Play 3D Pocket Pool games that are only available in the United States (USA) on this website. 3D Pocket Pool is a Gameboy Color emulator game that you can download to your computer or play online in your browser. You can also download free ROMs like Chase H.Q. - Secret Police (Metro 3D Re-release), Pocket Bomberman, and Pro Pool as shown below. 3D Pocket Pool works on all your devices in high quality. Idioma EspañolNo comentarios In late 1998 a new model of the Gameboy handheld video game system has appeared on the market called Gameboy Color. It's not a multi-color housing, but a color screen! Although the blue box looks exactly like a normal Game Boy Pocket, inside there is something different. The clock speed of the main 8-bit processor is doubled, doubling the amount of video memory and four times increasing the amount of RAM. The system supports both, an old screen resolution of 160x140 pixels, and a new 320x280 pixels especially for color mode. According to nintendo game boy representatives can work in three color palettes: with 10 (same as through Super Game Boy in SNES), 32 and 56 colors. At the time of nintendo console's release on the market already had the following color games: Déjà vu II: Ace Harding, NBA Jam '99, Top Gear Pocket, Turok 2, Gex: Enter the Gecko, Shadowgate, Bugs Bunny Crazy Castle 3. Of course, gb color is compatible with the game library of more than 400 black-and-white games released for previous versions of gameboy. Nintendo's Game Boy is a real survivor of the gaming industry, soon we will be celebrating its 20th anniversary. If you've always wanted to play games on Gameboy Color, but never had the chance to give it a try, you can do it now without having a handheld Gameboy Color console. Simply download Gameboy Color roms game and emulator software and play on your pc or other modern system, for free.
