2019 low rider highway pegs

Our increasingly popular crashbar is now available for 2018 and up Street Bob, Lowrider, and the new Lowrider S 2020 models. This is a dual functional part for those of you with average control. Fully TIG welded installation is performed on your bolt on highway pliers and serves the function as a standard highway stake would. However, this installation serves as a crash bar or, as some call it, a crash cage. The front crash bar does what it should sound like, it protects the front of the bike in the event of a crash or if the motorcycle falls. The assembly was actually designed and built for some local stuntmen to protect their bikes as they learned new tricks and did not want to destroy their new bikes in the process. The bar has removable delrin sliders at the ends to help the bike slide over the pavement, as opposed to holding the bike while it is sliding and causing it on the highside. A lot of the R and D has gone to the right position and length of the tape to ensure a sufficiently oblique angle so as not to hinder other types of high-speed turn and still provide the right amount of protection. Leave 1-2 weeks for delivery. Made of soft steel fully TIG welded for strength Gloss Black powder overall width of 32 (same as most handlebar widths with mounted handles) Sold as a bolt on set Removable Delrin sliders looking for stylish but functional Crash Bar for your 2018 - 2020 Street Bob, Low Rider or Low Rider S?
