A top marksman can fight the entire army on his alone! Enjoy this fighting game! Jan 1, 2021 Version 1.1.5 - Many improvements and bug fixes Hello. This is a great game. But there are several reasons why this game is somehow off. First, it has characters and low-quality buildings. Please, please, make him of better quality. Second, the (last) game. The game itself is too much for me. Please make it harder. Or tell me a way to make it harder. That's it. If you make changes from these ideas, the game will be great. Thank you! thanks for your feedback! I've been playing Gun Strike - Counter Terrorist for over 2 years and I love the game. It's been my continuous favorite mobile game since I started playing. I'm at level 98 now and I'm at the point of the game where you realize what you could have done better in the game. I honestly think the reboot feature would be amazing in the game. Deleting and reinstalling the game doesn't work, so I'd appreciate it if you added a restart game feature where it would basically delete your entire account and make you restart from scratch. But that would be completely optional as in the settings. If you decide to read my review and add a reboot feature, I would like it very much. But the game is still good without her. I thank you for having this amazing game👍👍👍 so fun to use does not require WiFi. I can not wait multiplayer one bug I noticed if you throw a grenade when you switch back to your gun all grenade kills count as if you gun. Another small problem sometimes isn't extremely common just sending you out of the game instead of starting the game as a tdm. Once I spawned not at the shooting range there was a jungle and I had unlimited money. I'd like to be in multi-player testing as well. A good game as a whole a great future awaits him. The developer, Sallie Crocker, indicated that the app's privacy practices
