Best skateboard deck brands 2020

December 22, 2020 / By Brian / 1 Comment In recent years, it is becoming more popular to customize your skateboard. This includes finding new wheels, tape clips or even a custom skateboard deck. In this article, will be the best online skateboard deck today. In this list will be the elements that you will need to consider before choosing a set of cards that suit your skating style. Since our deck takes the most abuse and your weight, it has completely complimented your skating skills as you will have to ride on it with perfect balance. READ The Best Skateboard Grip Tape 2020 Best Skateboard Deck Brand This list doesn't have a criteria for determining a brand position on this list. These positions are entirely based on brand reputation in the skating community. In this article will be a leading skateboard floor of the brand, along with a link to their product portfolio. If you are a new rider who is looking to buy a new set of cards, then this article will give you a good guide on what suits you best. Your choice should focus on areas such as: Customer Quality Price Design Reviews This is a list I've adhered to the best ski brands you can find online. Birdhouse Skateboard Decks Birdhouse is one of the most reliable and relevant deck brands in the skating community. This is down to their high-quality construction built from the most durable maple wood, which features eye-catching on-deck graphics like with the 'Aaron Jaws' Homoki Tiger deck. Features of birdhouse 'Aaron Jaws' Homoki Tiger deck include: Deck Size: 8.25 width x 32 lengths. Pre-drill holes for easy toy truck assembly. That W-concave is the preferred type among ska athletes. Construction of 7-mly maple wood. Finally this is the best skateboard brand you'll find online, as the birdhouse slide is rock solid with tons of 'pop'. They are perfect for every skill level from beginner to professional and are produced from the finest materials. Check it out Powell-Peralta Skateboard Decks Powell-Peralta is probably one of the longest-rated standing decks in the skating community. This is because they have been making high quality 7-ply flooring maple since 1978 as 'Flight' decks. Powell-Peralta Flight Skateboard Deck features include: The 7-layer maple flight deck is stronger, thinner and lighter, giving you a larger pop for the 'Ollies' Floor Size: 8.25 x 31.95 in length. The average concave AirLam maple veneer press increases its lifespan of 7-layer wood maple construction. Overall, the Powell-Peralta flight deck is a perfect example of a permanent deck. This is because it is epoxy infusion, fibers that reinforce the structure of reciprocum is resistant to breaking and gives them an eternal 'pop'. Check it Out Baker Skateboard Decks Baker floor is appreciated among many as perfect, but affordable flooring that's perfect for beginner skas. This is because they are constructed from a 7-layer wood maple veneer press that makes them super durable as shown with their flagship Baker Brand Logo deck. Baker Brand Logo Skateboard Deck features include: Deck size: width 8 x 32 in length. Build high quality style at affordable prices. Suitable for beginners skating parks & streets. Decks are available in different sizes. Construction of 7-mly maple wood. Finally if you're considering building your first complete skate setup, then this is the perfect set for you. This is because it has different sizes to suit your build as well as variable colors. Furthermore it is produced with longevity in mind and can take abuse, making it a perfect budget beginner skateboard floor. Check it Out Enjoi Skateboard Decks One of the more well-known new companies that have been established in recent years who have been making innovations in the skateboard industry is Enjoi. This is because they have produced eye-catching decks like with the 'Whitey Panda' deck suitable for all skill levels. Features of enjoi Whitey Panda Skateboard Deck include: Deck size: width 7.75 x length 31. Suitable for use on streets, swimming pools, ramps, parks and verts. Suitable for all skill-sets as it is built with long-term durability. Professional skateboarders Rodney Mullen and Marc Johnson created the skateboard brand. Construction of 7-mly maple wood. Overall if you're a regular or beginner figure skar who's looking to get into the street or skating park, then an Enjoi deck is a perfect starting deck that offers excellent light weight distribution and durable construction that would be perfect for your setup. Check it Out Element Skateboard Decks Most likely among all the skateboard brands on the list, you've most likely heard of Element. This is because they produce excellent tables with the greatest creative development to allow their 7-ply maple wood floors to withstand the harshness of any environment, shown by their 'Part' deck. Element Section Skateboard Deck features include: Deck size: width 7.75 x length 31.25. Superior innovative 7-ply Thrift-wood building. Develop light feathers, unlike its competitors. Ensure against all production defects. In conclusion this deck is perfect for any average/casual skateboarders as it has a light feather build, which makes it easy to make and gives it more 'pop'. Moreover, it has a Thrift-wood construction as the Element brand is environmentally conscious. Check it Out Girl Skateboard Decks You are a normal/professional skar, then you can look at getting a solid rock durable deck, along with tons of pops to tackle the stairs. Girls set industry for skateboard decks for skateboarders as their decks offer a traditional 7-Ply build at an impressively light weight. A good example of an impressive Girl set is the 'Folded OG' set. Girl Folded OG Skateboard Deck features include: Deck Size: 8.375 width x 32 lengths. Lightweight 7-ply wood maple construction. Cory Kennedy Pro Model Pre-drill holes to easily skate the Final assembly truck if you are in the market as an ordinary skar who is looking for a rock-solid table with lots of 'pop', then girl Folded OG skateboard deck and brand is the ideal candidate for you. Check it Out Blind Skateboard Decks If you're looking for a deck that's suitable for parks and streets like a regular figure skat, then the Blind board is probably the perfect deck for you to get. This is because they are produced from a 7-ply 100% Canadian Maple with Epoxy Resin Glue. This makes the deck extremely durable and resistant to easily damaged from impacts, while maintaining an excellent flex. This is shown by the Blind Maxham OG Reaper floor. Features of blind Maxham OG Reaper Skateboard Deck include: Deck size: width 8.25 x length 31.9. Extremely durable 7-mly 100% Canadian Maple with Epoxy Resin Glue. Single Deck Press (Same shape and recess every time) Jordan Maxham pro model guarantees overall breakage if you're looking at a deck that's got a great reputation for 'pop' and its longevity, then a blind floor would be the best suggestion for you. Check it Out Toy Machine Skateboard Decks Toy Machine has been setting industry standards for deck innovation since the 1990s because they are definitely a contender for the best deck for five-on-year 'pops' with little competition. Also it manolys to pull out tricks on the street and the vert is great as the deck is lightweight and has great flex. The best example of a Toy Machine card is their Monster card set. Toy Machine Monster Skateboard Deck features include: Deck Size: 7.75 width x 31.5 length. Mellow concave. The color and size change. Made from 7-mlys of hard stone maple wood. Overall if you are looking for a high quality product, then toy machines produce the best on the market. This is because their layers are dried at high temperatures and layers of cereals as it gives the floor extra strength. This returns results in a better 'pop' and a more permanent board. Check out it Out Alien Workshop Skateboard Decks Alien Workshop is a long-running brand from the 90s which has a reputation for high build quality. Alien Workshop has a reputation for eye-catching production such as missing 3D leaf flooring. Alien Workshop Missing 3D Foil Skateboard Deck features include: Deck Size: 8.125 width x 31.5 lengths. The deck was produced from 100% North American Maple construction. great for skating on the street, vert, vert, or a park Overall this is a more affordable deck which offers a decent pop into it that makes simple practice tricks. This set can be appreciated more by a beginner skateboarder. Check it Out The last brand on the list is Bamboo, who has a more alternative approach to their deck design. This is because they are produced from bamboo instead of maple, giving the deck a better pop, improved shock absorption and longer lifespan. This is expressed through their top graphic design as an environmentally friendly alternative that has improved benefits beyond rival Maple Canada. The features of Bamboo Graphic Skateboard Deck include: These tables are a 6 m bamboo and hybrid that improves sustainability while maintaining strength. Available in a variety of sizes. Bamboo skateboards made from the highest quality bamboo are an environmentally friendly and sustainable material. The workpiece is better than the usual Maple floor. Overall if you are looking for a more environmentally friendly alternative to a maple floor, which even out billet it then this deck is the sustainable & sustainable option out there for you with many different designs and sizes. Check it out skateboard deck Buy Guide A skateboard deck is the most important part of setting up your skateboard. This is because it keeps all your weight and helps you balance while riding. If you are looking to build a new skate setting, then the first priority on your list should be to find a brand of high quality skateboard flooring. Even with a complete skateboard setup, sometimes you'll have to change depending on how you treat it. Skateboard decks sometimes come across as a simple part of a skateboard setting, although they come in a variety of styles and sizes. To make the right decision, you should know the exact size and style that suits your skating style. As if you choose to better suit your style, it will enhance your flooring abilities. The length of The Deck Skateboard floor will tend to be sizes in and around 28-32 inches. It is highly recommended for skateboarding beginners to start on a floor that is 31.75 inches long. If you find that you ride at slower speeds, to bilily flip technical tricks it may be in your interest to get a shorter deck. But the average ice skating should aim to find a deck that is 30-32 inches long. Width Of The Deck 7.5 – 8 inches - Standard table for adults street skating or performing more technical tricks than 8.0 – 8.25 inches - Skating pool, ramps, and park 8.25 inches & Greater - Vert, pool, flyway, and just go to old school Wheel Base On your deck, you will notice that you can see holes on each it is the mounting hole (used to mount the distance between the holes on each side is called 'Wheel Base'. In simpler words, it's the distance between the two sets. Wheel. You will find that the average wheel base distance is between 13 - 15 inches long. These should be decided regarding skateboarding height and personal preferences. There tends to be only a singly wheel base length on a deck. Although on some floors there are many mounting holes that can give your skateboard a different wheel base. This gap can be decided based on your experience and will significantly affect your performance. If you adjust it, it will clearly and greatly affect your control while flying on your ship. The tip & tail of the skateboard are quite simple but sometimes misunderstood that the bow of the deck is front and the tail is rear. If you're a beginner, this can be difficult to distinguish, but most skateboard brands have graphical designs that clearly show the difference. Moreover, another way to distinguish this is by finding out which side has a bigger kick. This is because the side with the larger rock should be the nose, where as side with lower stone will be the tail. Understand concave shape skateboard a recessed skateboard floor plays a huge job of a floor performance. There are different types of concave shapes around these days, allowing you to have a better foothold than a flat deck. The benefit of this is that it improves your drift, slide & spin. Photo: @conquest_skateshop Here are some of the types of concave shapes you'd expect: Mind-centered recess - Common shape, in U form, where most cards have it. This recess allows for better leg clips for all styles of skating. Progressive Concave - Better version of the mind-centered recess, but with a steep wall on the railway with a wide base. This leads to a more lock in the feeling for leg safety. Bathtub - It is sometimes known as flat cave. Similar to the center of mind concave but with sharper angles on the deck rails. Allow the feet to be flattered and help you with sudden changes in movement. W-Concave - There is an additional curve in the center of the deck, which gives you better energy from the heel to your feet. The benefits of this are more accuracy and briskness while on your ship. Flat - This has no recess. A few drop-downs to the long board have this. This allows more space for your feet and more space to create tricks. Asymmetric - Concave is found in the floor with slightly increased rails. They are increased at different angles. So for riding more power in their heels. Convex - Facing concave shape. The card is shaped forward, produced only for professional skateboarders for downhill races. Mount holes Another feature that you may be new to your card is that there are boreholes into it. The purpose of the mounting holes is that they attach the truck to your deck, using skateboard hardware. mentioned earlier, a lot of skateboard decks tend to have only one mount How A Skateboard Deck Can Effect Your 'Pop' If you buy a high quality flooring skateboard brand as mentioned above in this article, you'll notice how satisfying the deck is when you preform the trick. As the wood grows older and begins to bend, you will notice that its 'pop' will diminish. This is why skateboarders will often swap their floors from time to time. An innovation in skateboard floor development is the use of bamboo for a deck material. This is because Bamboo often offers a better 'pop' when new and tends to be more durable. What happens if you buy a cheap skateboard floor? In general, a lot of skateboarders including myself can only look for a cheap alternative to a new skateboard deck. However if you go for a cheaper alternative, you'll notice that they have junk durability and even tend to snap under hard impact! If you want an additional set of cards for the rest of your hand, then spend the appropriate amount so that it lasts. Final conclusion, you will need to study the elements of your chosen ski deck, such as price, quality, design and customer reviews. If you include these four easy-to-understand principles, you should be fine and on your way to finding the perfect set of cards. Deck.
