The best and useful reviews are the first to be noticed by users and if no response can affect the download speed. That is why it is strongly recommended to answer them. So I give 1 star for now because I played this game NONSTOP (except when I ran out of spins, but I came back to play every few hours when there were new spins) more than a week now, AD after AD so many ads! and I feel like it's definitely rigged. I started playing because I really need extra money and it started great. Winning \$1 here, 0.50 cents there and like after \$3 I only started to win 0.10cents at a time. Which was fine because I thought it wouldn't be long before I had \$10 to cash in with. But as soon as I hit \$7.70 I stopped winning ten cents in total. I thought watching more would help me out, so I watched as much as I could and no. So yes. He's lying and cheating. So I figure once I get close in the coins I would stop winning coins too. That coins upset me too, because I should be high on the leaderboard, but it doesn't count my coins correctly. Example this morning I had 1200, I won than 500 like 1500 or more and more and I checked the rankings and said I have 1300. It's just not fair how it works. I watch so many ads for this game (and sometimes I even download) and play every time I'm allowed, and it's just rigged. So if something changes or is fixed, it gets 1 Star. This is a great way to want to buy stuff for you and I don't have to get to talk to you about anything other than the fact that I've watched ads on the app many times but I can't make enough money to cash in. I could be wrong because I don't have much luck, but I'm just going to pontifigate the experience I've had. It's exciting when you get the first two matches in the jackpot, but then the reels slow down and never have that third match actually get it.. Long story short, good time waster, but I don't think you can ever get a jackpot or even enough money to equal the time you spent on the game. At least I never got anything from the app... still, but I have to bite because I am so very close as now I am rating them 5 stars because I had no problems. I'll update if any arise. I only had this game maybe 12 hours and played it for about an hour. After this hour, I have \$4.80 (which you'll need \$10 to cash in PayPal). I also have 48,500 chips (you need 5 million in cash for \$5). It seems to be actually working. Where you are actually winning money at a good pace and not having hours and days to see the difference! Chips can grow slowly, but that's fine. If anything changes, I'll be sure to add the "update" section of this review. Happy playing! If you like slots this is the AP for you. However, I played it for two months every day. First it allows you to win quickly and then you stop winning money just before the \$10 payout. The token payout is only about 30K per day and you need to have 5 million in cash for \$5. You have to watch a huge amount of ads, but can pay them 4.99 to play advertising for free. I haven't seen anyone cash in more than \$10. There are many other apps out there that have better graphics for slots and you can at least play for chips that you can get gift cards faster than this game. I don't recommend this to the AP as it seems they are making money from the consumer through ads and charging to play the game and not giving back. This game will never make a payout because the originator of the game wants to ensure that he holds 100% of all the money that marketing companies pay him to keep their adverts displayed. SHAME on the originator for such unethical and dishonest practices. I am convinced that this review is never reduced as much as reviews of this kind made on two other games. This game will be removed from my system over the next week. By the way, I fully understand that the causative agent does not Earn money from advertisers but at least to be honest at first I had high hopes that this game would not be like most other rogue games, but unfortunately it is not necessary marketing company and the owner of this game should be audited by the federal authorities in order to prosecute to stop the netic and unrealistic marketing and games Spin Royale's ranking in games - Casino - Simulation - Entertainment Last update was on September 12, 2020a the current version is 1.6.4.
