The smart battery case protects and charges your iPhone, giving you more time to use your device. Learn to use the smart battery case. Before you start using the smart battery case, update your iPhone to the latest version of iOS. Also, be sure to charge the smart battery case before using it. Connect the Lightning cable to the USB that came with your iPhone to the Lightning connector on the case. Connect the other end of the cable to an Apple USB power adapter, and then connect the adapter to a power outlet. For the fastest charge, use an Apple USB-C power adapter that delivers 18-time or more power. You will see a amber state light while the casing is charging. When the case is fully loaded, you'll see a green indicator. To attach the case, pull back the top edge and drag your iPhone inside. When you put your iPhone in a smart battery case that has a charge, your iPhone charges automatically. To remove the case, pull back the top edge and drag your iPhone to the top of the case. Swipe up, not towards you, or you can damage the connector. When you attach your iPhone to the case, a charging state appears on the lock screen. The status also occurs when you connect the casing to the power supply or disconnect from the power supply. If you've already attached your iPhone to the case, look for charging status in Today View on your iPhone. With your iPhone in the case, connect the Lightning cable to the USB that came with your iPhone to the Lightning connector on the case. Connect the other end of the cable to an Apple USB power adapter, and then connect the adapter to a power outlet. For the fastest charge, use an Apple USB-C power adapter that delivers 18-time or more power. When your iPhone isn't in the case, you'll see a green light when the case is fully charged or an amber light when the case is charging. If you have the smart battery case for iPhone 11, iPhone 11 Pro or iPhone 11 Pro Max or the smart battery case for iPhone XS, iPhone XS Max or iPhone XR, you can charge it wirelessly with Qi-certified charging accessories. You can also charge your smart battery case without your iPhone. Follow the steps below if the smart battery case doesn't charge, charge slowly*, if your iPhone isn't charging, or if you can't use an accessory while using the smart battery case. Follow these steps. Try charging again after each step: disconnect the Lightning cable from usb from the power supply, and then connect it again. If your iPhone is attached to the case, remove the case. Then try charge your iPhone and case separately. If you have a movie, sticker or label on the back of your iPhone, remove it. Reattach your case. If you're using a Qi-certified wireless charging mat to charge the smart battery case for iPhone 11, iPhone 11 Pro, iPhone 11 Pro Max, iPhone XS, iPhone XS Max, or iPhone XR, make sure there's nothing in between and the wireless charging mat. Also center the Apple logo — on the back of the smart battery case — on the charging pad. Or place your iPhone where the manufacturer recommends it. * Charging both your iPhone and smart battery case takes longer than charging your iPhone yourself. Follow these steps. Try uploading again after each step: Make sure you have the latest version of iOS. If you have accessories connected to the case, unplug them. Remove the casing. Reattach your iPhone to your case. If you can't use an Apple or Made for iPhone accessory with your smart battery case, follow these steps: unplug the accessory, and then plug it in again. Remove the iPhone from the case, then reattach the case. The smart battery case for iPhone 11, iPhone 11 Pro and iPhone 11 Pro Max is different from the smart battery case for iPhone XS, iPhone XS Max, iPhone XR, iPhone 7, iPhone 6s and iPhone 6. The Smart Battery Case is not compatible with iPhone 8 or iPhone X. With the smart battery case for iPhone 11, iPhone 11 Pro and iPhone 11 Pro Max, you can take a photo or video using the Camera button. If you need more help with your smart battery case, contact Apple Support. The smart battery case can be slightly warmer while charging. To extend battery life, if the battery heats up too much, the software may limit charging above 80%. The smart battery case will charge again when the temperature drops. Try moving the smart battery case and charger to a cooler location. The smart battery case will not charge wirelessly when connected to USB. If the smart battery case is connected to your computer via USB or connected to a USB power adapter, the smart battery case will charge using the USB connection. Thanks for your feedback.
