I have reached level 12 (I play from time to time in my free time, so I can talk about it based on my experience so far). I like the level of graphics and difficulty. I don't understand why so many people complain about the latter. Is it hard? Yes. Do you feel like all cars are a team against you? Yes. But what's wrong with that? I think it's more exciting and more rewarding when you win. In my case, even if they attack me every 2 seconds, I still make the top 3. I hope how the game likes and I don't change the level of difficulty to please some people who don't know who the game developers just race or strategically get their power center. Yes, strategic emphasis. It's not just a racing game. You've got to think about it and play it smart! I only have one suggestion though but maybe bb for race 3 (hopefully!). It would be nice if the option to play with real people was alive. For example, you might have the option to join a session and have everyone who participates play against each other. Of course, during the race he could not pause the game or immediately be disqualified because losing the internet connection. I think it will make the game more interesting anyway. Players attack when you can make it playable for something maybe you should add xbox or pet UPS maybe add mini-games like a player driving on small players there cars can perhaps add to certain races like pets penguins if you can hide a map and real people fight with power ups to look for royalty so you have to get food to eat if you have to somehow work on a TV that can play the game on the middle button of the computer area you can choose the rest of the keys that you need to add a character to create a car creat and I can get this game If you add maps I'll tell my friends I've thought about adding fortnite prints because fortnite is so popular maybe people can make plugins for this app maybe you can make plugins for this app hopefully you can make add-ons for this app read that gummy bear gummy worm and chocolate bar can commonly be common like gummy loli pop and vinni ice cream jaw cutter everlasting gob stopper and white chocolate last candy unicorn gum shark and I was reading hope that you can please add like this chart from the last legendary as honeybee, I'm actually quite good at this game , rarely get under the top 3 and the new tracks are great, but you have to be able to choose from more than two tracks at a time! And where's the freest race? I like to use it better than the old game, and I like the new power sliding mechanical. I don't like the weeks of giving levels after reaching 5-6 levels. plus but get anything that wins a race. I have a TON of upgrades ready for my power ups but enough money to upgrade them. Many people have accused Nintendo of fake online on the Mario card tour, and this game does exactly the same thing. We even have to go online to start a race, but are all racers processors? Why not just add real online. It is said that you love the fact that this game never plays an ad unless you say things like opening a chest or getting another go in the tournament. Other mobile games are just ads with game spam and make the game completely unplayable. It's not a game, and I'm like this. Anyway the game is great, but it may be better than the developer, the Vector Unit, has not eded that the application's privacy practices may include data processing as described below. More Developers Site App Support Privacy Policy Beach Buggy 2 learn a cute racing game players will participate in a competitive tournament and compete against each other. The goal is to get to the finish line before anyone else, but it's not that simple. You and your opponents will try to get each other off the tracks! The game is fun, exciting and exciting with its own folded and rotating. Safe #1 point The game is not trying to overcome all the relevant enemies but also about keeping the lead. The mechanics of Beach Buggy 2 will be a reminder of the popular Mario Kart game, which weapons scattered across the tracks can use to delay other racers. Of course, this game has its own unique character designs, features, and weapons that will come across as head towards the finish line. In addition to weapons, there are power-ups in the game that can help you improve your performance. The game's characters or mascots also have their own powers and skills to prove useful when trying to gain an advantage over others during the race. For example, there are characters that can shoot or release track balls to prevent your opponent from driving. In our opinion, this is a very effective reason for the delay that will give us the opportunity to widen the gap from them. There are many characters and tools to choose from, which means that there are a wide variety of weapons and abilities that you can try and experiment with. This Beach Buggy 2 is incredibly fun, makes many game modes and the track it offers not mentioned. What makes beach buggy 2 different and better than other card racing games is that you are configured with the missions you need to perform its Single Player mode to unlock cars, parts and characters. There are real goals you need to meet and complete to unlock the next level and racetrack. There are also boss fights to wait in the final stage of each stage, which will be a one-on-one race against the big boss. Winning will reward you with a new character that you can use if you want to change avatars in the game at any time. Beach Buggy 2's Single Player mode will give you a pleasant and rewarding experience, so players have the chance to have fun even if they play alone. Of course, if you have friends to play with, it's as exciting as Multiplayer mode! Challenging but rewarding Beach Buggy 2 is a game that everyone will surely enjoy. With its action-packed races, each lap will also be challenging but worth playing for. These players have wide racetracks that give them freedom of movement and there are unique characters that can be unlocked. Whether you're alone or playing with friends, beach buggy 2's exciting racers will let you enjoy a bumpy ride.
