Translate words, phrases, sentences, and entire paragraphs of text between different languages using Googles language translation services. It can even detect your source language (except Chinese). Whether you want to learn a foreign language, fresh up your skills, travel foreign or just curious web application this iPhone will help. Use the tong button to quickly flip the source and destination text. It's easy to create a new email with translated text. Support Afrikaans, Albanian, Arabic, Belarusian, Bulgarian, Chinese (no automatic detection), Catalan, Croatian, Czech, Danish, Dutch, English, Estonian, Filipino, Finnish, French, Galicia, German, Greek, Jewish, Hindi, Hungarian, Indonesian, Irish, Islandic, Italian, Japanese, Korean, Latvian, Lithuanian, Macedonian, Malay , Maltese, Norwegian, Persian, Polish, Portuguese, Romanian, Russian, Serbian, Slovak, Slovenian, Spanish, Swahili, Swedish, Thai, Turkish, Ukrainian, Vietnamese, Welsh, Yiddish November 18, Version 2016 , but since there are many reviews say how it does not work and translations are wrong? Can I believe it? I also think it would be cool if you could hear how to say the translations, then you can advertise this app as a way to learn a lot of languages. There are so many words, even really simple words, that it doesn't translate correctly. So it doesn't help that a person is serious about getting an accurate translation. For example, in Spanish, unos should be translated into some but not. It translates most, which is almost the opposite. If you want a reliable source, buy a WEBSTER'S SPANISH NEW WORLD DICTIONARY. It's the only really reliable source, as web translators often don't work. I got one for about \$15 at Target.Also, there should be different settings for Hispanic Americans and Spanish Spaniards (from Spain) because the notable means are different— which everyone that actually speaks Spanish knows. Good morning. Can you please add Pashto to this app? I was on my way to Afghanistan with my unit and I was the soldier interpreter for my battery. I'm not 100% fluent yet and having Pashto on this app will help a lot. Can help me save some lives or at least help create and maintain some good relationships between the locals we meet and ourselves. The Arabic here is great so far as I can tell. Thank you for your time. The developer, Piet Jonas, did not provide details on security practices and data processing to Apple. Developers will be asked to provide privacy details when they submit their next app update. Website app support for World developers needs independent businesses. I am currently using this app and the transition between languages is very fast, this app is very intuitive and works smoothly in our web. Setup is super easy, automatically translated as well as . Now, my site has mor more than 12 languages available. I'm using this app on my store to translate into multiple European languages. The support team is amazing, really helpful and responsive. I asked to change the flag and they sorted it out for me immediately. I checked the translation into French and Italian, and although it's still not perfect, it is better than other translation applications I've looked at, and at a price I think it's perfect for a small, new business like me. Very smart and easy to use App! We've had problems with access to the app, and the team fixed it very quickly. We try other applications, which may be more complete but with a lot of hassle with our theme code and do not support. So we gave up and started looking for a more solution Very beautiful and it works! The support team is very good!
