## Radiation city free mod apk

Эккен Эккен Эккен Эккен Эккен Chernobyl incident can be said to be a disaster that can never be forgotten in the history of human civilization. On the one hand, it caused almost permanent damage to the environment and was still not suitable for humanity to live in this place. Plants also mutate due to the effects of radiation. On the other hand, they also remind people that nuclear energy is no longer completely secure. For many game developers, Chernobyl has become a popular backdrop for many game productions. Many game productions wanted to make their or similar places as the background of the game. Atypical Games, the developer who started the game Radiation Island, has launched another new production called Radiation City. Like its predecessor, players must be alone in a region that is already contaminated with radiation and survive in the area. The game still continues radiation island in excellent image design, and further improved, the details of the more refined, and from the name of the game it is not difficult to see that the game in content and scenes with rather greater expansion, larger and larger scenes mean more elements that players can experience in increasing the number and type of enemies they face. The sound design of the game is quite spot on, especially rendering loneliness, the game is still done on the spot. The game in order to easily start, or take time to adjust the dots on both sides of the screen is responsible for the attack, and swipe on both sides of the screen you can control the movement of character and perspective, respectively, which in the same type of game was considered more common, and in the lower right corner were arranged squat , run and jump three buttons, the player can directly click the button to switch but it is worth noting that if in the long run , the character gradually begins to wear out and then slow down. Therefore, it is not possible to run with infinite force. In addition, the backpack and main menu buttons are also located in the upper left and right corners. However, if a player does not feel fit, you can customize the settings in the UI, it is still very convenient. Just enter the game, the player still belongs to nothing, then the player needs to solve the most basic problems with food and clothing, if you see a player on the ground canned meat or water bottles, then you miss, and if you can find a backpack, then players will be able to collect more stock. Also at this point players will not be too lonely due to the effect of radiation at this point appear a variety of sub-human or hungry carnivores, so a handy weapon is necessary, and when the night falls later, if you do not have weapons and lighting in your hands, or suggest that players find a safe place for tent sleep, at least do not worry about infestation during sleep. The content of the game is still very rich, except weapons, food, supplies, all kinds of tools are all that can be used to open the opener opener, which is used to open locked doors , etc., without these tools can not, and most tool items are durable set. Game room players can enter them, and sometimes the room can also look for a lot of good things. Overall, maybe the quality of the game is still pretty good. Radiation City APK mod is an adventure game that will close you to a remote island where you have to fight with terrible monsters and try to survive. You took part in a secret experiment, but something went wrong and threw you into another dimension where you came to a mysterious island. Explore it looking for food and weapons, as well as visit abandoned villages and military bases to help you unravel the secrets of the island and get back to the radiation Island mod APK. Walk around the island, go swimming in the ocean, but watch out for local animals trying to eat you and zombies hidden under the bush.
