© 1996-2014, Amazon.com, Inc. or its affiliates 2019-10-01 08:30 Source: Cooper WiTBAT Original Title: Multifunctional Shark Ion ROBOT battery available, compatible with Shark all robot Shark is a well-known foreign brand of sweeping robots, the launch of the Shark Ion series robots is overwhelmingly popular. Shark Ion robots include models such as rv700, RV750, RV755, RV720, RV725, RV850, RV750_N, etc. Interestingly, these models use the same amount of batteries, but use two different connectors. Thus, the battery code is RVBAT700 and RVBAT850. Some customers buy the wrong battery because they don't know the battery code so they can't use it. To solve this challenge, Erber recently introduced a multifunctional Shark Ion sweep robot battery PT-SH700. The PT-SH700 has two different connectors, making it compatible with all Therk Ion series sweeping robots. All you have to do is use a connector that matches the robot and fold the other connector. This avoids annoyance caused by the wrong connector. The PT-SH700 has a high-quality cell with a capacity of up to 2800MAH, an increase of 12% compared to the original battery capacity, higher performance and longer service life. PT-SH700 now sells about 210 yuan to return to Sohu to more responsible editors: Statement: This opinion only represents the author himself, Sohu is an information publishing platform, Sohu only information hosting services. A clean home is essential. However, with work and schedule, it's no longer surprising when some people choose to use a modern approach to cleaning- smart cleaning robots like Shark Ion. Robot.Read More:How to fix a leaking kitchen faucet in 5 easy steps? How to install a kitchen faucet without a plumber? How to Start a Garden - 4 Steps for GardenersHow to Clean the Cast-Iron Pan 7 Simple StepsHow to Clean Range Hood Filters 3 Easy StepsShark Ion Robot: What Is It? When you need a little cleaning, but you simply can't because of the work or other things you need to do, a robotic vacuum cleaner will definitely save you the day. Shark Ion Robot is the best solution for daily problems in terms of home cleaning. This device is an easy to use mobile application that allows you to monitor and use your device whenever you want. The Shark Ion Robot boasts a self-cleaning brush roll that collects hair, dust, allergens, and dirt to clean your home and prevent daily build-up of dirt in your home. It even has Smart Sensor Navigation, which allows you to navigate seamlessly through floors and carpets, while its proximity sensors constantly evaluate the environment to adapt to obstacles. away here: 10 Best vacuum for hardwood floors and carpets Meanwhile, with dual rotating side brushes also present, so you can clean out debris and dust edges and corners thanks to Wi-Fi connectivity and optional cleaning schedules, you don't have any trouble keeping your home clean every day. While the Shark Ion Robot can be super efficient in cleaning your home, your home, However, they are also prone to mood swings, malfunctioning or doing things that they shouldn't be doing. And sometimes, the only thing you can do is to ease your mood swings by restoring them back to normal. In this case, you might be wondering how to restore Shark Ion Robot. But first ... Factory reset: What exactly is this? Factory reset is a useful troubleshooting feature that returns the Shark Ion robot to its original factory settings. This means that it will delete all robot data, including schedules, maps, Wi-Fi credentials, settings, and settings. When you perform a factory reset from shark ion robot, which is always recommended, the action removes the device from the app, restoring all language choices, time zones, cleaning preferences to the default state. Read here: 10 Best Vacuum Cleaners Under \$300N not only that, but it also separates the device and its save the data from the app's account and removes the current 3rd party Smart Speaker connection. However, if factory settings are restored from the device, app data, cloud data, and all account mapped data remain intact. Read more:How to fix a leaking kitchen faucet in 5 easy steps? How to install a kitchen faucet without a plumber? How to Start your Garden - 4 Steps to Gardening for BeginnersHow to clean the Cast-Iron Pan 7 Simple StepsHow to Clean Range Hood Filters 3 Simple StepsReasons To Do A Factory ResetA Factory Reset The Shark Ion Robot is usually recommended in the following scenarios:1) Vacuum is not connected to Wi-FiIf you have a newly purchased Shark Ion Robot , you can make many attempts before connecting to the Internet successfully. You just need to make sure that you are using the recommended frequency for the robot vacuum. You can try resetting the router to see if the device can connect. However, if you still can't connect to the Wi-Fi network and couldn't find the reason why reverting the Shark Ion Robot can be your last averting troubleshooter step.2) Software Questions Like any other digital devices out there, the Shark Ion Robot vacuum cleaner needs a software program in place that works properly. Now, if one day it doesn't work properly or apparently spins around without ever cleaning at all, then it seems to be a software problem. Such software issues include: The Shark Ion Robot can not load the launcherThe Shark Ion Robot automatically clears the set scheduleThe unit starts cleaning the wrong clock, or perform cleaning inaccuratelyThey signals may indicate that the robot is actually dealing with the data in memory. To resolve this issue, we recommend that you reset the Shark Ion Robot vacuum cleaner so that you can remove all unnecessary information that is causing you to struggle with its performance.3) Resell the Sharkion robotIf you plan to With shark ion robot or transfer ownership of the robot to another user, you need to know how to restore Shark Ion Robot and reset it to the default setting before transferring to the new owner. How to Start a Garden - 4 Steps to Gardening for BeginnersHow to Clean the Cast-Iron Pan 7 Simple StepsHow to Clean Range Hood Filters 3 Simple StepsHow to Restore Shark Ion RobotThree 2 main ways to restore Shark Ion Robot Vacuum:1) Factory Reset via AppIt is the most recommended way to factory reset the Shark Ion robot. As mentioned above, it removes the robot from the application as well as the data saved from the cloud. You can use the following procedure to factory reset your Wi-Fi-connected Shark Ion Robot: Open the app and make sure that your mobile device is connected to the same Wi-Fi networks as Shark Ion Robot.Go to your settings and then tap Factory Reset via Shark Ion RobotIf you can't connect to the Wi-Fi network, you'll need to do the factory settings of the Shark Ion Robot as well. Fortunately, resetting the Shark Ion Robot is simple and simple. You have to turn the Shark Ion Robot upside down and look for the on and off switch. Press the button for at least 10 seconds until it switches off. Wait at least 10 seconds, and then press again to turn on the device. The Shark Ion Robot must be restored and restarted. Read more:How to fix a leaking kitchen faucet in 5 easy steps? How to install a kitchen faucet without a plumber? How to start the Garden - 4 steps to gardening for beginnersHow to clean the Cast-Iron Pan 7 Easy StepsHow to clean Range Hood Filters 3 Easy StepsFinal ThoughtsHow the robot vacuum can help a lot in terms of cleaning your home, it can also malfunction like any device ever created. However, with the simple guide from above, you should be able to fix the problem and solve the problem so you can get the most out of the Shark Ion Robot vacuum cleaner. SharkNinja is a renowned company known for manufacturing classic stationary vacuum cleaners. But for now, they are diversifying the range of products. They made the new wireless, the Shark IONFlex DuoClean, and now, they're doing it again, but this time with the new Shark ION Robot.Many other companies such as iRobot, Neato, Xiaomi, Miele and ILIFE are also producing robot vacuum cleaners, so how does Shark ION be different? Well, for starters, it comes with a working smartphone app that allows you to control and schedule it as you like. This puts the ION ahead of 75% of the competition. Then, with a 2 side brush and carpet-ready brush we are looking for a product. The smooth design adds up to the package. Many other points need to be covered, including the fact that sells 4 different models of the robot: the R72 (720 series), the R75 (750 series), the R85 (850 series) and the S87 (850 WV series), so let's look at the ION robot in more detail. Technical dataNesn't counting the model, the vacuum is circular; the body is either matte gray or light grey with a black surface. There are three buttons on top. The middle button is trivially the Clean one. The other two side buttons are dock and max. In previous versions (720), there was a Spot button instead of Max. Max suction mode can be used when the robot should be at its best (most of us are), while Spot cleaning means that the robot moves around a designated point in a circular shape. Product specs outlineHere's in a nutshell what this product is about:Height2.6 inchesDiameter12.6 inchesWeight8 lbsWeight8 lbsSuction power1000 Pa (estimated)Clean area1 000 sqft (estimated)Voltage14.4 VBattery typeLi-IonBattery capacity2550 mAhExpected charging time3 hoursExpected run time60 minBrushrollYes Side-brushes2Cliff sensorsYes Laser sensorsNoIR sensorsNoFull bin sensorsNoCarpet sensorsNoRemote controlYesLCD displayNoDustbin capacity10 oz (0.3 liters)Virtual wallsMág tape Noise level62 dbAuto-dockingYesthe country of manufactureChinaSuction/cleaning power2 side brushes and a main brushroll agitate the debris, which is then created by the engine with a powerful airflow into the tank, which lies in the back of the robot. The bristle on the brush roll has high tensile strength and are arranged in a spiral pattern. The 2 side brushes bristle vary in length. This together allows the robot to better pick up dirt particles. The R85 series (RV850, RV850BRN, RV850WV, RV851WV) promise 3x the suction power of the R75 series (RV700, RV700_N, RV720, RV720_N, RV725_N, RV750, RV750_N, RV750C, RV755). And since the battery remains unchanged, it can only conclude that Shark has installed a new engine on its R85 models. I estimated that the suction power was 2, that was 1000 Pa and 1400 Pa. This means that ION robots are more than capable of vacuuming hard floors such as wood, tiles, linoleum, marble and so on, as well as low fluffy carpets. The small dimensions and low profile of just 2.6 inches allow you to clean under furniture and small areas. BatteriesThe battery is mediocre 14.4 V/ 2550 mAh Li-Ion. This helps the robot to operate continuously for about 1 hour. After complete cleaning, it takes 3 hours for the robot to be fully charged. Shark ION robot is equipped with a number of proximity sensors that allow you to avoid hitting furniture or anything hard that comes in its way. Moreover, these sensors also tell the robot how to turn around if it detects rocks or stairs, and last but not least, how to return to base when it's out of juice. Shark Calls This Smart Sensor the original model, and Smart Sensor Navigation 2.0 on the latest R85 models. For me, it's all the same, as without a laser or camera, the robot can not build a decent virtual map. The result is that the robot moves semi-randomly and in a multi-room environment does not clean everything or safely return to the dock. FiltersIf includes a large HEPA filter, which must be replaced every now and then-0-0. The problem is it's pretty expensive (\$15 or so). The manufacturer recommends changing this filter once every 2 months in the product manual, but I think that if you clean it properly, it can take up to 6 months or longer. BinThe R75 has a bin that can store 14 oz or dirt. The R85 can store 21 oz in the XL dust container. They're pretty comfortable, there's a lot of robots with much smaller crates. However, I prefer those that are accessible from above (see, for example, Xiaomi). Accessories Here's what's in the box for a 720: All models except the S87 (R72, R75 and R85) come with the following: the Shark ION robot body2 side brushes1 HEPA filter on the charger dock8 ft BotBoundary stripsa remote control with batteriesthe product manual and quick start guide Shark S87 2-in-1The S87 is a 2-in-1. I think Shark couldn't help themselves to have a combined unit, even in this niche. In addition to the robot vacuum, a smooth wireless handheld called w1 is displayed. The charging dosk has been modified to suit both units. Finally, the box contains 3 accessories that are attached to the W1: the multi-surface pet device, the crevice device and the soft duster. Since Shark sells the cordless W1 for more than \$120 separately, the S87 is an interesting deal to say the least. Warranty1 year guarantee. Nevertheless, I advise you to buy directly from

Amazon and enjoy the benefits of a star return policy. Special featuresOperable in the smartphone appWorks Alexa and Google AssistantComes passive magnetic strips should be used as virtual wallsÁrSpeet spending money, the R75 is under \$300 at the moment. The next R85 and S87 are expected to reach \$400, which makes this product slightly expensive. Sometimes, you can find the R85 at cheaper prices here.Comparing various Shark ION models: R72 (720 series) vs R75 (750 series) vs R85 (850 series)ModelBin sizeMax PowerNavigationPriceShark R72 (720 series)14 oz1000 Pa (estimated)Smart Sensor Navigation \$122.16Shark R75 (750 series)oz41100 Pa (estimated)Smart Sensor Navigation \$129.00Shark R85 (850 series)21 oz1400 Pa (estimated)Smart sensor navigation \$2.0\$359.99Shark S87 (85 1 series)21 oz1400 Pa (estimated)Smart sensor navigation 2.0\$179.00A Shark ION vacuum benefits make low noise (if not used at maximum setting)) Accept voice commands (Alexan or Google Assistant). Can schedule smartphone Works well hard and thin carpetsThere is a large binCons of Shark ION robot vacuumYWeak batteryHard to connect Cheap Replacement Closing WordsShark ION is the first robot vacuum of the company. He's doing very well, but there's still room for improvement. Even so, if you're looking for a versatile robot that can be scheduled using your smartphone, this product may be the right choice for you. You.
