maah (milliamper hour) rating - this figure tells you how long the battery will last. The higher number means a larger battery and a longer playtime between recharge. For more specific, one-hour amp is a 3600 Coloms, which is the electrical charge needed for one hour of fixed 1 amp electrical output. One millimetre hour is one in a thousand hours of amp. Mosul type - there are two types and two sizes of conductors. Species are male and female and sizes are large and small. The male conductor can only connect to a female conductor of the same size. For example, a small male conductor should be connected to a small female connector. You can't link a male to a male or a small one to a large one. If you need to connect incompatible connectors, you'll need a special adapter. Batteries come with female end plugs. DC V - This is the DC power output of the charger. This is the maximum battery effort that the charger should use to charge. No use of an 8.4 V charger to charge a 9.6-volt battery. There are many advantages to owning a smart charger for your AEG batteries. They can detect the status of your batteries, always provide full charging, and prevent overcharging, which is much faster than the standard chargers for the wall. If you intend to use your AEG on a regular basis, the smart charger will save you valuable time and #4 TITAN Digital Charger Lithium Ion Airsoft #10 Pulsar Battery Pack #21 Haisito H4 AC 2S-4S (2Amp, 20Watts): LiPo, LiFe, LiHV for RC Lipo Battery Balance Charger (2S, 3S, 4S, 7.4V, 11.1V, 14.8V, 6.6V, 9.9V, 13.2V, 7.6V, 11.4V, 15.2V) 81078 CHA-A2681078 - \$28.0081078 - CHA-A26 - \$28.0027977 Charger-18CAEP27977 - \$10.0027977 - Charger-18CAEP - \$10.0084136 Charger-C1-XR84136 - \$55.0084136 - Charger-C1-XR - \$55.0024661 CHARGER0524661 - \$22.0024661 - CHARGER05 - \$22.0058280 Charger-B6AC80W58280 - \$55.0058280 - Charger-B6AC80W - \$55.0030727 lipoalarm30727 - \$8.0030727 - lipoalarm - \$8.0048366 CHA-V348366 - \$20.0048366 - CHA-V3 - \$20.0056851 Charger-EM841756851 - \$18.9956851 - Charger-EM8417 - \$18.9947763 Charger-UFCBC0547763 - \$35.0047763 - Charger-UFCBC05 - \$35.0085976 CHA-VB150100085976 - \$12.0085976 - CHA-VB1501000 - \$12.0016472 Charger-MTX-L3P16472 - \$22.0016472 - Charger-MTX-L3P - \$22.0030777 Charger-Lipo0130777 - \$25.0030777 - Charger-Lipo01 - \$25.0041649 Charger-e341649 - \$20.0041649 - Charger-e3 - \$20.0046534 Charger0346534 - \$6.0046534 - Charger03 - \$6.0050996 Charger-Lipo0250996 - \$25.0056138 Cha-UFCBC0456138 - \$25.0056138 - Cha-UFCBC04 - \$25.0054773 Charger-0102654773 - \$19.0054773 - Charger-01026 - \$19.00No reviews yet93910 CHA-103583910 - \$15.0093910 - CHA-1035 - \$15.0077859 Charger-G-11-07977859 - \$80.0077859 - Charger-G-11-079 - \$80.0057362 Charger-AP40357362 - \$30.0057362 - Charger-AP403 - \$30.00No reviews yet48406 CHA-MH8548406 - \$25.0048406 - CHA-MH85 - \$25.0054204 Charger-I6AC+80W54204 - \$59.0054204 - Charger-I6AC+80W - \$59.0029836 AD-Power29836 - \$5.0029836 - AD-Power - \$5.00No reviews yet24660 Charger0124660 - \$8.0024660 - Charger01 - \$8.0046509 Charger-4828346509 - \$29.9546509 - Charger-48283 - \$29.95 \$29.95
